Differences Between HTML and XHTML

HTML + XML = XHTML

Differences Between HTML and XHTML

XHTML Elements:

must be properly nested	<code><i>This text is bold and italic</i></code> <code><i>This text is bold and italic</i></code>
must always be closed	A break: <code>
</code> A break: <code>
</code>
must be in lowercase	<code><P>This is a paragraph</P></code> <code><p>This is a paragraph</p></code>
documents must have one root element	<code><html</code> <code>xmlns="http://www.w3.org/1999/xhtml"></code>

Differences Between HTML and XHTML

XHTML Attributes:

names must be in lower case	<code><table WIDTH="100%"></code> <code><table width="100%"></code>
values must be quoted	<code><table width=100%></code> <code><table width="100%"></code>
minimization is forbidden	<code><input checked></code> <code><input checked="checked"></code>

Semantic Content Markup

`<h1>`This is the most important headline`</h1>`

`<p>`This is ordinary paragraph text within the body of the document, where certain words and phrases may be ``emphasized`` to mark them as ``particularly important``.`</p>`

`<h2>`This is a headline of secondary importance to the headline above`</h2>`

`<p>`Any time you list related things, the items should be marked up in the form of a list:`</p>`

``

``A list signals that a group of items are conceptually related to each other``

``Lists may be ordered (numbered or alphabetic) or unordered (bulleted items)``

``Lists may also be menus or lists of links for navigation ``

``Cascading Style Sheets can make lists look many different ways``

``

We've gotten semantic markup!

What else do we need?!

WE NEED:

**MORE SLEEP
MORE MUSIC
MORE TEA
MORE BOOKS
MORE SUNSETS
MORE CREATING
MORE LONG WALKS
MORE LAUGHTER
MORE HUGS
MORE DREAMING
MORE ROAD TRIPS
MORE FUN
MORE LOVE**

**More
Semantics!!!**
