FIRSTCOIN

BACKGROUND – CIRCULATION – STABILITY

The background is a deep blue with a complex geometric pattern of overlapping triangles. On the left and right sides, there are faint, light blue network diagrams consisting of interconnected circles and lines, resembling a map or a data structure. A few thin, white diagonal lines are scattered across the top and bottom of the image.

OUR DIVISIONS

Next-generation digital currency inspired by the success of Bitcoin. FirstCoin is an alternative digital currency that differs from Bitcoin, characterized by faster transactions. FirstCoin's authenticity is supported by its presence on the exchange:

WHY FIRSTCOIN?

We primarily involve those communities, associations, groups and sharing economy startups in our project who can contribute to the long-term stability of Firstcoin through their openness and large numbers.

WHY FIRSTCOIN?

SIMPLE & QUICK

There are no limitations, it works everywhere. You can send Firstcoin just as easily as an e-mail, and it is almost just as fast. It does not matter what hidden part of the world you are in, you can send and receive Firstcoin in seconds. There are no banks to slow down your transactions, so they are completed almost immediately, even on the weekends.

SECURE

Firstcoin is based on the unique technology of Bitcoin. Thanks to block chain technology you can track coin generation and transaction authenticity. The network checks and authenticates itself, so it cannot be circumvented. Firstcoin provides strong abuse protection.

PRIVATE

Just like Bitcoin, Firstcoin is unaffected by problematic banks, governments, countries, authorities, or governments. You can quickly and easily download a Firstcoin wallet, or register online without limitations or even entering personal information. Transactions are anonymous and personal information is not shared.

FREE

You can open or download a Firstcoin wallet free of charge. There are no monthly account fees, there is no need for a bank card. Even the transactions are almost free.

LIMITED

Firstcoin simulates the once adding limitation of gold. At most 110 million can be mined, so it cannot inflate like real currency, which course has how a tendency to print in large quantities.

TEAM & COMMUNITY

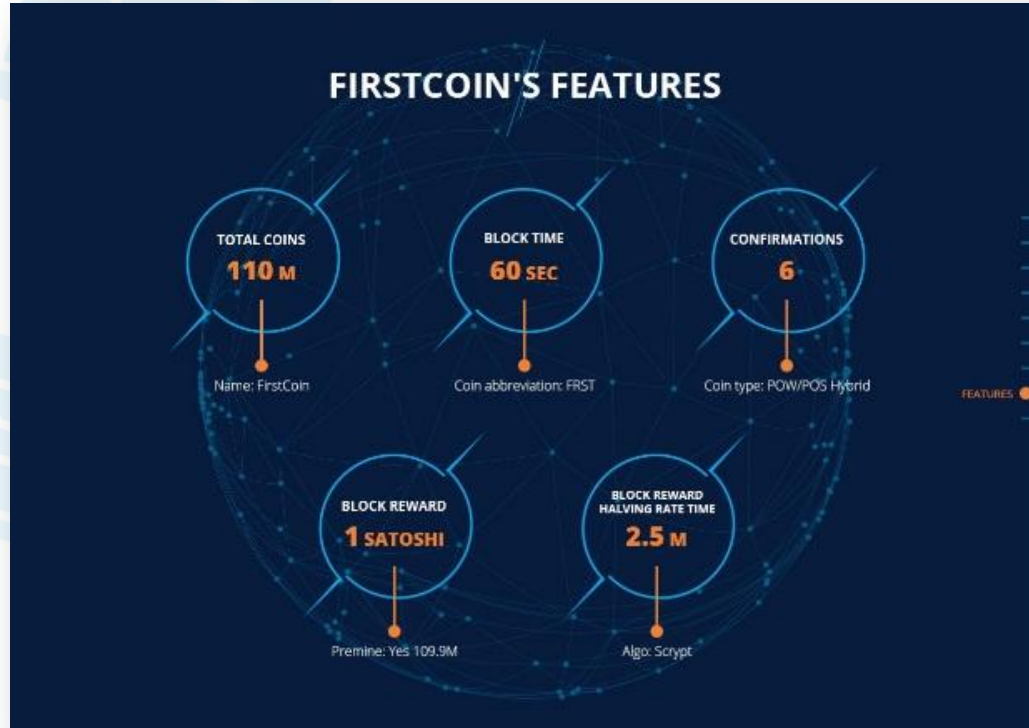

We primarily concentrate on expanding the number of Firstcoin participating businesses. Besides any seminars, a large part of our team includes internationally known marketing and networking specialists with considerable connections.

FIRSTCOIN

1 BILLION \$ PROJECT FOR THE 40 YEARS PERIOD

We are glad to acknowledge that the Firstcoin Club will pursue significant forestry investments as part of its green projects under the umbrella of their so called „Eco Wallet” which is currently being created.

We understand that our REVOTROPIX PAULOWNIA PLANTATION COLLABORATION PROPOSAL of 23rd November 2017 (the „Proposal”) was received with great enthusiasm by the Firstcoin Network, and we note that the Firstcoin Network is intending to use our proposal as a starting point for the coming forestry investments of the „Eco Wallet”.
