Fig. 2.2. Enterprise applications with redundant data and data dependencies

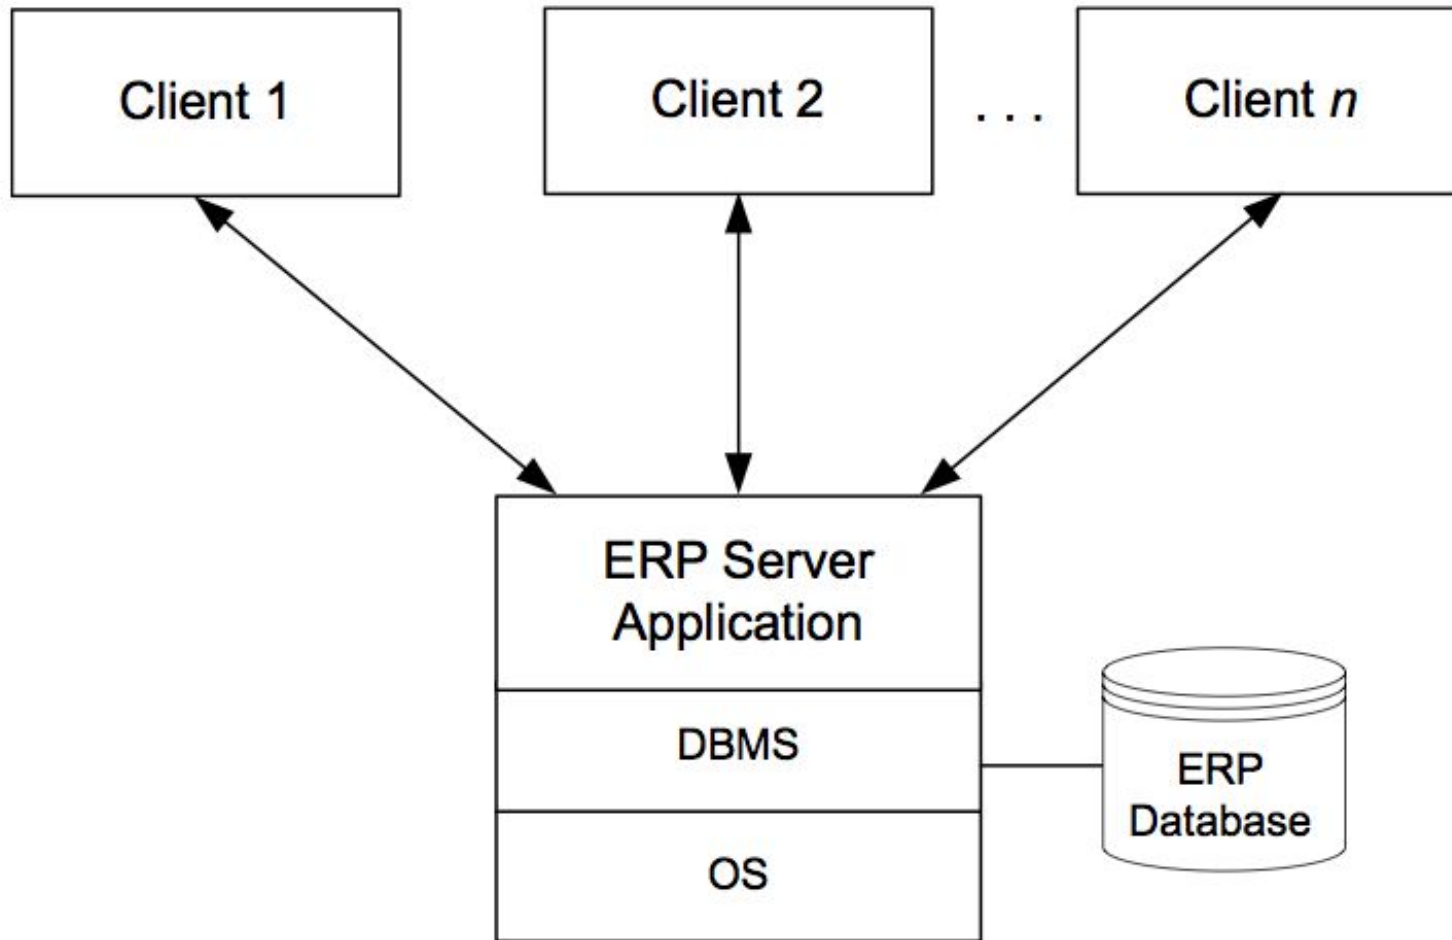

Fig. 2.3. Two-tier client-server architecture

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

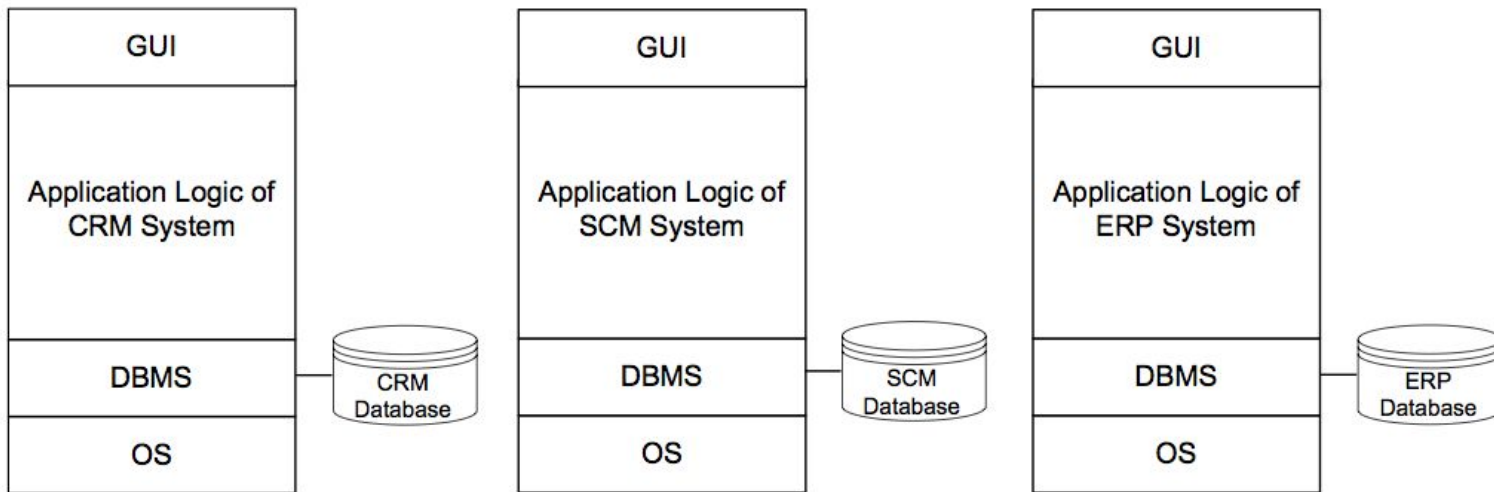

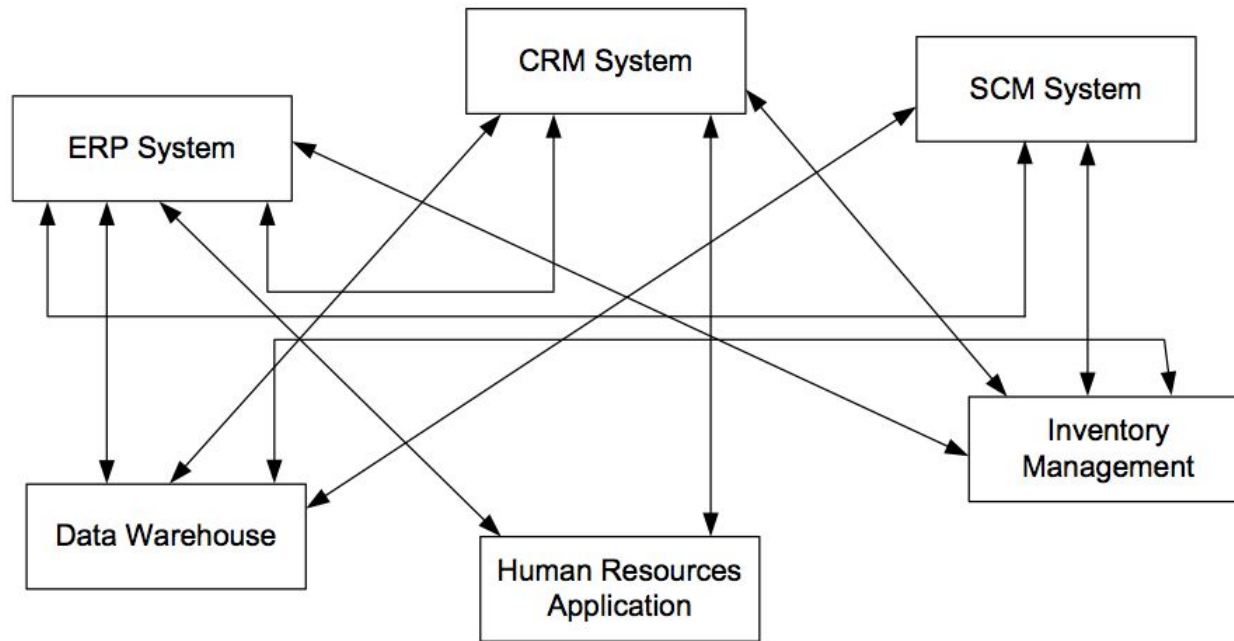

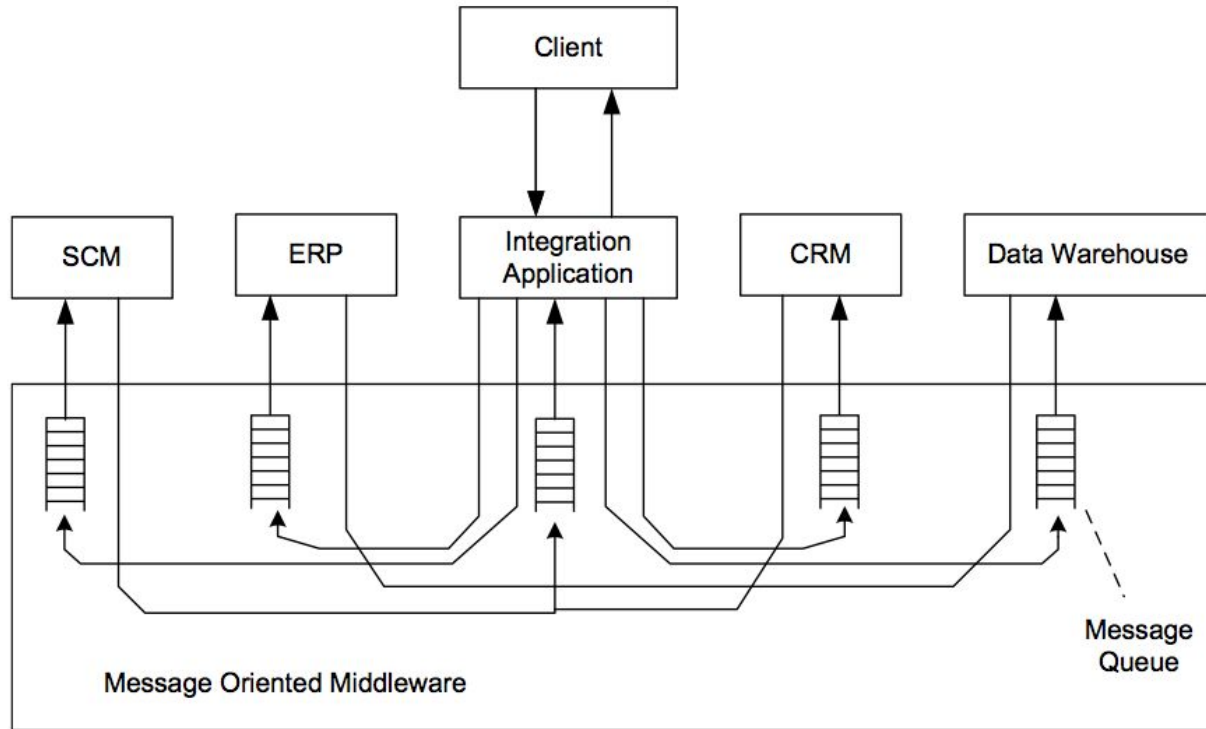

Fig. 2.4. Siloed enterprise applications

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

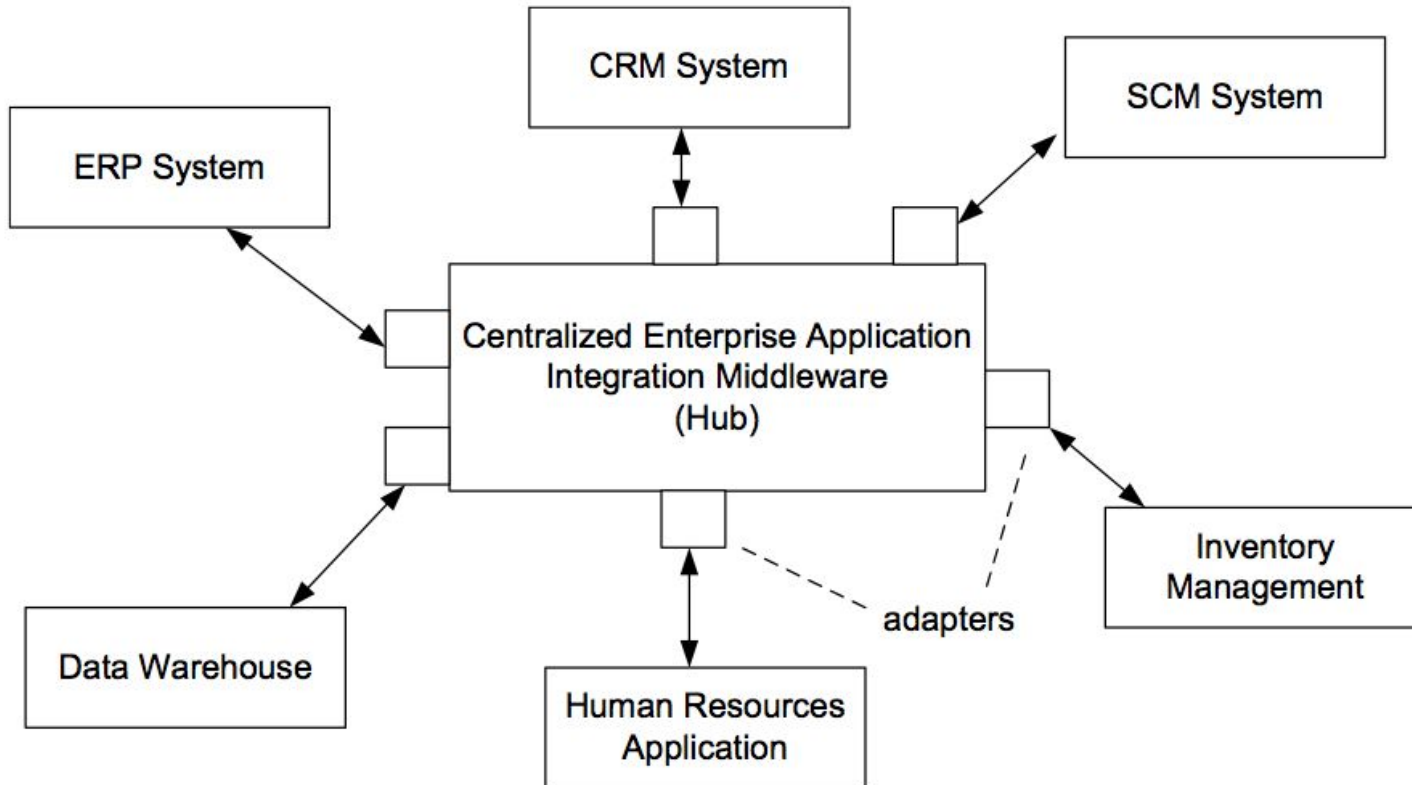

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.5. Early enterprise application integration: hard-wiring of application systems results in $N \times N$ problem

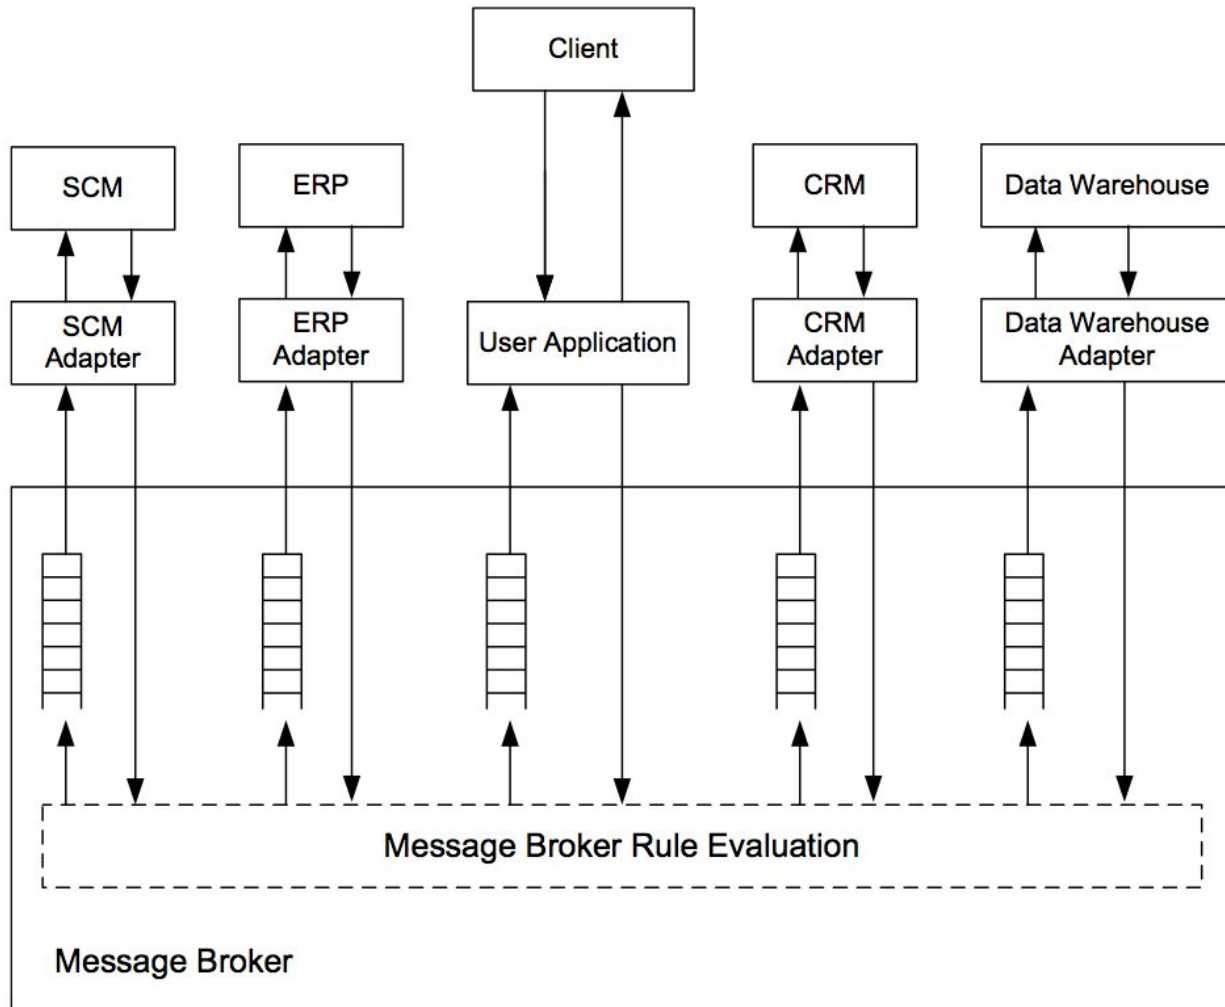

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.6. Message-oriented middleware for reliable communication between applications. Senders of messages encode receivers, and process logic is encoded in applications

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.7. Hub-and-spoke enterprise application integration architecture

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.8. Message broker with declarative rules that de-couples senders from receivers and eases response to change

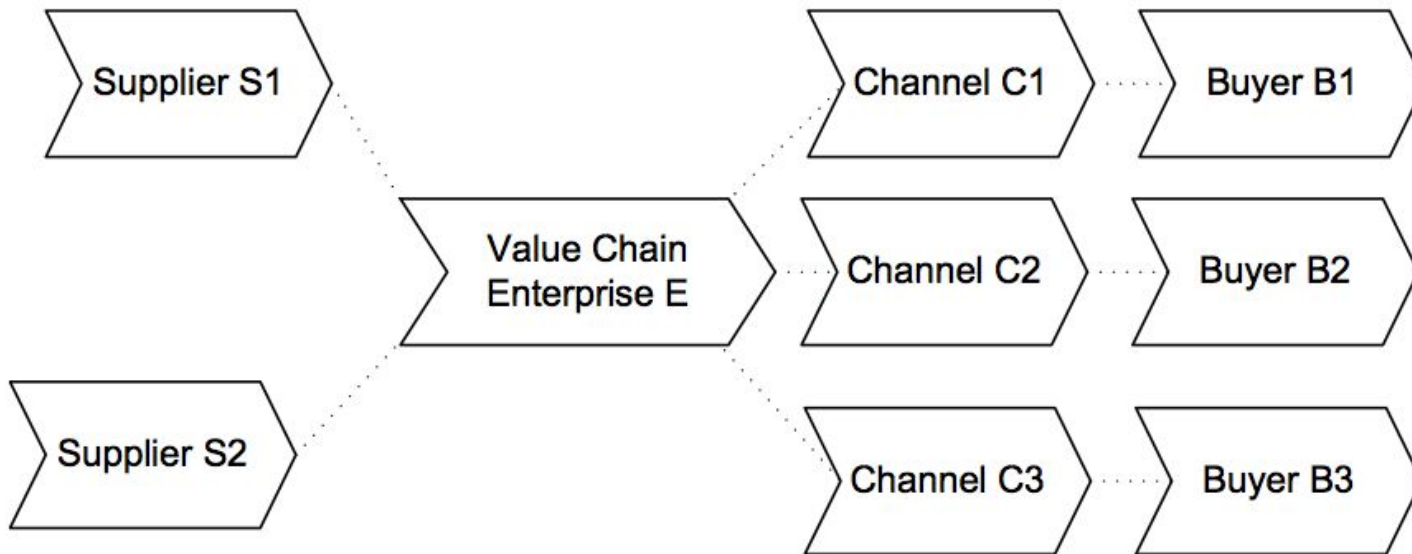

Fig. 2.9. Value system

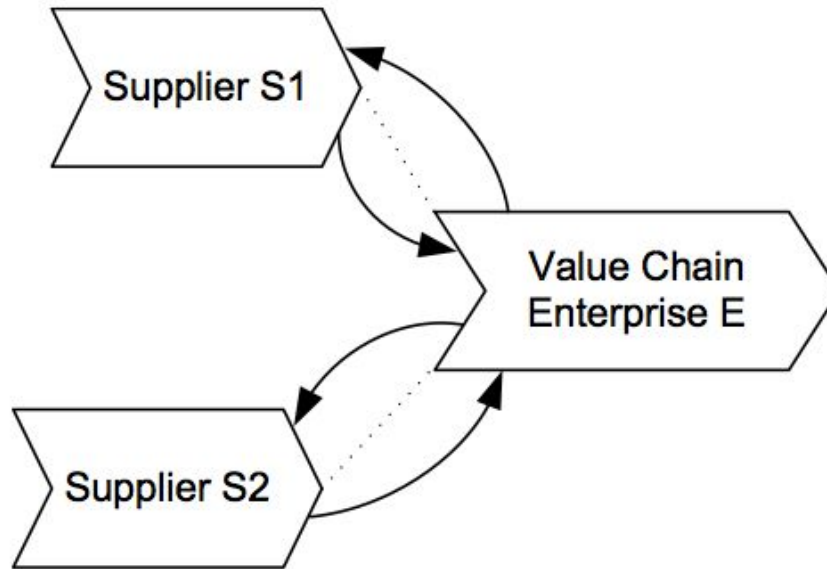

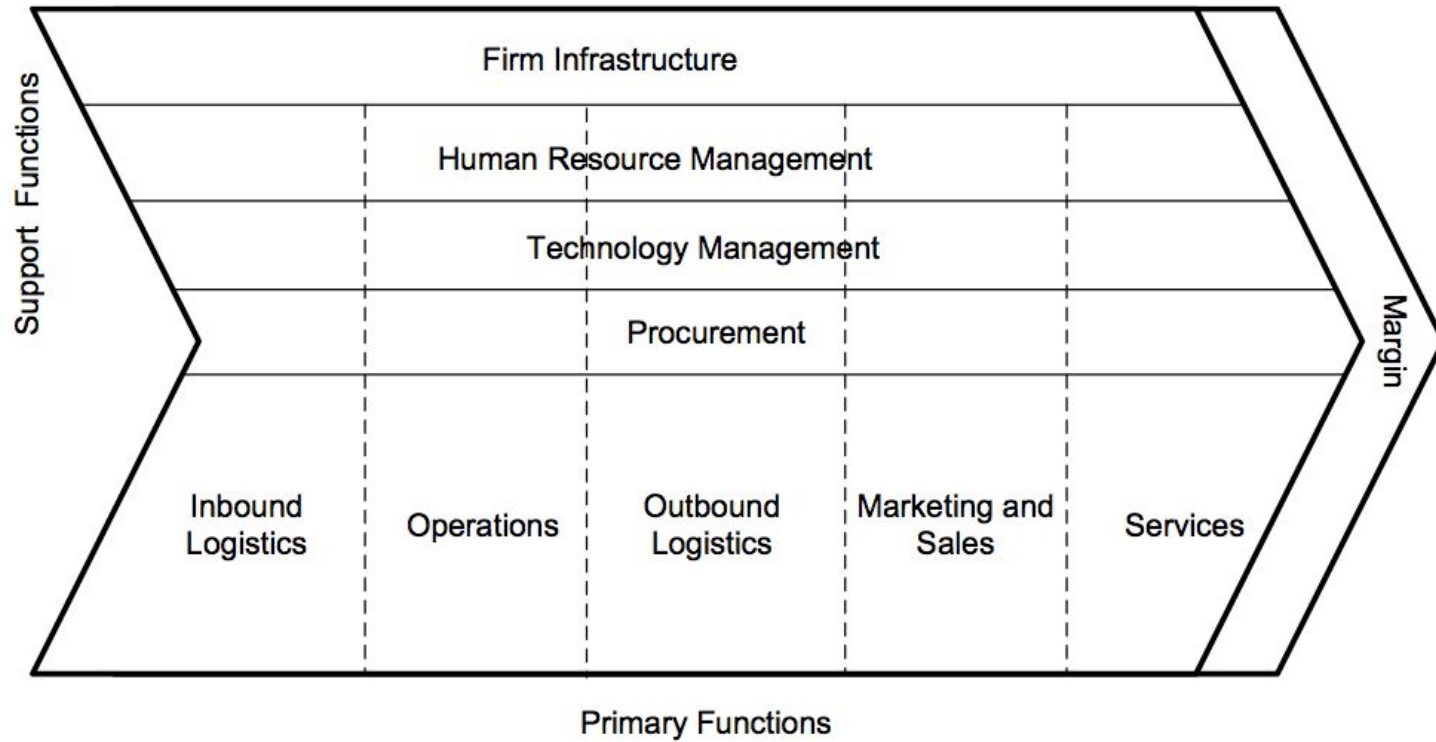

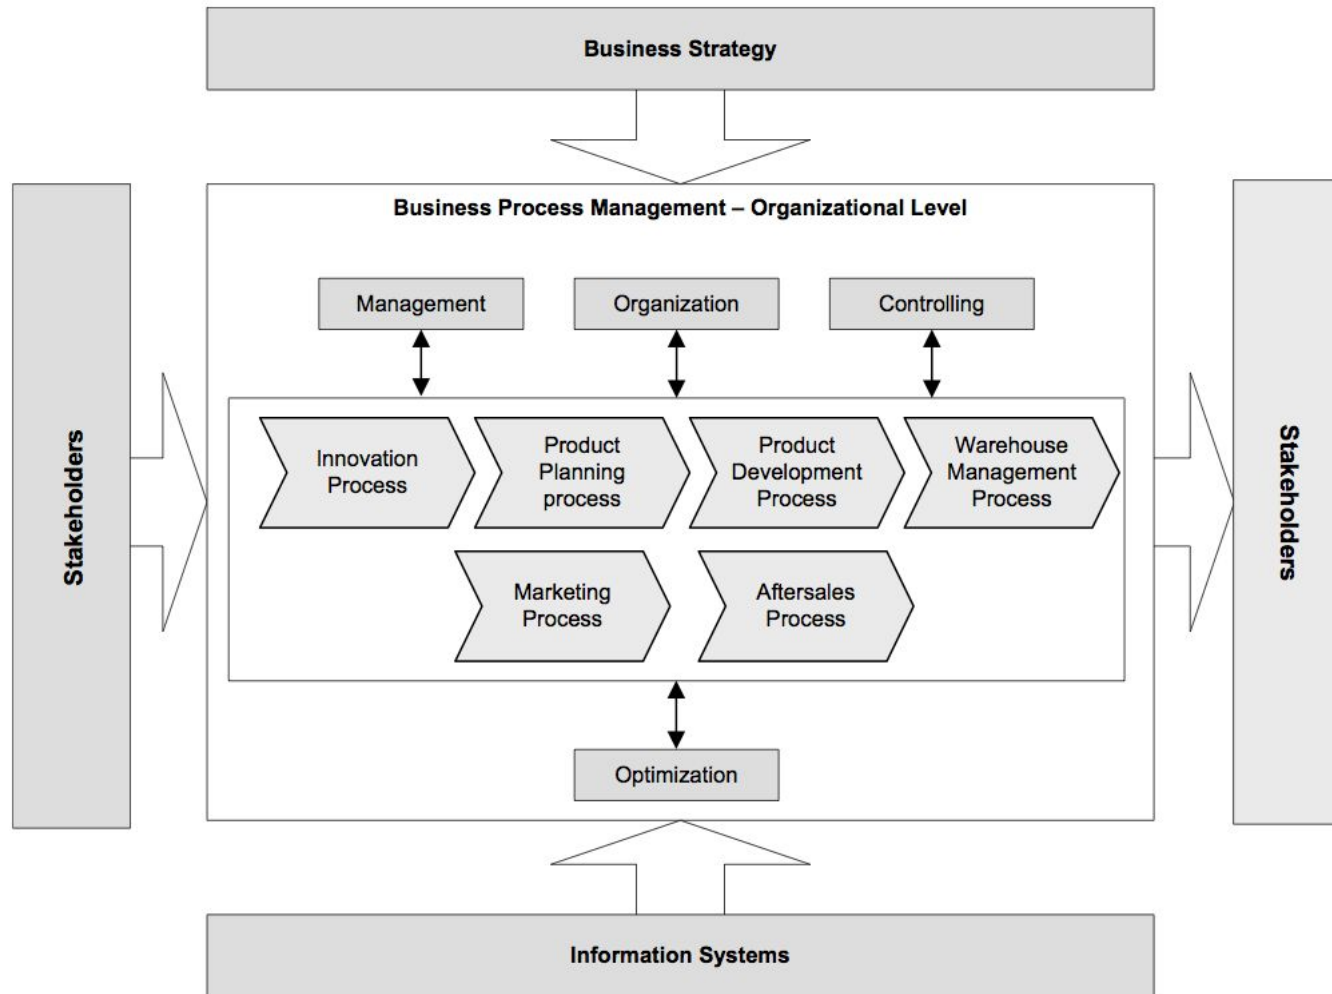

Fig. 2.10. Value system with interactions represented by arcs

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.11. Internal structure of value chain

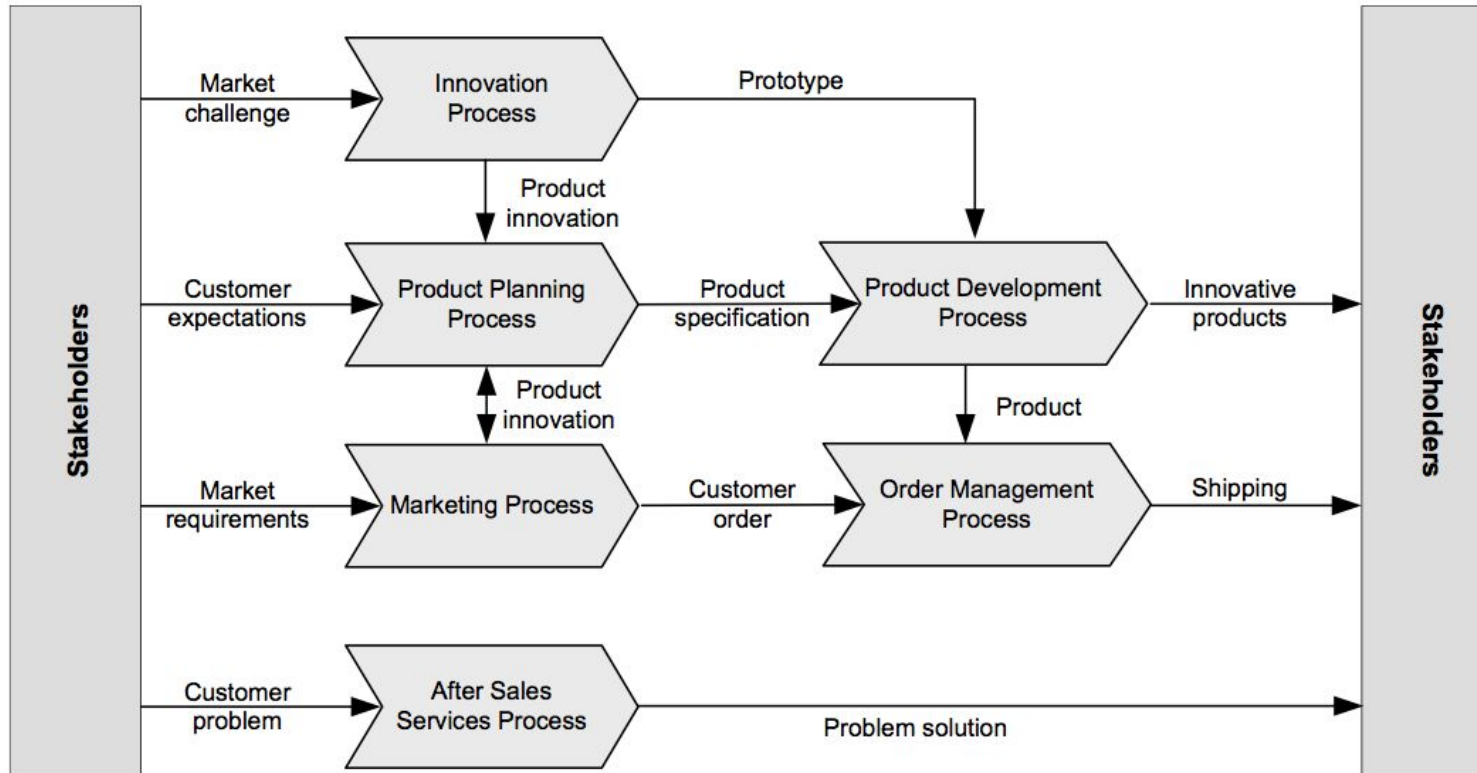

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007

Fig. 2.12. Organization-level business process management, based on Schmelzer and Sesselmann (2010)

Process Name: Product Development Process	Responsible Process Manager: Dr. Myers
From: Requirements To: Rollout	Type: Development Project
Process Inputs: Requirements Document, Product specification, Budget Plan, Prototypes	Supplier Processes: Product Planning Process, Innovation Process
Process Results: Integrated and completely tested innovative product with complete documentation	Customer Processes: Order Management Process, After-Sales Service Process

Fig. 2.13. Forms-based description of organizational business process, based on Schmelzer and Sesselmann (2010)

M. Weske: Business Process Management,
© Springer-Verlag Berlin Heidelberg 2012, 2007
