# **AN ENGINEER IN THE FIELD OF RADIOTECHNICS**

A radio technician is a specialist in the design, assembly, configuration and operation of radio engineering devices.

The specialist is responsible for the assembly of radio equipment and systems, is engaged in their configuration, preparation of technical documentation. Radio engineers create new models, calculate their cost, then design and produce.

АО Научно-производственная  
фирма Микран 📍

3,3 ★★★★★ [14 отзывов](#)

Томск, проспект Кирова, 51Д

# REQUIREMENTS

- Higher education (radio electronics/radio engineering);
- Work experience of at least 2 years;
- Skills in CAD solid-state modeling (Autodesk Inventor, SolidWorks), in electromagnetic modeling environments;
- Skills of working with measuring equipment (preferably in the microwave range);
- Technical English.

# STUDYING AT UNIVERSITY

# SO THAT I CAN CHANGE MY STUDIES

- I would not allow some teachers to tighten the passing of tests
- Would do less lab work
