The Nicolaus Copernicus monument is a real masterpiece of sculpture situated in Warsaw, Poland. It was designed by Bertel Thorvaldsen in 1822.

The bronze Nicolaus Copernicus is holding a pair of compasses and armillary sphere, or astrolabe, an important astronomical instrument.

**Kraków**

**Olsztyn**

**Toruń**

Copernicus was an astronomer and mathematician who was born in 15<sup>th</sup> century. He is known to be the author of heliocentric model of the world.

This model describes the University with the Sun in the centre of it.

Copernicus made a lot for the science of that time. Many people from all over the world still consider him one of the humanity's greatest astronomers. He was also a talented mathematician and economist.
