\*Preliminary Data

AL FAW contains a Storage Tanks terminal "FAW", Khor Al Amaya Oil Terminal "KAAOT" and Al Basra Oil Terminal or "ABOT"

Current oil exporting facilities' capacity is 1,800,000 bbl/day ; the aim to increase it to 2,200,000 bbl/day.

## PROJECT GOALS

# SCOPE OF WORK

# SCOPE OF WORK

## AL FAW

AL FAW tank farm contain of 24 floating roof storage tanks with capacity of 58,000.00 m<sup>3</sup> each ( 21 existing, 3 to be constructed ), all tanks are out of order due to deformation and design defects. shipper and booster pumping systems need to be upgraded and rehabilitated. Build an accommodation camp and construct helipad.

## ABOT

Al Basra oil port requires major rehabilitation and upgrade, including loading arms , piles reinforcement and offshore Cathodic Protection system.

## KAAOT

Khor Al Amaya Oil Terminal requires a complete rehabilitation and upgrade to be put into operation.

# PROJECT ECONOMICS (example)

Remuneration through oil managing fees through Maintenance & Operation contract with 15 years duration (FAW tank terminal , Sea lines, ABOT and KAAOT)

- Stage 1: three years a \$ 0.5 oil management fees for each bbl/day
- Stage 2: 12 years a \$ 0.25 oil management fees for each bbl/day

# PROJECT BUDGET (estimated)

**\$500,000,000.00**
