# MULTIPLE INTELLIGENCES

LESSON OBJECTIVES:

- watch the video for specific details
- read the text for gist and specific details
- discuss the ideas

WATCH A SHORT FILM TITLED "MULTIPLE INTELLIGENCES"

- Videos:
- https://www.youtube.com/watch?v=bvRMsl8hJYU
- https://www.youtube.com/watch?v=s2EdujrM0vA

READ THE TEXT ABOUT THEORY OF M.I.

The theory of intelligences was introduced by Howard Gardner, professor of at Harvard University in 1983. According to his theory the traditional notion of intelligence is too limited. Instead of this, Dr. Gardner proposes eight different intelligences. This approach may be especially interesting for you if you are a teacher, because it may seem impossible to teach to all the students in the same way. It is very important to know what type of intelligence your students have. Different students have different pace in learning, different interests and different ways of remembering information. The theory of multiple intelligences was introduced by Howard Gardner, professor of at Harvard University in 1983. According to his theory the traditional notion of intelligence is too limited. Instead of this, Dr. Gardner proposes eight different intelligences. This approach may be especially interesting for you if you are a teacher, because it may seem impossible to teach to all the students in the same way. It is very important to know what type of intelligence your students have. Different students have different pace in learning, different interests and different ways of remembering information. People have different types of intelligence, but strength in one area does not mean weakness in another. There are a lot of different tests for identifying the person's type of intelligence. Testing which traditionally is accomplished through print, may be handled by electronic media. Media are better able to assess learners' visual skills than are print media and can be used to assess learner performance in realistic situations.
Here are types of intelligence G.Hardner suggested:

TYPES OF INTELLIGENCES

Linguistic intelligence - "word smart"

Logical-mathematical intelligence - "number/reasoning smart"

Spatial intelligence - "picture smart"

Bodily-Kinesthetic intelligence - "body smart"

Musical intelligence - "music smart"

Interpersonal - "people smart"

Intrapersonal intelligence - "self smart"

Naturalist intelligence - "nature smart"

TASK 1. WRITE THE QUESTIONS TO THE SENTENCES

- The theory of intelligences was introduced by Howard Gardner at Harvard University in 1983. (what, who, when, where).

- Dr. Gardner proposes eight different intelligences. (How many)

- It is very important to know what type of intelligence your students have. (why).

2. MATCH 'INTELLIGENCES' TO WHAT THEY REFER TO

1	Spatial	A	Seeing relationships between symbols and actions
2	Bodily-kinaesthetic	B	Communicating well and being good with languages
3	musical	C	Understanding the emotions and needs of others
4	Linguistic	D	Visualising space in the mind
5	Logical-mathematical	E	Singing, playing or composing music
6	Interpersonal	F	Understanding the natural world
7	Intrapersonal	G	Using your body to solve problems or create something
8	Naturalistic	H	Understanding your own emotions and needs
