

Most dangerous natural disasters in Lipetsk region

Presentation by Vlada
Bykova 8 B grade

We choose a research topic

We were interested in how exactly disasters occur and whether they were in the Lipetsk region, as well as for what reasons they occurred and how to prevent them. Therefore, our project is based on the study of disasters in the Lipetsk region

We form the goal and objectives of research work

Objectives are built around the research topic and for the common interests of citizens. The goals themselves are tasks that must be solved together.

Objectives and goals

- 1) Our project is relevant on a theoretical topic.
- 2) We understand the seriousness of the ongoing disasters in the Lipetsk region.
- 3) Besides we know more about the Lipetsk region.
- 4) It's useful to learn how people train emergency situations.
- 5) We are for the protection of people in the Lipetsk region.

Let's start writing the content of the research work

Research has shown that finding information about disasters in the Lipetsk region is not easy.

We draw conclusions on the study and draw up information work

Conclusion: The study showed that the Lipetsk region is located in an area where there are almost no major disasters such as tsunamis or volcanism

The End
