There are many interesting and noble professions. I want to be a doctor. It is an interesting profession.

I understand that it is necessary to study a lot to become a doctor. I also understand that this profession requires great responsibility because it deals with the most precious thing that a person has — with his health.

My mother and my grandfather are doctors. My grandfather is working as a surgeon in a hospital. I have been several times at the hospital and spent some time watching him working.

His main task is to operate on the people. After each operation he takes care of patients until they are recovered.

He listens very attentively to what his patients tell him. He is always kind and attentive to his patients. They feel it and believe him, and it makes his work easier. I know that he wants to see all his patients able — bodied and I notice that he is happy when his patient is recovered.

My grandfather can also help if somebody catches a cold or has a fever. My grandfather told me a lot of true stories about doctors and their profession.

I love and respect my grandfather and want to become a doctor as well.

What should I choose as my future profession?" – this is a question that every young person asks himself entering the adult world. Of course, it's not an easy thing to choose a profession out of more than 2,000 existing in the world. It's especially difficult if you like doing different things, if you have different hobbies and interests. Almost half of a person's life passes at work. So it's extremely important to make the right choice of a profession. Psychologists believe that the choice of a future profession must be in accordance with the individual's talents and abilities. In order to make the right choice you have to analyze your interests and abilities and try to understand what you'd like to achieve in your life.

For example, I like biology. I adore animals, plants, insects, and all forms of life. I spend many hours reading books about wild nature, characters and habits of animals, underwater life etc. I believe that nature is so mysterious and powerful, that it's natural to admire it and to devote all your life to its exploration.

**to become a banker or a judge, if the soul is eager to race across the vast expanses of our country in the cab of the train driver. The famous poem by Vladimir Mayakovsky "Who to be?", Written in 1928, has not lost its relevance today. The issue of choosing a future profession is given by each person. Someone else decides to school to become a sailor or a surgeon and then purposefully goes to his dream. And someone is tormented by doubts, and at 18 years old. Here, the main time to remember the wisdom sayings of the classic: "All the works are good, choose on taste!"**

**Future profession should bring joy. For, going to work, not to feel the burdens, it is necessary to love the business, which has dropped out to do. In the XXI century is very popular professions related to economics, law, social and political activities. But do not break yourself and strive**

The history of the profession: Historically, dental profession existed long before its official recognition. Only in 1810 on the territory of Russia for the first time the title "dental surgeon" was legislatively approved. During the Middle Ages science of dentistry was called "dental work" and was only a supplement to the main medical profession. Currently, the European Union has set minimum requirements for the dentist, which include a three-year higher education at the university, as well as the presence of a medical degree. ...

Mass and the uniqueness of the profession: Unique dental profession requires a high level of knowledge on the subject, treating skills and tooth extraction, as well as their prosthetics. Such work requires calmness, ability to concentrate, perseverance and direct interest in helping their patients. Dental therapist deals with all types of inspection of the mouth, put the preliminary diagnosis, it gives direction to the X-ray, as well as conducting the procedure of preparation for further oral surgery prosthetics. The issues involved in prosthetics dentist-orthopedist, whose responsibilities also include the establishment of crowns and bridges. The problems involved in bite orthodontist. If the patient requires urgent surgery, correction of defects in the jaw, tooth extraction, the treatment of such a plan provides dental surgeon.
