MAXILLOFACIAL PROSTHESIS

An ocular prosthesis or artificial eye is a type of craniofacial prosthesis that replaces an absent natural eye following birth related deformities and other causes such as accidents, infections etc.

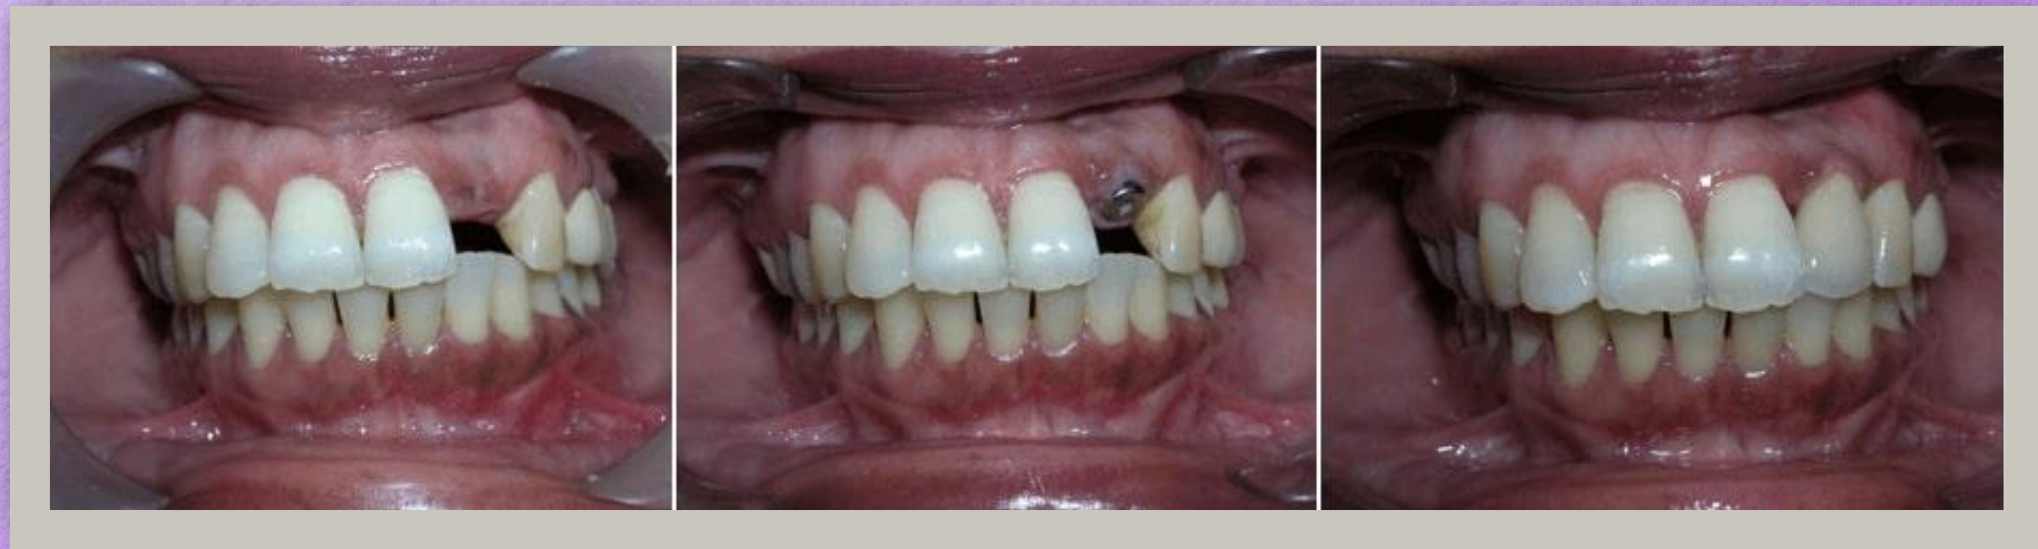

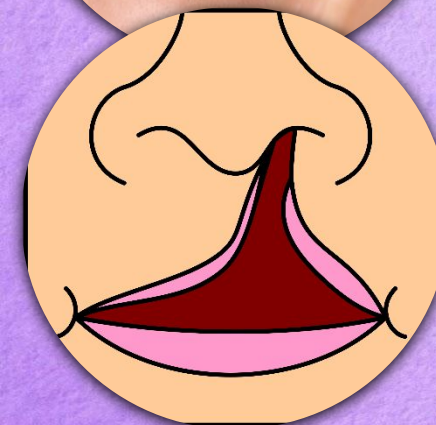

Congenital or Traumatic loss of the ear and unsatisfactory surgical reconstruction are often followed by the implant-retained auricular prosthesis as the definitive treatment.

DENTAL IMPLANTS

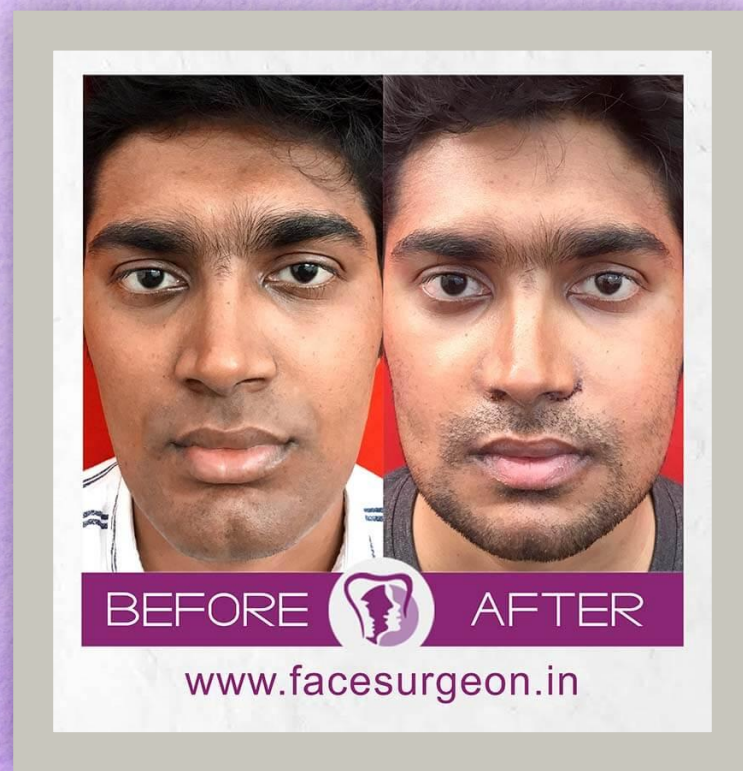

A [Dental Implant](#) is like an artificial tooth root to hold a crown or bridge. Dental implant treatment is a good restorative for those who have lost a tooth or teeth due to periodontal disease, an injury, or some other reason in India.

ORTHOGNATHIC SURGERY

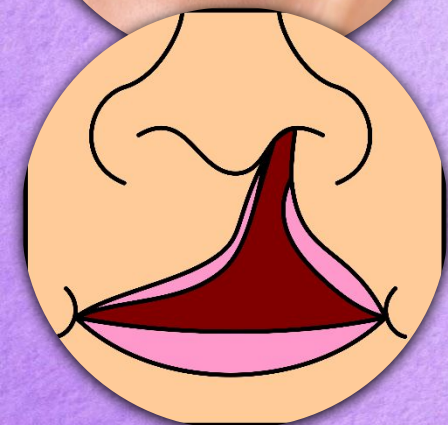

In India [Orthognathic Surgery](#) is a procedure by which the upper or lower jaw is surgically moved forward or backward as per need to attain a harmonious relationship between the upper and lower jaws and improve the appearance of the patient.

RHINOPLASTY (NOSE JOB)

Nose is the most prominent part of the human face and adds to the appeal of the face. Since each person is different, each nose is unique. In India Rhinoplasty or nose cosmetic surgery is a surgical procedure in order to improve the function (reconstructive surgery) or the appearance (cosmetic surgery) of a human nose. Rhinoplasty is also commonly called “nose reshaping” or “[nose job](#)”.

HAIR TRANSPLANTATION

Hair loss could be a primary concern for everyone. It will even bring more concern if it occurs at an unexpected phase of life and at an alarming rate. In India you might have been subjected to breaking the bank purchasing different hair care products and [hair transplant treatment](#) with absolutely little or no result to show from it whatsoever.
