

Good morning! My name is Nikita!

- My topic is **volcanoes.**

Hi! My name is Victory!

- And my topic is **volcano eruption.**

OUR TOPIC IS **VOLCANOES**

VOLCANO

- **Volcano** - geological formation on the surface of the Earth or another planet's crust, where magma comes to the surface, forming lava, volcanic gases, rocks (volcanic bombs and pyroclastic flows).

The word "*volcano*" comes from the name of the Roman god of fire Vulcan.

Science, studying volcanoes - ***vulcanology, geomorphology***.

Volcanoes are classified according to **the form** (tabular, stratovolcanoes, cinder cones, domes), **active** (active, dormant, extinct), **country** (land, underwater), and others.

VOLCANO ERUPTION

Volcano eruption - the process of release of the volcano on the Earth's surface: ash, the outpouring of magma, which coming on the surface, it becomes lava. Eruption may have a time period ranging from several hours to many years.

Volcanoes eruptions are a geological emergencies that can lead to disaster. In some cases, it may even be the worst disaster of the elements.
