## • **Feature of this watch**

- **Personalisation** - buying smart watch from Apple, you can choose the color of the case, strap and buckles options. This allows you to make this product an incredibly stylish, because you can use them to emphasize their individuality and uniqueness.
- **The complex sensors** - Apple Watch equipped with a device that allows a smart clock to respond to the user's movements. Furthermore, the device can read pulse holder. Another advantage of the presence of complex sensors is that they help to monitor the implementation of a number of sport activities.
- **Support for a variety of applications** - an important advantage of the smart watch is the availability of support for third-party applications. Thus, Apple Watch will allow you to make calls, send messages, navigate the terrain and watch out for the general state of the body, because they determine not only the pulse, and temperature gadget owner.
- **Compatible with Apple Pay** - Apple company has created a unique payment system. Now every user can make purchases count for the purchased goods or services with one flick of the wrist in the truest sense of the word.
