PROFESSIONAL SERVICES

Master Data Management is a process that connects the collection, enrichment, governance and usage of any organization's foundational master data. Since every organization has unique operational processes and practices, Stibo Systems knows how to use its decades of implementation experience to assist each customer in identifying their specific MDM requirements. Additionally, we partner with and support the leading consulting firms that provide organizations with Business Process Improvement and Organizational Transformation assistance. Together, these help to make Master Data Management execution a decisive, competitive advantage. The Stibo Systems Professional Services team is a group that is solely dedicated to the successful delivery of STEP implementations.

MDM ROADMAP CONSULTING

To compete in any market, every organization must be able to effectively manage its data. A successful MDM strategy is one that quickly delivers value through consistent, incremental functionality that unlocks additional operational capability.

IMPLEMENTATION SERVICES

We have helped hundreds of leading global companies across a wide range of industries turn data governance and the quality of their data into strong competitive advantages.

Throughout each STEP implementation project, Stibo Systems Professional Services practitioners work closely with our Delivery Partners to leverage our experience into providing real-time guidance.

It is also a continually advancing system, with constantly improving technology, features and functions. An upgrade analysis will provide any current customer with helpful information about how an upgrade would add value to their system by taking full advantage of the most recent STEP functionality.
## QUALITY DELIVERY SERVICES STEP software is a powerful tool that can be used to solve many different challenges and create opportunities for how your organization wants to, or should be, managing data. Stibo Systems' Quality Delivery Services enable our customers and partners to engage with us in building best practices for their ongoing journey with STEP.	Image / Icon
Image / Icon	## APPLICATION SUPPORT Each STEP MDM implementation provides business capabilities that are specific to an organization but these operational needs will, inevitably, change over time. Stibo Systems Application Support services can assist in the long-term growth and maintenance of your STEP MDM solution.
## STEP MDM TRAINING While Stibo Systems provides a robust training program through our Stibo Academy, there are still some instances where a more targeted level of instruction is needed. Customizable training for specific customer solutions can be created on request.	Image / Icon
