# PLAN:

I. INTRODUCTION

II. MAIN PART

❖ MY FUTURE FAMILY

❖ MY FUTURE HOYSE

III. CONCLUSION

## Introduction

My name is Aigerim. I am a student of SSMU. I am 19 years old. I am a student of the first year of study. I have a lot of plans for future. And my first dream is to graduate from the university and start working as a doctor-gastroenterologist. My future profession is my own choice. I study with pleasure. I would like to earn my own money and become more independent.

*Nowadays everyone dreams about a successful career. I also want to become a very good doctor. I like to communicate with people, so I will be happy.*

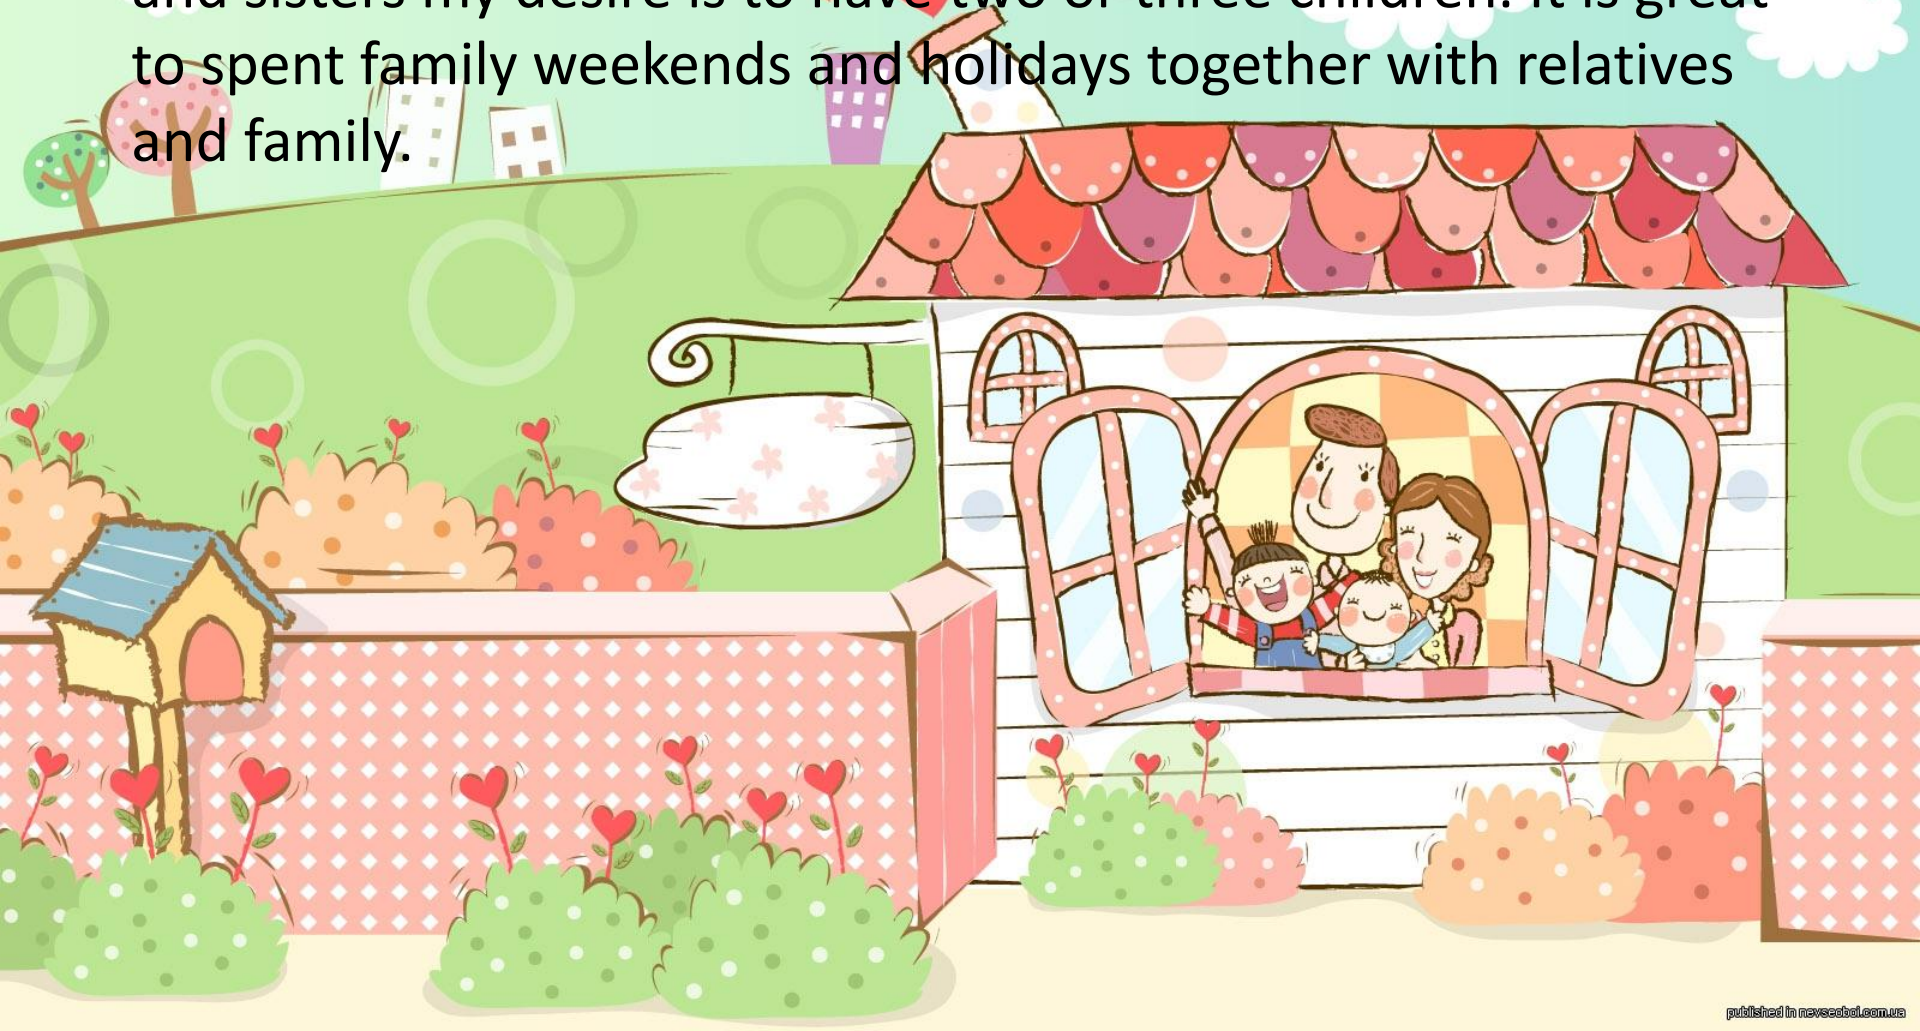

... When I'm thinking about my future I cannot say for sure what it will be like. Many of teenagers do not know what they want to become. But I am sure that the most important things for me in future will be my profession and family. My opinion is that good education is necessary to get a good job. Profession is a very important choice that will define all of my future life. I am glad that my parents support me.

## My future family

What is more, I guess, as every girl on the Earth I would like to have a big and united family. As my both parents have brothers and sisters my desire is to have two or three children. It is great to spent family weekends and holidays together with relatives and family.

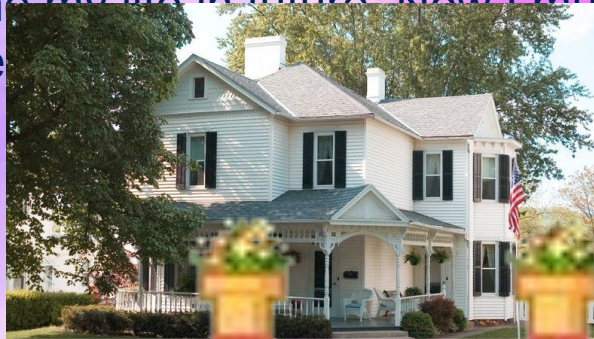

## My future house

Speaking about our future house, I want it to be a big, comfortable and bright one with lots of windows and 2 floors. It would be really great if we had something like forest or a lake near our cottage.

I think that it is nice and romantic to have a terrace with a wonderful look-out over the lake. I also like pets, so I am absolutely sure that we will have a dog and a cat, and maybe even a horse.

That is how I imagine my life in future. Now I must work really hard to become the person I want to be.

## ***Conclusion***

I have often asked myself the question: What do I want in this life? What do I need to be happy? I have a little plan for the future . To begin, I want to finish university. Now I combine both work and study. In the future, I want to find a job even better. After graduation , I plan to work in the company , but still will not say what . Chances are that I'm lucky . I will help my parents . My parents have done for me very much. I want to be grateful to them.

**THANK YOU**
