

**What will be the state of  
the future?**

A futuristic, blue-toned cityscape with flying cars and advanced technology. The scene is dominated by a large, dark, multi-story building with a curved facade and glowing windows. In the background, a sleek, white flying car is visible, and another one is seen in the distance. The overall atmosphere is high-tech and futuristic, with a strong emphasis on blue and white light. The text is overlaid on the left side of the image.

## **One country on the planet Global Democracy**

**Is not quite a new form of state, is already famous, but swollen to unknown proportions. The basis of global democracy will be based on a single world government, working for a liberal and democratic principles. Many scientists think that the emergence of such a state is possible.**

**Economic and cultural globalization is in full swing and the world parliament does not seem such a crazy idea. History shows that humanity and single civilization aspire the disappearance of borders, and for the unification of all humanity one big enough common problem - it could be global warming.**

**All power in the elderly  
Gerontocracy**

**The principle of governance in which all power is in the hands of the elderly. In the future, it can take quite a creepy view.**

**We are getting closer to what human life span is greatly increased - it is possible that in such a case in the elderly is much more power and money than the young. Such a system of society has been described in many science fiction novels, such as "holy fire" Bryussa Stirling, where young people are marginalized. In this book, the most rich and powerful are the people who manages to live for hundreds years.**

**Collective consciousness  
Anokratiya**

**Type of government, which is requires for the existence of unbelievable progress: the unakratii our entire planet will rule the a single swarm , the collective human mind, uniting the consciousness of all people through telepathy or technologies. Such a mind would take a fair and correct decisions based on the collective experience and it is easy solve all the problems that will arise in the way of society. More Unokratiya involves colossal cultural and social change: still with the ability unite all of humanity into one superconscience are unlikely to we will stay the same as they were**

## **Democracy on the basis of lottery Demonarchy**

**The form of democracy when the deputies are chosen at random, for example, by of lottery. The lot may fall to anyone-just like a jury trial in the US. Deamarhii meaning that ordinary people will serve the common interests rather than their own, which should reduce the risk of corruption and political pressure.**

## **The State Corporation Corporate Republic**

**Favorite scenario writers cyberpunk novels arranged the State as a corporation, and even better-appeared on the basis of any real corporation. The main property the system - the fact that it is controlled as a real company, the board of directors and top managers Hospitals, schools in such a case are in the private sector. While such a scenario is difficult to imagine, some scientists believe that something similar can be found in human history for example the socialist countries.**

A futuristic cityscape at sunset. The sky is a mix of orange, yellow, and dark purple, with a bright sun low on the horizon. Numerous tall, spire-like buildings with pointed tops are scattered across the landscape. The buildings are illuminated with various lights, some appearing to be made of a dark, reflective material. In the foreground, there are more modern, rectangular buildings with lit windows. The overall atmosphere is one of a advanced, possibly dystopian, urban environment. The text is overlaid on the left side of the image.

**The world is ruled supercomputer  
Autocracy artificial intellect**

**If mankind will be able to create enough powerful Artificial intellect,  
For example inside the computer, it is possible that the computer will arrange the world order, which  
he will rule. On one side, the power an artificial intellect - one of the most popular scripts the  
destruction of mankind, on the other, supercomputers may be "good", solve the world's problems that  
people could not solve on their own, to coordinate and send mankind radically new ways of  
development.**

**The power of information  
Kiberkatiya**

**Form of government, based on the effective use of information.**

**The fundamental characteristic of kiberokrati- momentary transfer important information from the source of the problem for the people who are able to solve this problem.**

**This will be achieved with the help of computer programs where the fire occurs - this instantly recognize firefighters. People at kiberkratii take a minimum participation in the management and are only responsible for important decisions and cope with the most unusual problems.**

**Kiberkatiya is a comfortable and logical system interaction of the person and the state, to minimize the people factor.**

A futuristic cityscape at night, illuminated with blue and white lights. Tall, slender buildings rise into a dark sky filled with flying cars and drones. The scene is a dense, vertical urban environment with a strong emphasis on technology and advanced transportation.

**The power have the most intelligent  
Noocracy**

**Nookratiya- kind of political state based on the "priority of the human mind."  
This is the next step after the democracy more perfect form of government  
where power is at the intellectual elite, with technology and science.  
All decisions will be made as possible carefully and pragmatic.  
"The aristocracy of wise"**

**State on choice**  
**Polystate**

**is a geopolitical subject, within which there may be several of the state system is not linked to geographic boundaries. Every single person can choose which of the states belong to. How such a system might work: approximately as if you chose their mobile operator. Yes, you will have to use common roads, or even just to breathe the same air as everyone, but man can not pay taxes for possession of nuclear weapons, the fight against drugs, or something else that you do not like, and live according to the laws of the meta -state that suits you.**

## The autonomous city City-States

It is believed that the world tends not to globalization, but rather to desentralizatsii and decay: in the near future thanks to technological progress, existing states break up into small, independent city gosdarstva - is primary in the Ancient Greece.

The meaning of this only practical: everything tied to energy  
Private City will soon be more profitable to move to self.
