Project work: Types of crime
Topic: murder

- Crime has been around us for many centuries. Every day when we open a newspaper or turn on TV almost all we read or hear is about criminals and their illegal actions.

- Some kinds of crimes are as old as the human society (such as stealing, pick-pocketing, vandalism, assault or domestic violence, murder and manslaughter), others are a more recent phenomenon.

- The main idea of this report is murder and homicide.

- A lot of psychologists and different specialists try to find out a reason for committing crime for many years. The main question for all people is why do they commit murders and homicides

- Now we want to tell you about two russian serial killers Andrey Chikatilo and Alexander Spesivtsev.

Andrey Chikatilo

- Chikatilo was a crazy man.

Andrey killed and ate his victims.

Russian serial killer Andrey

Chikatilo actually ate the genitals,
noses his victims.

- He had a son wife and daughter. His family did not know about the killings. When he was arrested by the police, he was shot. He killed 43 people.

Alexander Spesivtsov

- Alexander Spesivtsev was a murder-cannibal. He raped, tortured, killed and ate women and children. The total amount of his victims reaches 82 people. His mother helped him with committing a crime.

- He was judged and convicted for 10 years. A year later psychological expertise was assigned, Spesivtsev was recognized insane

- According to the law, people who commit a crime must be punished, imprisoned or even sentenced to a death penalty. Without punishment our life in the society would be less secure, although sometimes punishment isn't strict enough

Thanks for your attention
