Tell-tale letdown: Poe visitor again a no-show

For second time in 60 years, visitor stays away; other fans continue roses-and-cognac ritual

BALTIMORE — Telltale hearts beat with anticipation during a rainy, midnight dreary and beyond, hoping the mysterious visitor to Edgar Allan Poe's grave would return after a one-year absence.

But once again, the unknown person who for decades has left three roses and a half-empty bottle of cognac at Poe's grave on the anniversary of the writer's birth failed to appear Wednesday, fueling speculation that he may have died.

Four impostors came and went overnight. The real one never showed. Around 5 a.m., the dozen Poe fans who were left began to wonder if the eerie ritual is indeed nevermore, so they walked to Poe's tombstone and performed their own tribute by leaving roses and drinking a cognac toast.

A fascinating tradition that ran for some 60 years and was never fully explained appears to have ended at the downtown Westminster Hall and Burying Ground.

"I think we can safely say it's not car trouble, and he's not sick," said Jeff Jerome, curator of the Poe House and Museum. "This doesn't look good."

Beale ciphers

Edgar Allan Poe has sometimes been suggested to be the real author of the pamphlet. He had an interest in cryptography and used it as a plot device in several of his works, most notably his short story "The Gold-Bug."

However, Poe died in 1849, long before the pamphlets were published. The references in the narrative to the Civil War, which occurred in the 1860s, also cast doubt on the Poe claims.

- *His poetry, closer than any other challenge to our complex and patient soul, is the embodiment of the royal consciousness, which with the horror looks at the inevitability of a wild chaos surrounding it from every quarter.*
