

Подготовительные этапы работы

- 1) Выделяем ключевые слова в задании
- 2) Определяем две противоположные позиции (позиция автора и позиция оппонента) В задании уже одна позиция нам дана. Вторую просто ей противопоставляем
- 3) Продумайте два вопроса, ответы на которых помогут привести аргументы и доказать позицию
- 4) Обозначьте границы, за рамки которых мы не можем выйти и держать мысли в теме.
- 5) составьте небольшой список синонимов для ключевых слов
-

Структура работы

- Введение
- Мнение автора (одна из позиций)
- Мнение оппонента (вторая позиция)
- Опровергаем мнение оппонента
- Заключение

Подготовка

- Self- education is impossible without computer skills

Тема работы : Самообразование и навыки для самообразования

Какие навыки нужны для самообразования?

Возможно ли самообразования без навыков работы на компьютере? Да (первая позиция) НЕТ (вторая позиция)

Как мы можем уйти в другую тему: мы не можем писать об образовании и компьютерах, о возможностях интернета и онлайн обучения , условиях самообразования **ТОЛЬКО** о **необходимых для самообразования навыках**

Vocabulary

Self-education

- Self-study
- Self training
- Self teaching
- Separate study
- Independent study
- Self learning
- Individual studying

Computer words

- To have computer skills
- To possess computer skills
- To work on computer
- Video conferencing
- Making presentations
- Typing and texting
- Computer-controlled
- ICT and computing
- High-tech skills

Введение

- **Вводное** предложение (перифраз – 2-3 синонима или поменять грамматическую конструкцию) – вы показываете, что вы понимаете тему
- Заявляете о существовании двух позиций (вы показываете проблемный характер)

Тема : **Self- education is impossible without computer skills**

Варианты перифраза

- 1) These days the necessity of using a computer and developing computer skills has become urgent for those who are involved in self-education.
- 2) To be a skillful computer user is a must in self-education.

ВВЕДЕНИЕ

- These days the necessity of using a computer and developing computer skills has become urgent for those who are involved in self-education. Some people consider an ability to work on computer to be the most essential skill in self – training, while others do not support them.
- Вводное предложение и перифраз
- Две точки зрения завлены

МНЕНИЕ АВТОРА

- Люди способны себя обучать без навыков работы на компьютере
- Какие навыки им помогают в самообразовании и как?
- My point of view is that people are able to train themselves without any IT skills. First of all, humans have been using a variety of theoretical and practical skills in self-study for centuries. In particular, basic skills such as independent searching of informative texts and making notes are really helpful for individual learners. Reading, scanning and skimming enrich human imagination and creativity that are thought as vital abilities in self-educating process.

МНЕНИЕ ОППОНЕНТА

- Противоположная позиции автора (она и была заявлена в теме)
- Без навыков работы на компьютере самообразование невозможно
- However, there are people who are certain self-study **is an unattainable goal** if a person is not a skillful computer user. Firstly, **a computer** has become **the most necessary tool** in self learning. Secondly, basic computer skills help in getting and sorting out the information.

• ОПРОВЕРГАЕМ МНЕНИЕ ОППОНЕНТА

Despite my respect to opponents' opinion, I cannot share it. I believe computer literacy **is not to be prioritized** by individual learners as **human brain** is **the greatest tool** to absorb and keep information.

Заключение

- Как можно ярче заявить, что вы уверены в своей позиции (которая обозначена во введении и предоставлена в МНЕНИЕ АВТОРА)
- Заключение может состоять из одного предложения
- Taking all the ideas into consideration, self-education has always been possible without computer skills
- Самообразование возможно без компьютерных навыков

Self- education is impossible without computer skills
