Geneva talks
«Joint Plan of Action»

January 12, 2014
Clarification of technical issues

January 20, 2014
Interim agreement comes into force

Iranian nuclear program: what Iran needs?

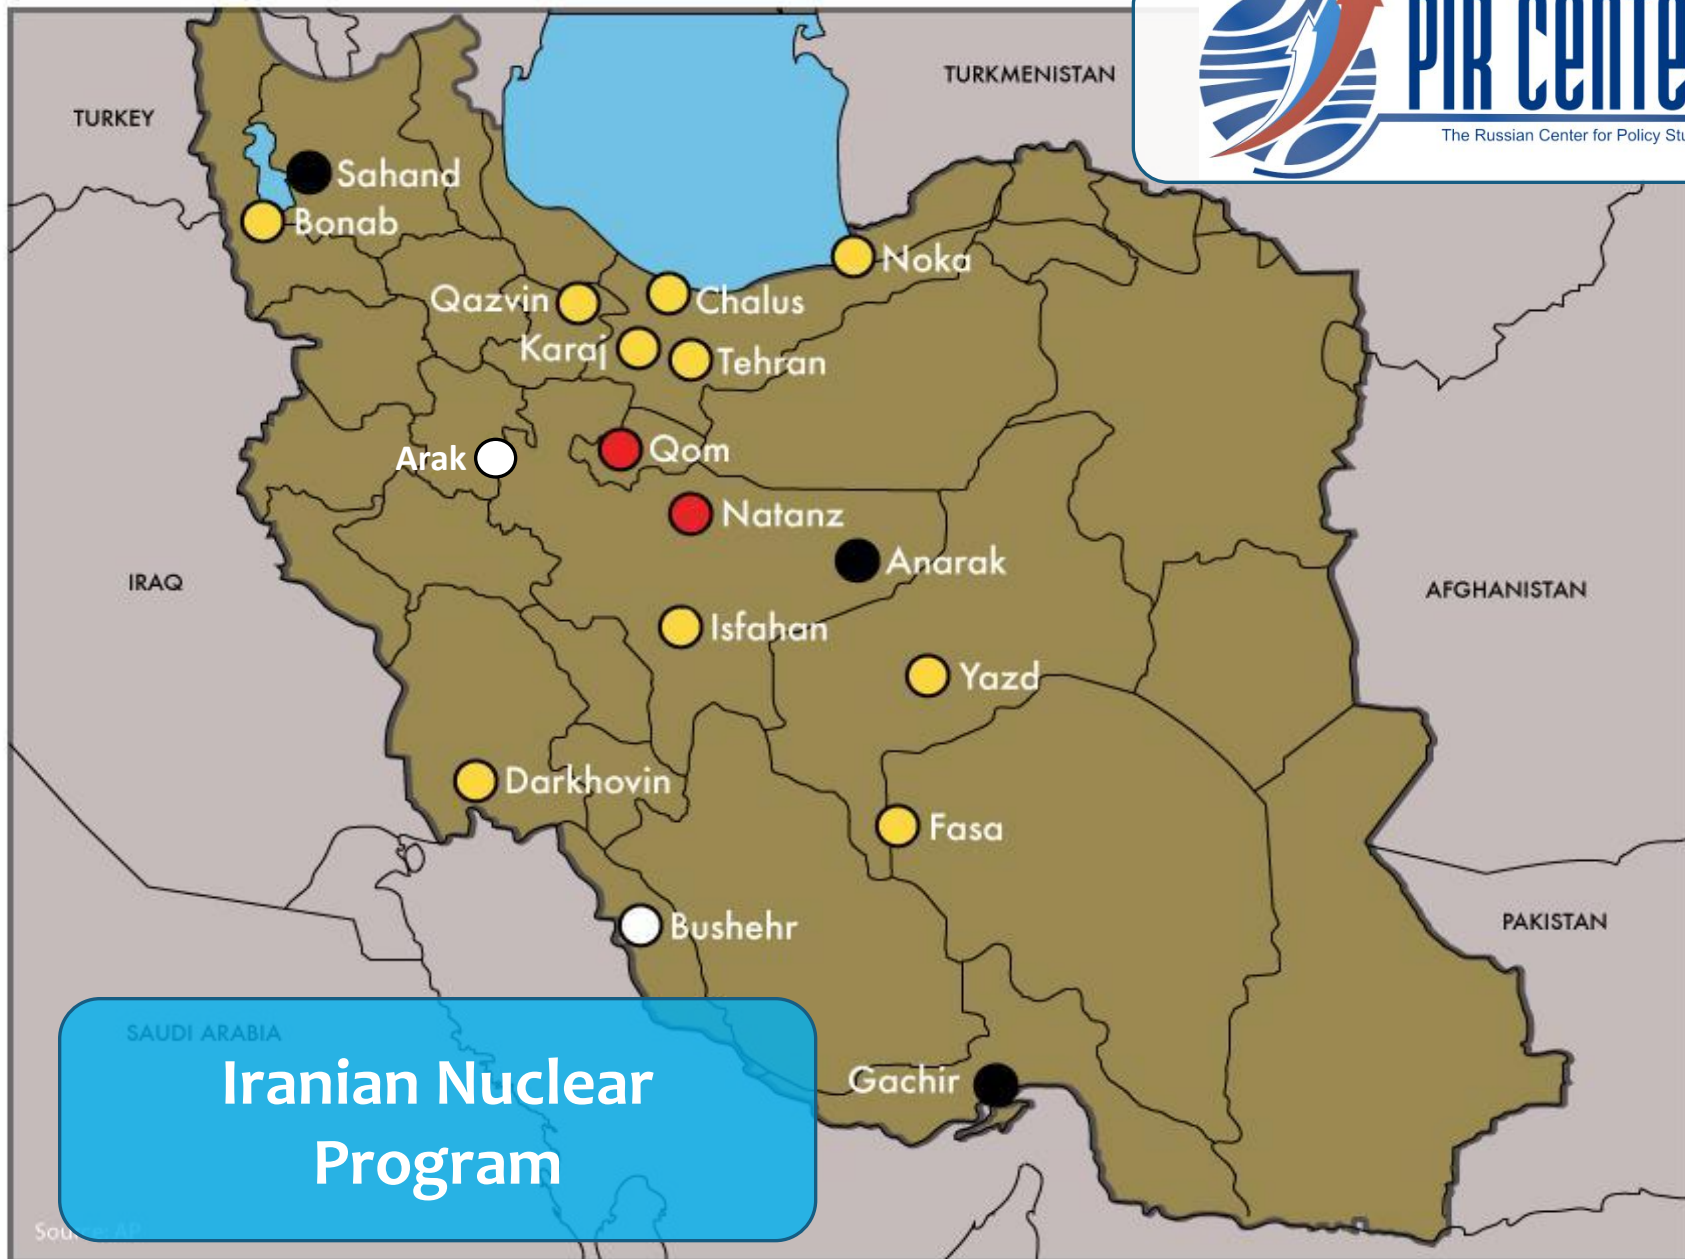

State security and
minimization of the
risk of military
conflicts

Internal political
stability

Technological progress
and self-sufficiency

Expansion, becoming
regional superpower
and leader of all of the
Muslim population in
the Middle East

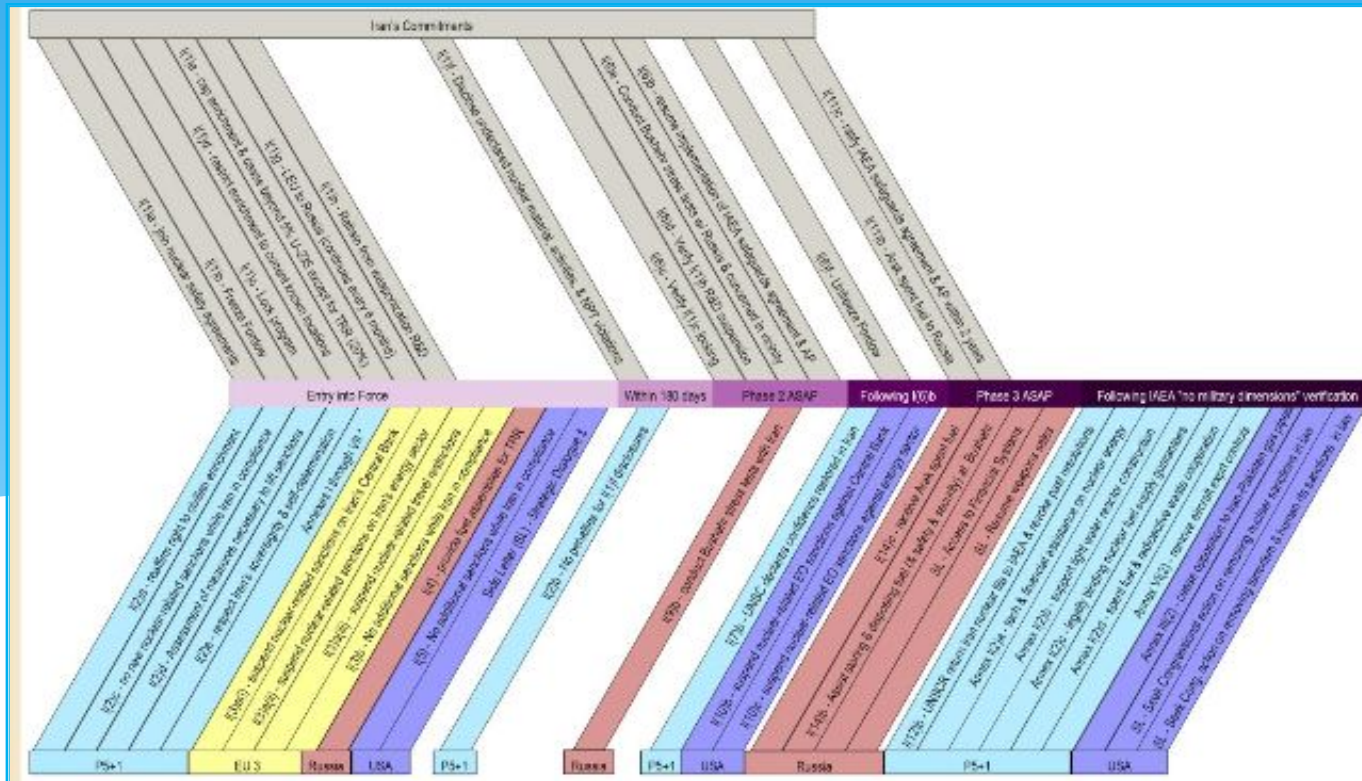

- Institute for Nuclear Physics
- Uranium Enrichment Plant
- Uranium Mining
- Nuclear Power Station

March 16-17, 2013 Strategic Studies Network task force

Draft agreement on the Iranian nuclear program

Phased reciprocal sequencing chart

1st scenario: «Moving forward»

Multilateral format: Iran and P5 + 1 reach the comprehensive agreement

Regional format: Confidence building measures with the Gulf states and across the Middle East

Russia-Iran: Second reactor of the Bushehr NPP, military-technical cooperation, Vladimir Putin visits Tehran

2nd scenario: «Moving backward»

Multilateral format: Iran disrupts the negotiations with P5+1

Regional format: Destabilization of the situation in the Gulf and across the Middle East. Escalating confrontation between Iran and its neighbors

Russia-Iran: Moscow is studying the options for joining new international sanctions

3rd scenario : «**Muddling through**»

Multilateral format: Iran and P5 +1 reach the comprehensive agreement but it remains unstable, Western powers blame Iran for noncompliance

Regional format: Tensions in the Gulf and across the Middle East

Russia-Iran: Second reactor of the Bushehr NPP, military-technical cooperation, Vladimir Putin visits Tehran

What should we be following?

Heavy water reactor in Arak

Levels of uranium enrichment

Additional protocol to the IAEA subsidiary agreement

Missile program
