UI Integration

New Developer

- When new developer is added, we need to:
  - Create new Carrier in Billing DB

New APP

- When new developer is added, we need to:
    - Create new Resource (of type egress) under the Developer's Carrier account
    - Create a new Company in the Ejabberd server
    - Associated a "System fixed" Egress Rate Table associated with that Egress Resource
    - Create a APP-specific Rate Table

New APP User

- When new developer is added, we need to:
  - Create new Carrier in the billing DB
  - Create new Resource in type ingress under that carrier
  - Associate APP-specific Rate Table to the user
  - Create User under the "Company" within ejabberd
