About me

Travel Places

Where I would like to go

# About me...

My first name is Vladimir and second name is Serykh. I'm from in Kazakhstan, Ust-Kamenogorsk. I'm 18 years old, and I'm a student. I go to EKTSU. I left the village for the city and am now studying here.

An aerial view of Nur-Sultan, Kazakhstan, featuring a mix of modern glass skyscrapers and traditional architecture with domes. The city is surrounded by green spaces and a large central square with intricate patterns. A prominent building with a large blue dome is visible in the middle ground. The sky is clear and blue.

# My first travel...

I've traveled very small time. Twice I came to our capital in Nur-Sultan. There are a lot of skyscrapers, beautiful places, and many other interesting things. These were some of the best moments in life spent with my friends.

# Travel Places...

There are many reasons to think about traveling. For example, take our Kazakhstan. We have very beautiful nature. There are many steppes and many mountains. A wide variety of animals and forests.

# Tourism Feature

The country can be famous for its one attraction in the whole world. Well, each person has his own preferences. Someone likes warm resorts, or just relax during your vacation.

Where I would like to go...

I want to go to Japan. I am very interested in the cultural component of the country. I'd like to look at the huge cities, look at the local population. Despite the fact that this is the only country against which nuclear weapons were used, Japan is one of the most developed countries in the world.

# Conclusion

I would also like to visit Canada. There are very beautiful forest landscapes.

In conclusion, I want to say that the main thing in travel is to have fun and unforgettable memories.
