

A stack of several books with light brown covers and dark blue spines is visible on the left side of the image. The books are stacked vertically, with their edges facing right. The background is a solid, light blue color. The text "Higher medical education in Australia" is written in a bold, dark blue font, centered on the right side of the image.

Higher medical education in Australia

Why study in Australia?

Australia is actually one of the top countries to go to if you are an international student, only behind the United Kingdom and the United States.

Australia actually has some of the best colleges in the world. If you look at the list of the top 100 countries in the world, you will find that seven of them are actually found in Australia

How to Apply

There are a number of steps you must go through including:

- Deciding on your preferred course and institution.
- Submitting your application to the institution.
- Receiving and accepting a Letter of Offer.
- Receiving your electronic Confirmation of Enrolment (eCoE).
- Applying for your student visa.

The pathways to medical school

There are two types of medical degrees available in Australia:

- A five-year and six-year Undergraduate Bachelor degree
- A four-year graduate entry Bachelor degree
- Equivalent professional entry Masters level degree (MD)

What will you study?

Current medical courses integrate theory and practical components, with clinical experience incorporated from early on in the course.

While the courses offered in medicine vary between medical schools they will give you the solid basic knowledge of medicine and the training in clinical skills that you need to pursue the many career paths available in the medical profession.
