

The Greenhouse Effect

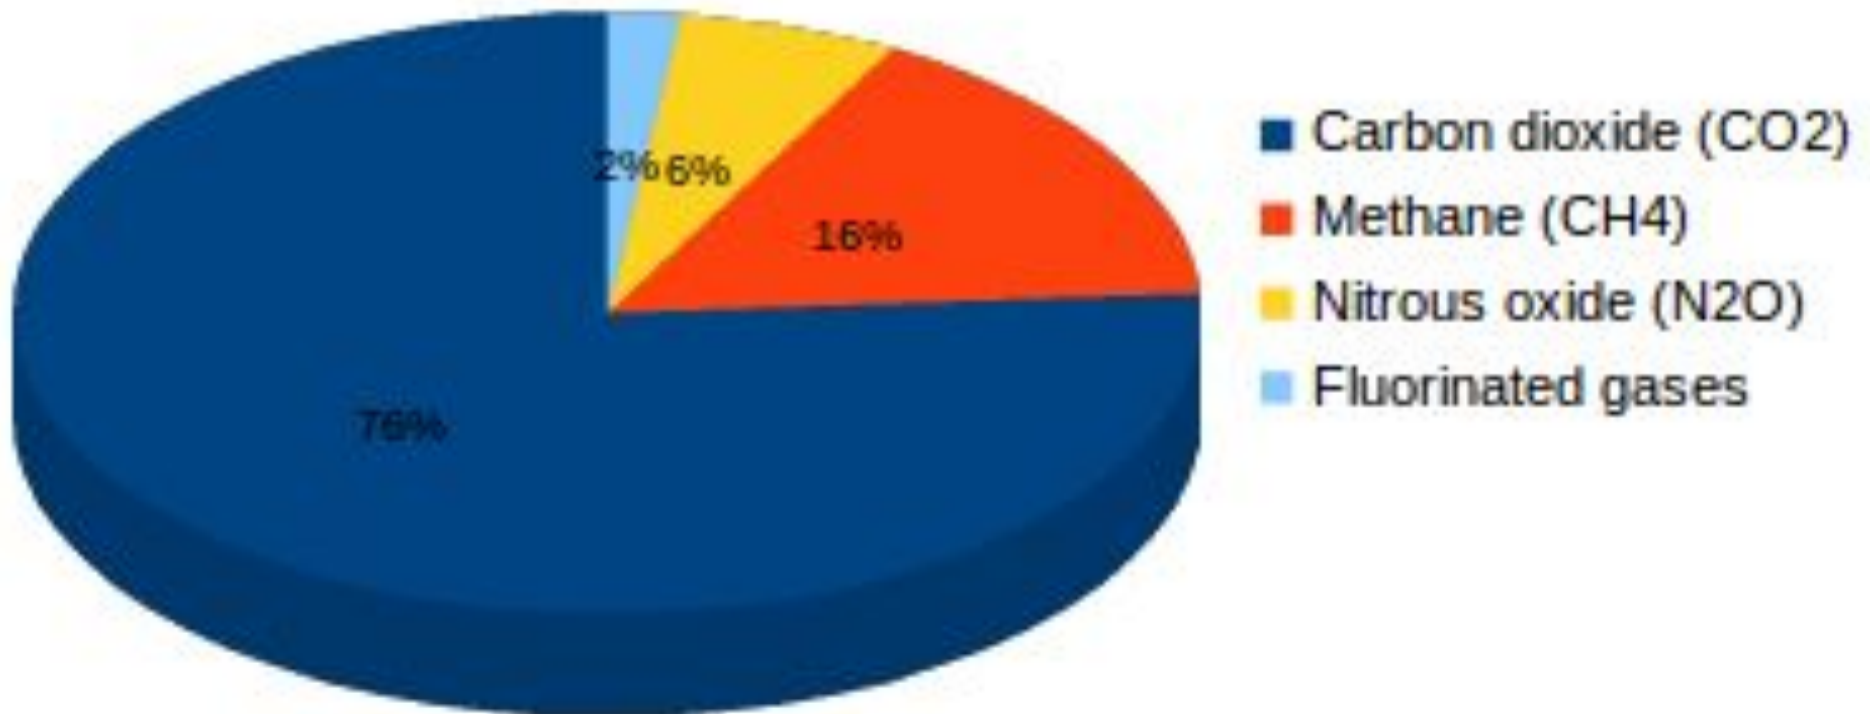

By Ivashchenkova Alina

What's the essence of this process?

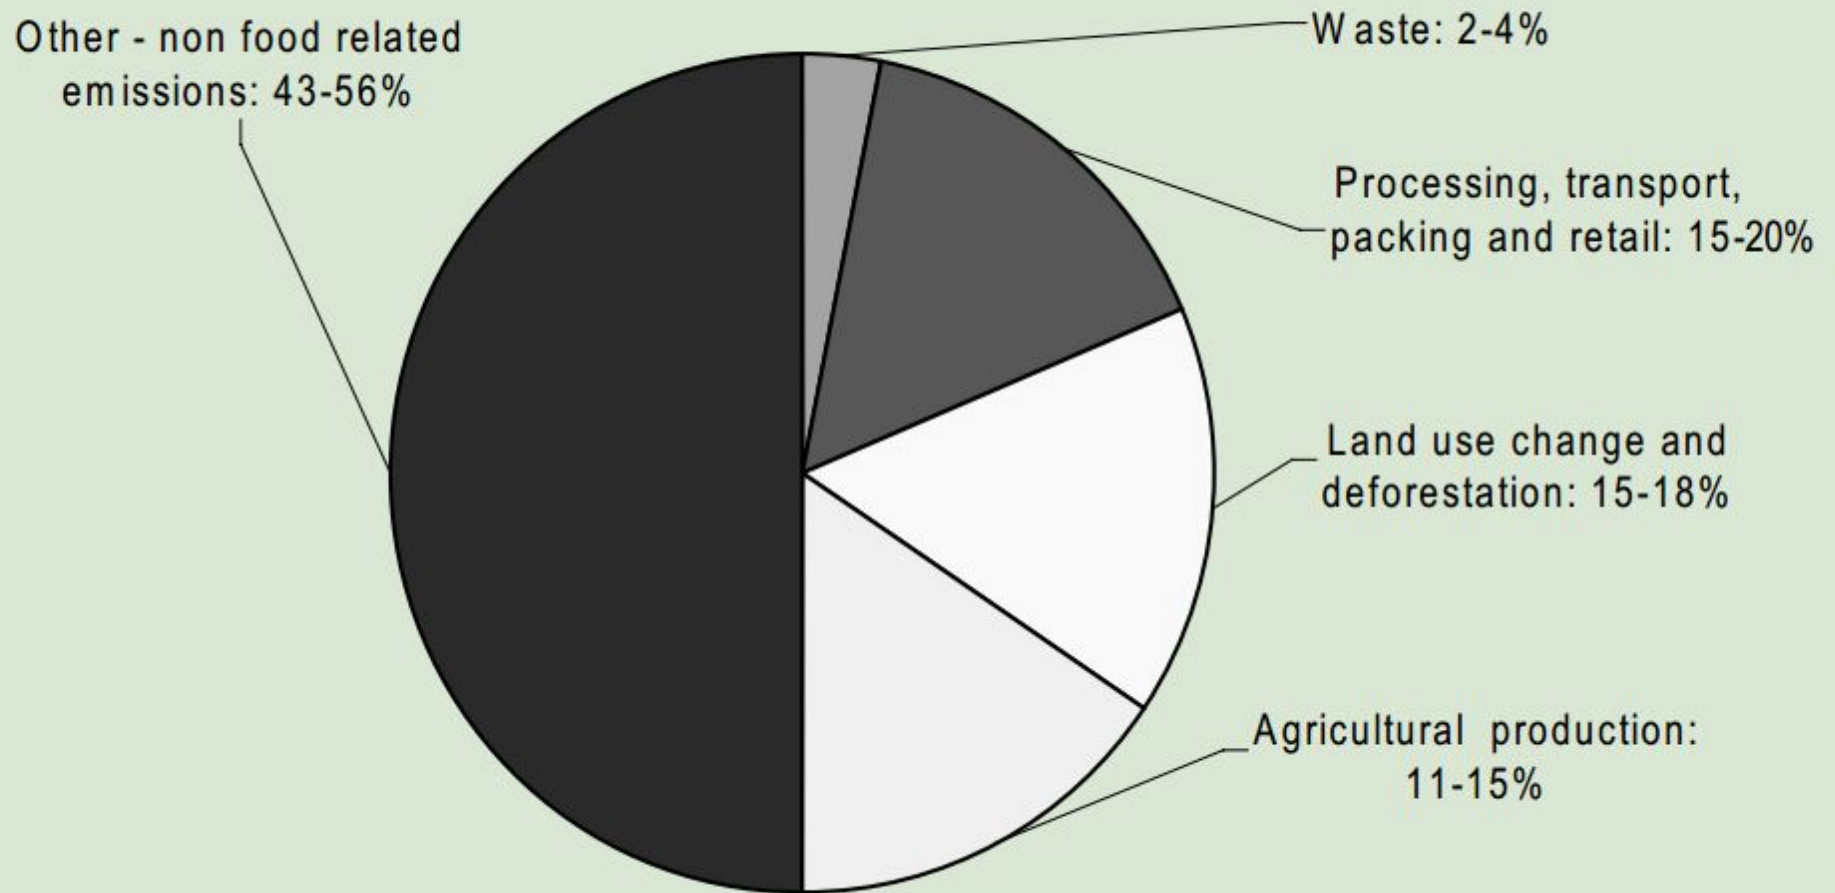

What's the cause of the greenhouse effect?

Forcing greenhouse gases - Global emissions

Where do greenhouse gases come from?

Figure 9: Contribution of the global food production system to total GHG emissions

What impact does GE have on our mankind?

- it kills plants, animals and rarely people
- causes acid rains
- the temperatures on the planet are rising

What people should do to reduce(or avoid) GE?

- reduce the use of fossil fuels
- find new ways to make our transport and factories more ecologically friendly
- use special filters to remove carbon dioxide from all the emissions
- stop cutting down trees and begin planting new ones
