

History. Lecture 3.

What do we find in Europe ca. 1000?

- Disintegration of the early mediaeval polities (the Empire of Charlemagne, Kievan Rus' etc.).
- Feudal fragmentation
- Formation of the feudal system and seigniorial order
- The beginnings of the new urban growth (since the Roman times)
- Climatic warming and internal colonization
- New type of society

The feudal system.

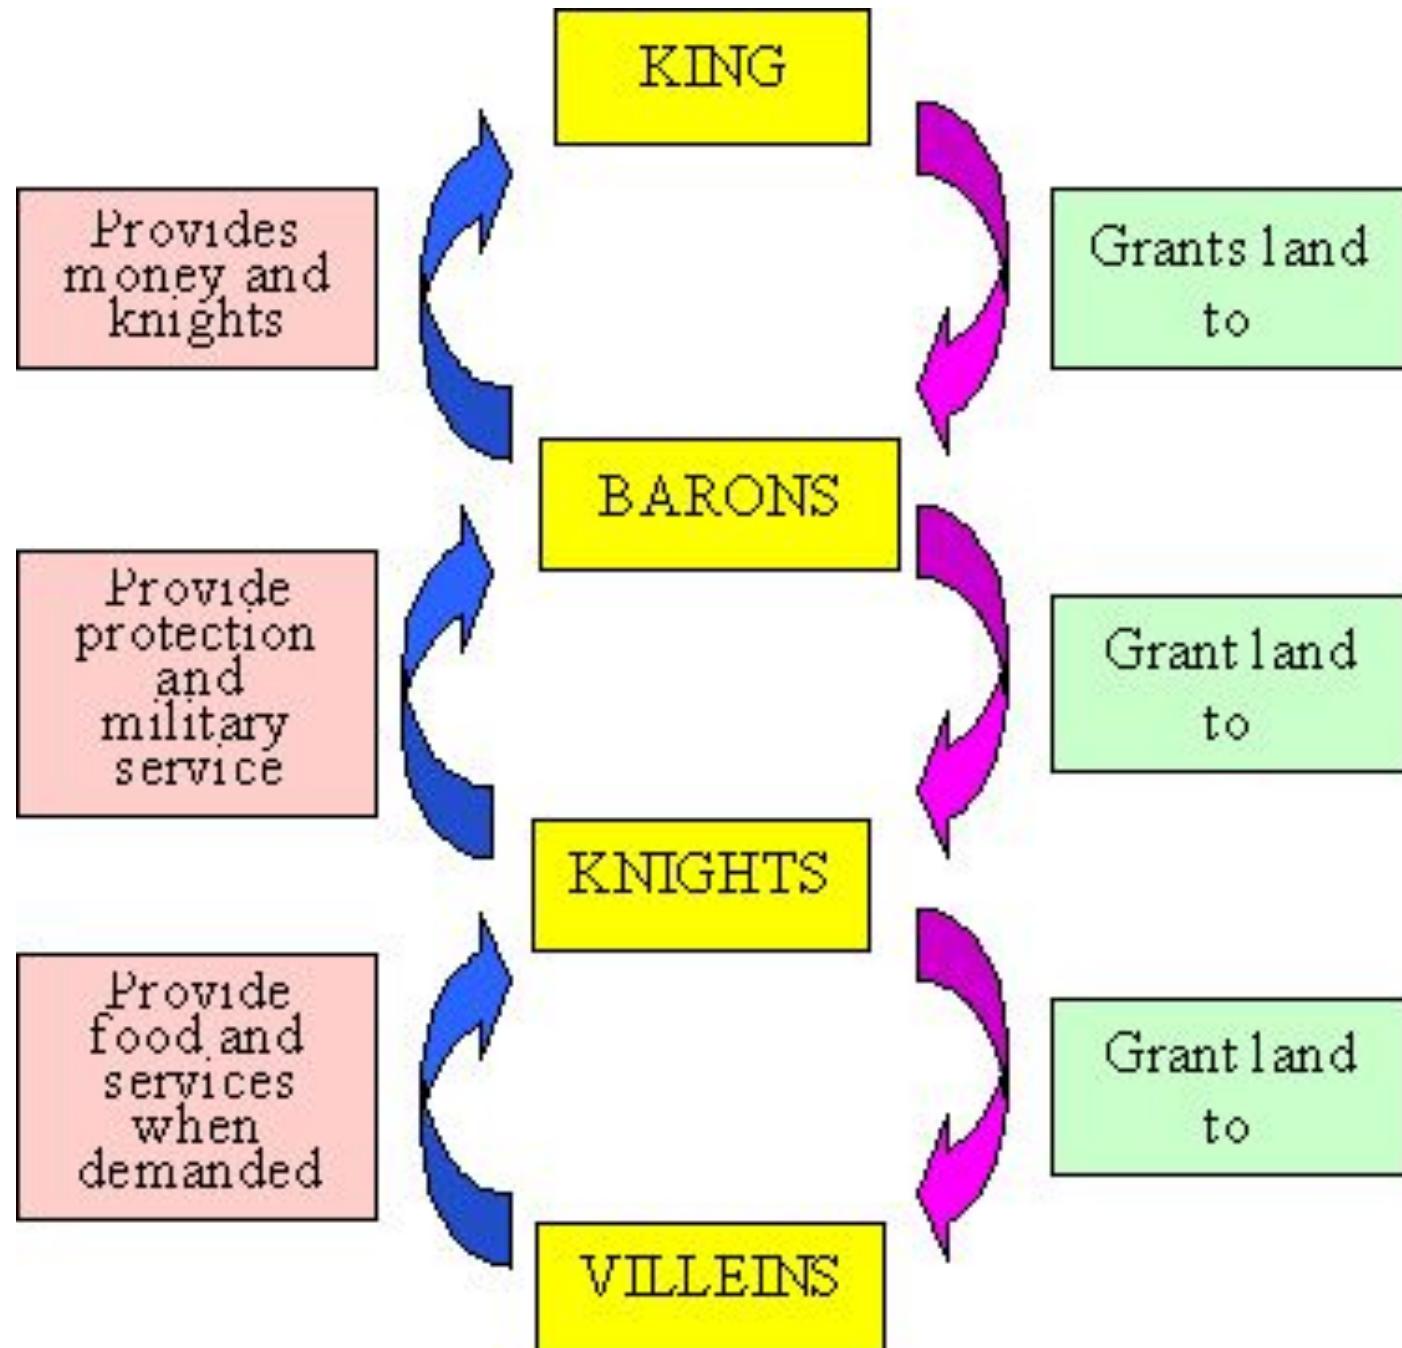

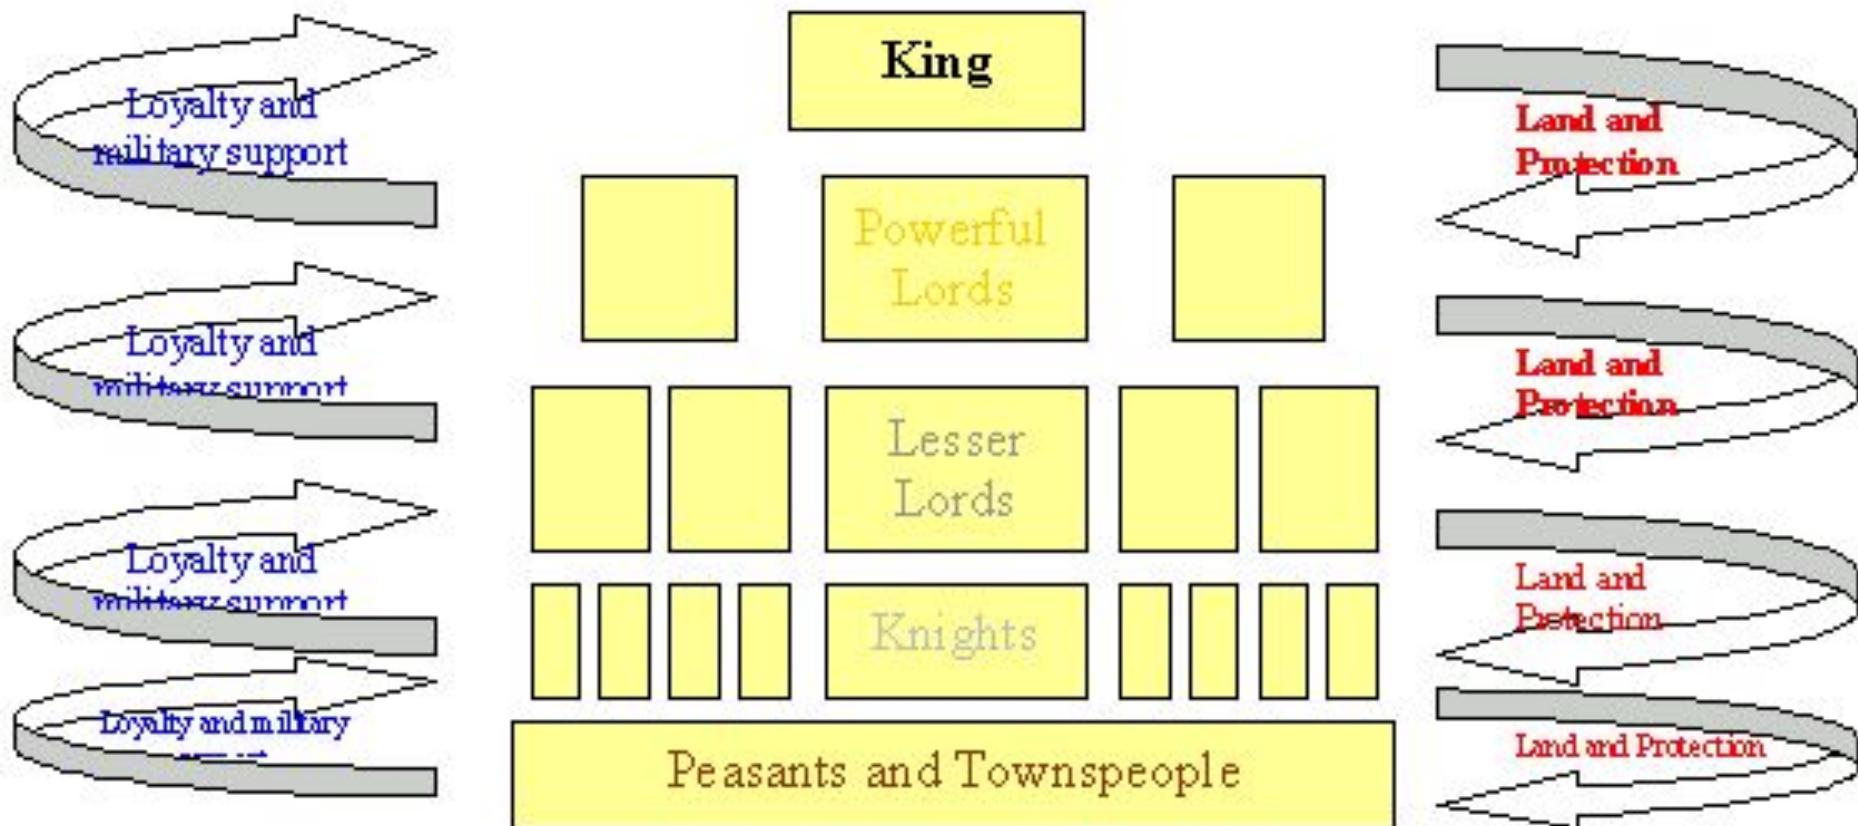

Feudal Pyramid of Power

How many knights could the feudal system afford?

Feudal Hierarchy & Obligations

The MONARCH gave land to the tenants-in-chief, who paid rent in the form of continuing loyalty and military support.

The TENANTS-IN-CHIEF (lords and bishops):

- provided fully equipped knights to serve 40 days per year in the monarch's army
- provided the king with money, advice and prayers as appropriate.

The SUB-TENANTS (knights and lesser clergy) received land from the tenants-in-chief in return for:

- fighting wars for the king or praying for his success
- guarding and protecting the person and property of the chief tenant.

The sub-tenants allocated spare land to the PEASANTRY, who paid for the use of this land by:

- working the knight's or the lord's land as well as their own
- paying taxes in the form of crops.

The author of the sources depicted by himself

The image shows a single page from an old, damaged manuscript. The paper is dark and textured, with significant water damage and staining, especially towards the bottom right. The text is written in a cursive Gothic script, divided into two columns by a vertical line. Some words and lines are illegible due to the condition of the paper. There are several small rectangular holes near the top center, likely from insects.

Modern colonialism?

The concept of continuity, or in other words the absence of a gap, between the Middle Ages and modern times can be applied to colonial history in the strict sense.
