# ANIMALS IN DANGER

# *The problems of nature*

- .Apresent a thousand species are aimost extinct because we hunt them or damage their environment.Here are some of the aninais in danger .The World Wildlife Fund is fighting to save them.**

# *The giant panda*

**.The giant panda can live for up to 20 years , and a big male can weigh 150 kilograms .A new-born panda weighs only 125 grams and measures less than 15 centimetres . The female panda is 800 times heavier than the baby at birth and the baby is 3-4 months old before it can crawl .It is pinkish-white at birth without dark markings and the familiar black eyes.**

# *Rare animals*

**The French priest , Pierre David, was the first European to see a goant panda in China in 1869 . Today the giant panda is one of the rarest species in the world .There are perhaps only 300 of them left . It likes to live in bamboo forests , but these are slowly disappearing.**

# Who can save our planet ?

People depend on the planet , on the Sun, on animals and plants around them. People must take care of the Earth. Our nature becomes worse and worse with every new day. People destroy jungle rain forests and cut down trees to make furniture. They forget that they can't live without trees and plants, because they fill the air with oxygen . Oxygen is necessary for our breathing . We can't stay indifferent to these problems.

There are a lot of special organizations which are trying to save our nature. One of them is Greenpeace . Their aim is to help wildlife to survive , to rescue animals , to save flora and fauna, which are in danger of destruction. We must find the right way to save our land , people and animals. We must take care of ecology because we are a part of it.
