

Baseball

# History of baseball

The first mention was at the end of the 18th century. The game was first played with homemade equipment and known as 'Baste Ball'.

# Rules

The game is played between two teams that take turns playing attack and defense.

The goal of the game is to score more points/runs than the opposing team. A point is scored when a player of the attacking team runs through all the bases.

- *If a player with a bat(Batter) hits the ball, then he must run to the next base. Players can run only when the ball is not on the base.*

# Baseball is an Olympic sport

Baseball has been included in the Olympics program since the 1992 Olympics. But from 2012 to 2020 Baseball was removed from the Olympic Games.

At the last Games Japanese athletes won gold medal.

# Baseball in Russia

Baseball is not popular in Russia. Perhaps because of the low speed of the game.

It is difficult to start playing baseball in Russia. There are very few baseball grounds and it is very expensive to buy equipment.

# Equipment
