Company Profile

Company Introduction

Company Name

Shenzhen Sopooda Tech Co., Ltd

Management Ideas

Products difference is different in enterprises

Company Address

1F,2F,4F,5F/BLD E,Dong Hai Wang Industry Zone A, Yang Mei, NO.369, Bu Long Road, Ban Tian, Shenzhen, China

General Manager

Fu Gang

Company Introduction

Established in	2010
Employees number	About 200 employees
Total Areas	3,300 square meters (4 floors in all)
Sales Revenue	USD 10,000,000 (2013) , USD 13,500,000 (2014)
Production capacity	Home cameras: 50,000-60,000 set/month; Industry cameras: 40,000-50,000 set/month; others (NVRs, DVRs, Kits) :10,000-20,000 set/month
Partner cooperation	OmniVision. SONY HISILICON
R&D teams	35-40
OEM cooperative partners	Huawei, Stanley (America), China Telecom, China Mobile, China Electronics, COSHIP Electronics, TCL
overseas subsidiary company	ANYIN Techologies (HONG KONG) Co., Ltd

International Quaility Process of Innovative Camera Manufactures

1. International Quality, refer to foreign counterparts,
   welcome pre-shipment inspection made by domestic and overseas' clients

2. Innovation: innovation is not only a product or technology innovation, but production management innovation

3. Camera Manufacturer: with high-level 10 years experiences
   in industrial and civil camera field

History&Technology

Development

2016年

- Video sharing technology, streaming media technology, cloud technology, intelligent analysis technology, higher definition technology and etc

2015年

- Development has full intellectual property Apple, Android APP flagship version of the software

2014年

- Development completely has appearance and utility model patent product consumer cameras

2013年

- Production of civil cloud camera and cube camera (HI 3518E)

2012年

- Production of civil screen phone network camera (H[redacted]07)

2011年

- Production of IP network high-definition cameras 20 kinds of series of products and to develop their own all CMS centralized management software platform

2010年

- Setting up factories, to start producing professional surveillance cameras 40-50 kinds of series products

Quality Control

1.Total Quality Management Program:

7 All,3 No

3 All:
1.All staff's participation
2.All control of the whole process
3.All company QC's activities

3 No:
1.No receipt of disqualified products
2.No productionof disqualified products
3.No disqualified products out

4 All:
1.All customer-centric
2.All to prevention-oriented
3.Alldata used to speak
4.All go accroding to the PDCA circle

Quality Control

2. Quality Management System:

Quality Policy& Objectives

- Quality Policy: standardize the management, meet the standard requirements; Continuous improvement and exceed customer requirements.
- Customer satisfaction : the qualified rate of products: ⩾98%
  customer satification: ⩾99
- Products Aging Test: each about 100% aging test.

Cost-effective HD Smart Home Camera

Model：CN-C100E

USB-RJ45 Cable A7
(Optional)

Different color
(Optional)

Camera Advantage：

.Unique smart home housing design with outstanding Craft

.UV Material , scratch-proof and dust-proof

.Rigid aluminum tray with laser engraving technology

.Package with installation base, easy to install in wall and ceiling in a big rotation angle

.2.0MP LEN, Clear image in Computer

.OV9712+Hi3518E 720P HD Chip

.Built-in IR cut filter in metallic material, long life, high reliability and stability

.One piece High- power infrared ceramic lamp , clear night image

.Smart WIFI connection (wire optional), easy to set up

.Manual Ajust: horizontal 0～360° , Vertical:90°

. Two-way audio,3D Voice Echo cancellation and noise suppression technologies

.Precision Immersion Gold Multilayer PCB board technology, Moistureproof and difficult to oxidize

.Mature and stable high quality white power adaptor

. Easy to install, setting,use and maintain

SOPOODA®

Crannoopy

30M Infrared Night version outdoor waterproof IP camera

Model:CN-720K3

Camera advantage:

.Metal housing,outdoor waterproof, outstanding housing craft, wall mounting and ceiling optional,can work at any complex environment in the outdoor

.3MP 3.6MM LENs, Clear image in big LCD screen

.36 pieces 12MIL High-power infrared lamp, distance:25-30M, clear night image

. Wire and smart WiFi connection, easy to set up

.Support TF card, optional

. Support external microphone, 3D Voice Echo cancellation and noise suppression technologies

.Precision Immersion Gold Multilayer PCB board technology, Moistureproof and difficult to oxidize

.Stable high quality white power adaptor

. Easy to install, setting,use and maintain

SOPOODA®

60M Infrared night vision outdoor waterproof IP camera

Camnoopy

Camera advantage：

.Metal housing,outdoor waterproof, outstanding housing craft, wall mounting and ceiling optional,can work at any complex environment in the outdoor

.3MP 2.8-12MM HD Varifocal Len, adjust focul length independently, large-screen display is also legible

.8 pieces high-power Laser LED, distance 45-50M, clear night image

. Wire and smart WiFi connection, easy to set up

.Support TF card, optional

. Support external microphone, 3D Voice Echo cancellation and noise suppression technologies

.Precision Immersion Gold Multilayer PCB board technology, Moistureproof and difficult to oxidize

.Stable high quality white power adaptor

. Easy to install, setting,use and maintain

SOPOODA®

Introduction of accessories

Camnoopy

Remote controller A20	Power adaptor （Standard package） A-30	Network cable A6	USB-RJ45 conversion cable A7	**Temperature&Humidity cable** A8/ A9
Door detector A-10	Door detector A-11	PIR detector A12	**Smoke wireless detector** A-13	Gas Detector A-14

Accessories

.Power adaptor: Chip control, overcurrent protection, low voltage protection, highvoltage protection.

Remote controller: One key setting defence.One key delete defence.SOS.Privacy button

.Temperature&Humitidy cable:Set up upper and lower limit to temperature&Humitidy, when temperature or humitidy beyond limits, it will send alarm

Wireless alarm detectors

.433MHZ Wireless alarm device, compatibility with 1527/2262 wireless code mode and all alarm detectors in security market

. With low voltage alarm push function

.One key to learn alarm sensor code, simpleness and convenience

.Intelligent control, few misinformation

. Microprocessor(MPC)Coutroller, part of accessories with fault self-checking function

SOPOODA®

APP

Camnoopy

SOPOODA®

Camera Software APP

Camnoopy

Highlights:

.APP smart WIFI to add camera, super experience.

.APP temperature&humidity alarm push and temperature-limit setting, much stronger alarm push function. (hardware support)

.APP alarm transport preset function, automatic turn over to the preset location and ring (hardware support)

.APP wireless alarm device list, user-defined wireless alarm name, electric power display (hardware support)

.APP image zoom in and zoom out, super experience.

.APP smartphone video storage and play back, easier video operation.

Highlights:

.APP alarm push as TF card is abnormal, stronger alarm push function.

.APP realtime alarm push and ring, APP one-key defense and one-key cancel defense, easy operation。.

.APP horizontal and vertical rotate camera by remote control (hardware support)

.APP video snapshot save and view

.APP view alarm logs, audible alarm

.APP sensitivity adjustment function of motion detection

.APP sensitivity adjustment function of PIR (hardware support)

SOPOODA®

Camera Software CMS

Camnoopy

Highlights:

.APP sensitivity adjustment of audible alarm.

.APP remote access the SD card video and download.

. APP video snapshot will save in the default phone album in smart phone.

.APP online update camera and APP new software.

.PC client software to view, playback, video and alarm push in mult-image.

.PC computer alarm sensor can support special functions such as it can view alarm image, and private image only can see the blank image.

.APP and PC software is easy to install and with abundant functions,and the technology is mature and stable.

SOPOODA®

Camnoopy

Hierarchical Management System of Intelligent Camera

01 Present station in professional surveillance

02 Advantages of civil intelligent camera system project

03 Structures and functions of civil camera intelligent surveillance

04 Marketing cooperation cases

SOPOODA®

Camnoopy

一、Present station in professional surveillance

1 high cost

Back-end needs to tiled display wall and centralized storage, and integrated Management Platform, the most point is that it takes up too much broadband, if you want to ensure smooth image and real time transfer, the thousands surveillance systems have to apply fiber industrial network (FIN), then it can solve the problem in network transmission.

2 troublesome wiring installation

Front-end camera and back-end, the computer room all need cable wiring, Video camera, display screen, platform software all need install and debug, all this must be done by a professional technicist.

3 poor experience

The structure of centralized storage and monitor certain leads network delay and image stuck, even system crash. And professional surveillance is mainly to view and manage by PC computer, it's not ideal both in software experience and the level of image smooth.

SOPOODA®

Camnoopy

二、Advantages of civil intelligent camera system project

1

distributed architecture, competitive cost, easy operation, strong tability

Compare with professional surveillance, it is more simple, front-end camera supports storage function(Max support 128GB), Middle-end can manage and control miniaturied system by PC CMS software and alarm receiving center. Back-end will master control by server and PC.
This structure is competitive in cost, and it is easy in operation, and also have a strong stability.

2

Easy install

The front-end needs only a network cable or Wifi, plug in then finish installation, it can save you lots of troule in wiring installation. The back-end installation only needs to build up a server and a PC computer, it is efficient.

3

super experience

terminal clients can operate, manage and view camera via app, all the PC software functions can reach in the smart phone app. APPsupport image zoom out, smart WIFI, defense and cancel defense, alarm push and video etc. The opration is something like wechat, QQ, you don't need to know to much technology.

Part 3: Civil Intelligent Camera Surveillance System Type

1

Civil hierarchical chain management Intelligent monitoring system

Based on the backend server management platform +CMS management software

2

Civil alarm center

Intelligent monitoring system

Based on the backend server management platform +Alarm center platform

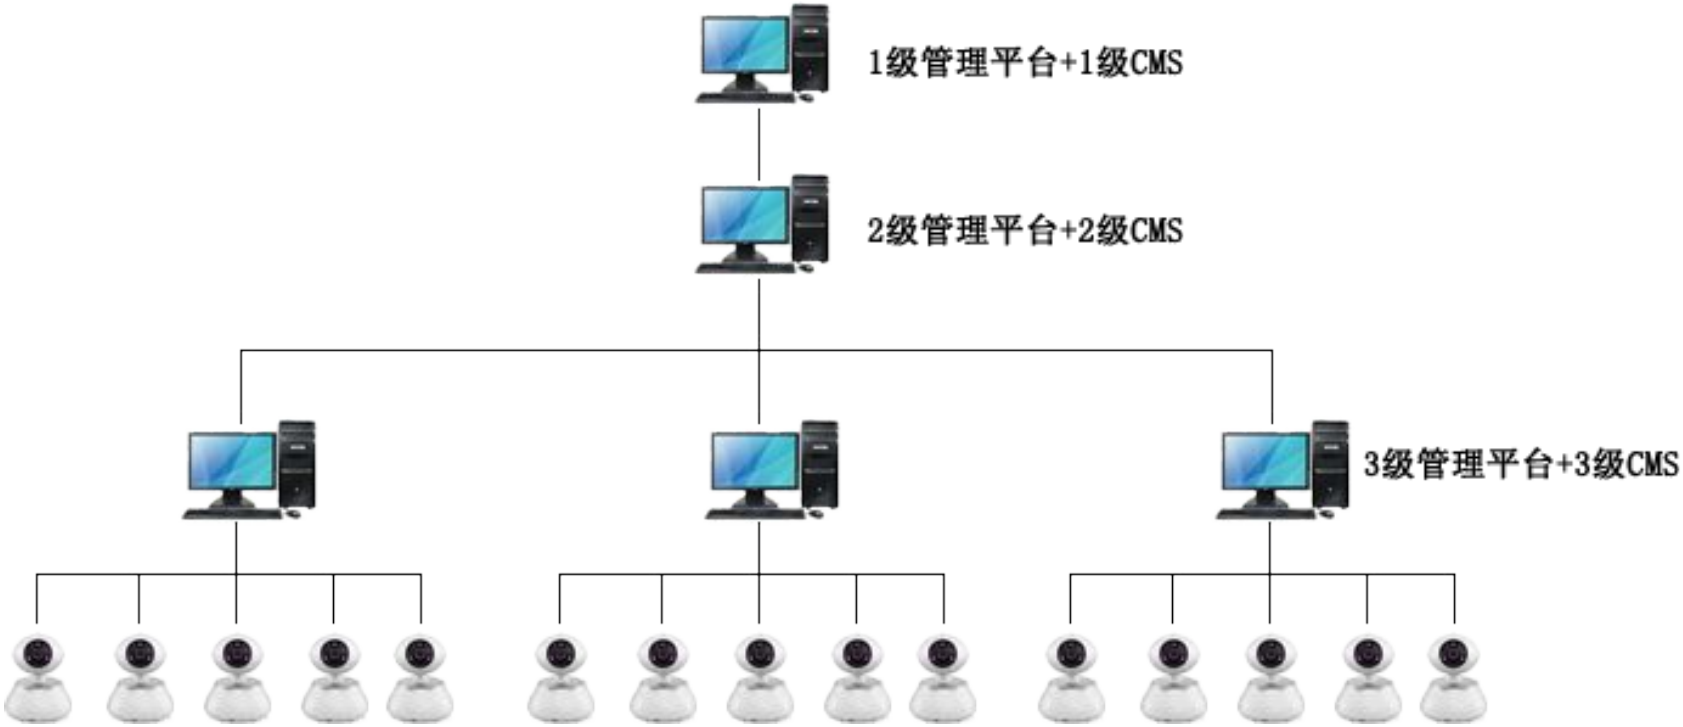
SOPOODA®

Camnoopy

1.Civil hierarchical chain management intelligent surveillance system

(1)、Based on the backend server management platform+CMS

The system is mainly used in chains, head office and branch control, total control centers and sub-centers, such as sports lottery management, administration and other chain restaurants.



System Structure

SOPOODA®

Camnoopy

1.Civil hierarchical chain management intelligent surveillance system

(2)、Functions

A、Achieve the hierarchical management, is currently the largest five accounts before permission.

SOPOODA®

Camnoopy

1.Civil hierarchical chain management intelligent surveillance system

(2)、Functions

B、Achieve unified management, including unified add cameras, unified set of CMS login user name and password on each grade PC platform.Add unlimited number of cameras.

SOPOODA®

Camnoopy

1.Civil hierarchical chain management intelligent surveillance system

(2)、Function

C、CMS to achieve the real-time monitoring, 64 cameras can be monitored simultaneously, to manage of camera recording, playback and alarm records, the real time video view controls, video picture alarm push notification when an alarm occurs.And displays the first contact, second contact, address, telephone and other information and etc.

1.Civil hierarchical chain management intelligent surveillance system

(2)、Function

D、Front-end camera configuration: Camera 1set, wireless door sensor 1 set,privacy protection remote controller 1pc to consist one small smart home camera system, for back-end management and control is very convenient.

E、APP Mobile phone software: Dedicated to end-customers, completely replace the PC software, simple,convenient, strong sense of experience.

1、Civilian classification chain management intelligient Monitoring System

(3)、The case

XX Province Sports Lottery Management Center is plan to manage the thousands of lottery betting station, by using the network
technology, it is possible for the center to see the operation of all the lottery betting station in real time .
Requirements are as belows;
A、More than 10,000 sets IP Cameras
B、a patrol officials manages 100 lottery betting, and each patrol officials have one PC computer, you can always check the 100 betting stations situation, and can only view this 100 betting cameras.
C、in order to save the costs, each betting install their own camera, alarm door sensor, alarm sensors, each Betting's security monitoring was managed by the betting station themself, such as arm and disarm the alarm settings
and other disposal night.
D、province and city level Lottery betting Management Center can install the CMS management software platform, you can view of every lottery betting live pictures.
E、the server of the entire system needs to be laid in Province Sports Lottery Management Center, all devices managed by the server
Add add the cameras, sub-rights and group management, you can start the camera, you can stop the camera working, manage the Camera 's owner information,
such as contact information, emergency contact information and etc.

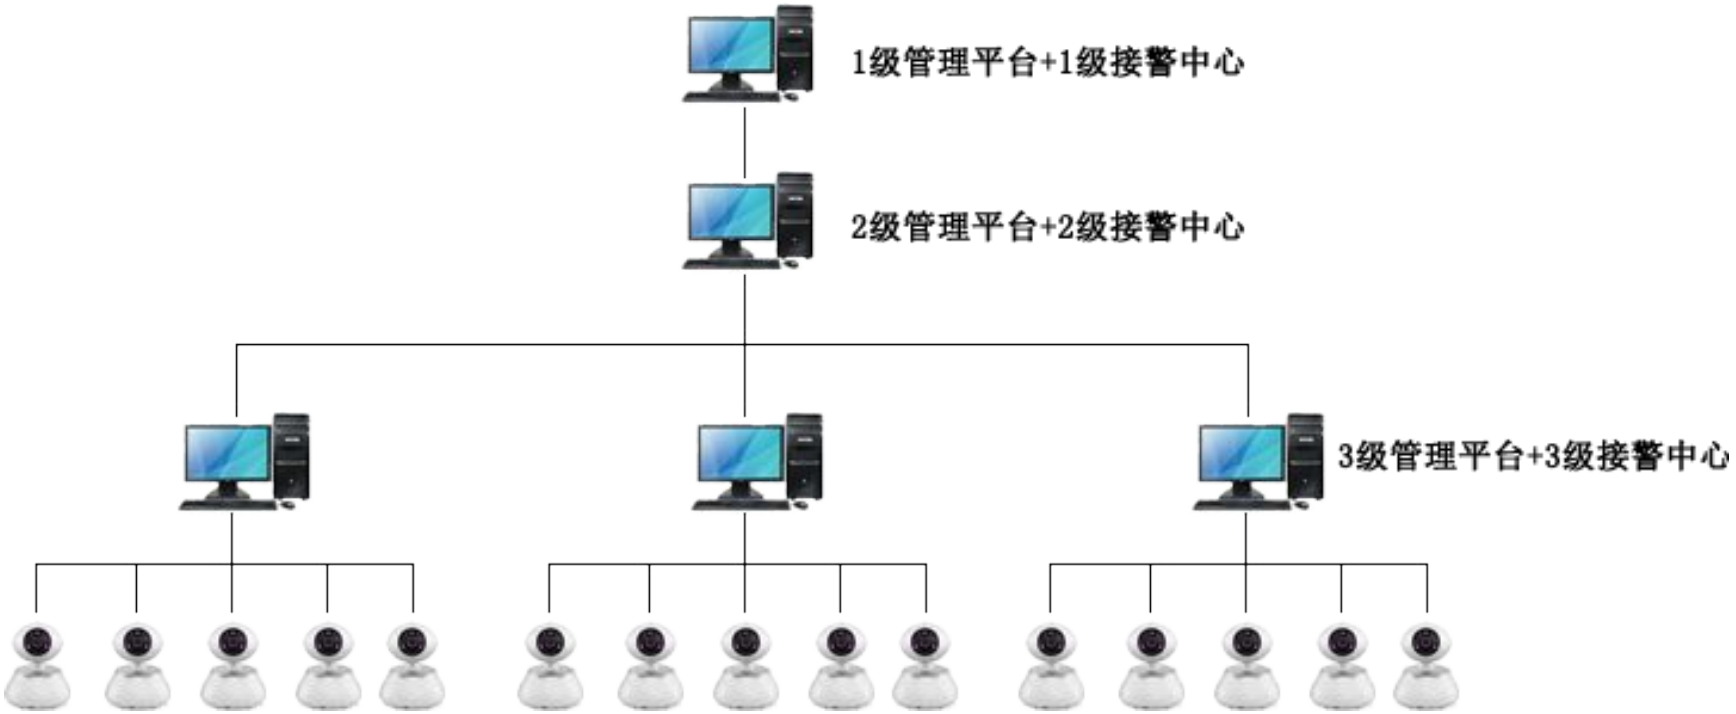
SOPOODA®

Camnoopy

2、Civil alarm center intelligent monitoring system

(1)、based on the back-end server management platform + Alarm Center platform

This system is mainly to replace the traditional alarm systems, the traditional alarm systems due to the use of traditional analog control architecture cause the False positive rate, can not see live video, very high chance that Once police intelligence tappeared, can not run to the site in time , and deal with the Awkward issues. The system is mainly applied in residential, office, retail, and for monitoring and Alarm management.



System structure

2. Civil alarm center intelligent monitoring system

(2)、Function

A, background server management platform realized the hierarchical management, currently up to 5 grade.

2. Civil alarm center intelligent monitoring system

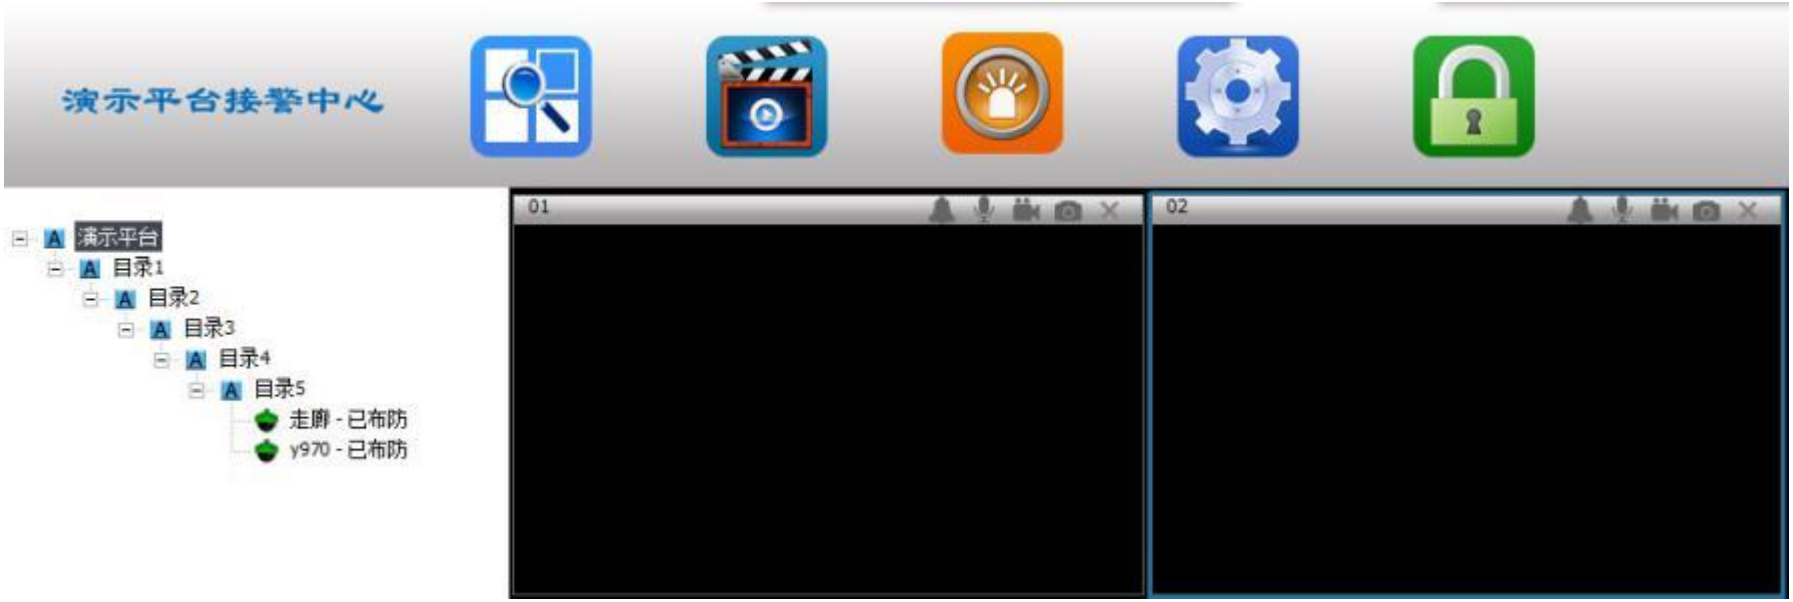
(2)、The function

B、background server management platform realized the unified management, including to add cameras, to set every PC alarm Center's login user name and password. No limitation on the number of cameras.

2、Civil alarm center intelligent monitoring system

(2)、Function

C、PC Alarm Center ‘s factory default does not display real-time images, only when alarm appeared, pops up alarm screen , can Simultaneously pop 20 screens, which allows the lowest 2 level to display screen, after pop-up screen, you can achieve record such as alarm records and show the first contact, the second contact, address, telephone and other information.



2.Civil alarm center intelligent monitoring system

(2)、Function

D、The front camera configuration: Camera 1pc, wireless door sensor 1 pair ,privacy mask remoter 1pc,
A small smart home camera system, back-end management, very convenient control .

E、APP software: Dedicated to the end customers, completely replace the PC, the function is simple,
Convenient, and have strong sense of experience

SOPOODA®

Camnoopy

2、Civil alarm center intelligent monitoring system

(3)、The Case

Changsha alarm center management system, by using the network technology, capable of receiving and processing each streets's alarm and requirements are as belows;

A、More then 5000 points front camera .

B、Changsha City is divided to districts, street, small residentia district, building, a total of five. A residential property Manages all residents in the district, one security guard manages one building, a street office manages all the residential district, once the alarms appears,the building security alarm center, the residential management center must pop up the alarm screen, timely deal with the alarms, the other levels pop-up alarm menu, to save bandwidth will not display the image screen

SOPOODA®

Camnoopy

1 Intelligent IP Camera & Software

2 Intelligent IP Camera Grading Management System

3 **Intelligent IP Camera NVR Kit**

SOPOODA®

Intelligent IP Camera NVR Kit-Wifi Kit Series

Camnoopy

The Kit Package Consists Of

1pc of 720P NVR With POE function
4pcs of Outdoor Waterproof IP Camera
1pc of RJ45 network cable with 1.5meter length
1pc of 15V Power Supply For NVR
1pc of mouse for NVR
1pc of disk and manual instruction

Wifi Kit:

Connect the camera with DC 12V power supply and get wifi through the router, connect the nvr with router by network cable. It is a simple operate kit for home use.

PS:The way for IP Camera get wifi just like our mobile do, no need cable, and NVR connect router by one cable only

SOPOODA®

Intelligent IP Camera NVR Kit-POE Series

Camnoopy

POE Kit:

Connect the camera to NVR by cable to realise plug and play suitable for home and shops.

PS: just like our telephone, insert the telephoneline to start communication with easy and safe operation

This POE Kit Package Consists Of

1pc of 720P NVR With POE Function.
4pcs of Outdoor Waterproof IP Camera
1pc of RJ45 network cable with 1.5 Meter length.
4 bunches of RJ45 network cable with 20Meter length.
1pc of 15V Power Supply For NVR
1pc of mouse for NVR
1pc of disk and manual instruction
