

A photograph of a forest stream with mossy rocks and a fallen log. The water is flowing over the rocks, creating small cascades. The surrounding forest is dense with green foliage.

problems**

**ENVIRONMENTAL
PROBLEMS**

How to protect
our nature?

MUST WE CARE

FOR

ENVIRONMENT?

- I THINK WE SHOULD TAKE CARE OF TREES, BABY TREES, ANIMALS,
- I AM WORRIED THAT TREES ARE CUT DOWN/ ANIMALS ARE KILLED/ LITTER ARE THROWN AWAY IN FORESTS/WATER IS POLLUTED/ THE AIR IS POLLUTED/THE EARTH IS SPOILED/ THE BIRDS ARE DISTURBED/THE NATURE IS DESTROYED.

- We must protect our nature
- We should take care of nature by planting baby-trees at school yard
- We should care for our countryside by throwing garbage in bins
- Recycling is a good idea for protecting nature

0) We ought to put our litter in the bin.

- Don't throw away garbage in the streets!
- Don't leave fire in the forests!
- Don't disturb animals and birds!
- Don't cut down baby –trees!
- Pick up plastic bottles around your place!
- Clean up parks in your hometown!

Respect your
nature
