h) загрязнение

SIBERIAN TIGER

- **HABITAT:**

eastern Siberia

- **SIZE :**

UP TO 320 kg

- **WHY IN DANGER:**

deforestation, hunting for fur

e.g. Siberian tigers live in eastern Siberia. They are quite big animals. They can weigh up to 320 kilograms. They are endangered species because poachers hunt for their fur and people destroy their habitat. People mustn't hunt for them and destroy their habitat.

POLAR BEAR

- **HABITAT:**

Arctic circle

- **SIZE:**

around 350–680 kg

- **WHY IN DANGER:**

global warming

THE PACIFIC WALRUS

- **HABITAT:**

Pacific Ocean

- **SIZE:**

**males can weigh up to
1,700 kilograms**

- **WHY IN DANGER:**

global warming

THE MAGELLANIC PENGUIN

- **HABITAT:**

South America

- **SIZE:**

61–76 cm,

2.7 kg and 6.5 kg

- **WHY IN DANGER:** global warming, illegal hunting

THE LEATHERBACK TURTLE

- **HABITAT:**

**worldwide in the open ocean –
Alaska, Africa, New Zealand**
