

Important information & instructions :

- 1.GM730 is Qualcomm Chipset model
- 2.Software to be Upgraded through LGDP2 V35_UMTS
- 3.Phone to be connected to PC using USB data cable (User Data cable) for software upgrade.
- 4.ASC's need to order this cable separately as this cable is different from our previous models.
- 5.It is recommended to remove older versions of LGDP2 being used for TATA CDMA models, before using LDP2 V35.
 - 6. Great care needs to be taken while upgrading this handset. If it becomes dead during flashing due to cable disconnection, Power failure etc, it can not be recovered after that as it does not support UART (Serial) Flashing.

Profitable Growth

Step 1: Download LGDP2 tool. It will have two folders

a) First folder will contain Setup file b) Second folder will contain other supported files

Step 2: Install LGDP2 from setup file

Step 3: Copy the Sr. No. as provided in the text file

Note how th	e Next button is di	abled until you	enter a valid se	ial number. See	
Custom_Pas	sword.rul for the im	plementation.			
User Name:	Ige
