:

2016-2017

Key words :

A pair of hands, one light-skinned and one dark-skinned, are shown holding a small globe of the Earth. The globe is centered on the Americas, with North and South America visible in green and yellow, surrounded by blue oceans and white clouds. The hands are positioned at the bottom and sides of the globe, suggesting a protective or nurturing gesture.

2. **Air pollution**

5. **Fertilizers**

3. **Water pollution**

6. **Illness**

Pollution

A tall, dark industrial smokestack stands on the left side of the frame, emitting a thick, billowing plume of smoke that stretches across the top of the image. The sky is a mix of clear blue and bright, hazy yellow-orange, suggesting a sunset or sunrise. The overall scene conveys a sense of industrial activity and environmental impact.

AIR POLLUTION

Water pollution

Soil pollution

Fertilizers

Illness

People have always polluted their surroundings. But until now pollution was not such a serious problem. Automobiles and other new inventions make pollution steadily worse.

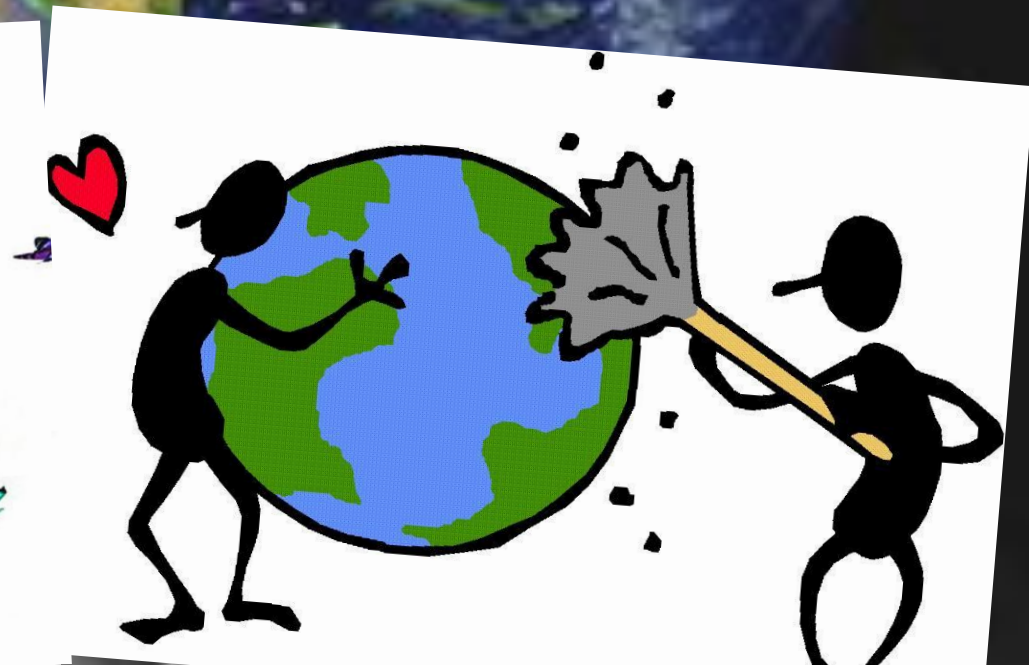

Air, water, and soil are necessary for existence of all living things. But polluted air can cause illness, and even death. Polluted water kills fish and other marine life. On polluted soil, food can not be grown. In addition environmental pollution spoils the natural beauty of our planet.

Pollution is as complicated as serious problem. Automobiles are polluting the air but they provide transportation for the people. Factories pollute the air and the water but they provide jobs for people and produce necessary goods. Fertilizers and pesticides are important for growing crops but they can ruin soil.

Thus, people would have to stop using many useful things if they wanted to end pollution immediately. Most people do not want that of course. But pollution can be reduced gradually. Scientists and engineers can find the ways to reduce pollution from automobiles and factories. Government can pass the laws that would make enterprises take measures for reducing of pollution. Individuals and groups of people can work together to persuade enterprises to stop polluting. activities.
