TEXT

No doubt that school is our second home. We spend a lot of time at school acquiring deep knowledge, which can help us to understand our life better. It plays an important role in our lives. It is here that characters and views are formed.

All school celebrations, meetings, performances and gatherings are held in the Assembly Hall. Different traditions are observed in our school. It has become a tradition to mark the Day of Knowledge on the first of September.

We learn different subjects at school. And school develops our good work and study habits. If we want to develop speaking, reading and writing skills, we ought to write spelling tests, compositions and dictations, to read more additional literature, to go on educational excursions and nature trips.

HAPPY END
