VESTAR LLC

Cosmetics and household chemicals

MAIN DIRECTIONS

Vestar is one of the leading Russian manufacturers, cosmetics, household chemicals and wet wipes. Company successfully cooperates with the largest distributors and retail chains in Russia.

PRODUCTS

Liquid detergents (washing gels, fabric softener, liquid soap, shampoo, bath foam, shower gel); production for children (baby wipes, liquid soap, shampoo); wet wipes (cosmetic, for household, for cars, antibacterial); supplies for complex cleaning of the house (supplies for cleaning plumbing fixtures, washing floors).

BENEFITS

We create products of a high quality in any segment: from economy to premium. The company is certified in accordance with ISO 9001 and ISO 14001. The production have won many awards and is highly valued by buyers.

SPRING

Natural remedies for beauty and health, our special amber series and many years of production experience - this is what we are ready to share with you!

Kaliningrad

springeco.ru

MAIN DIRECTIONS

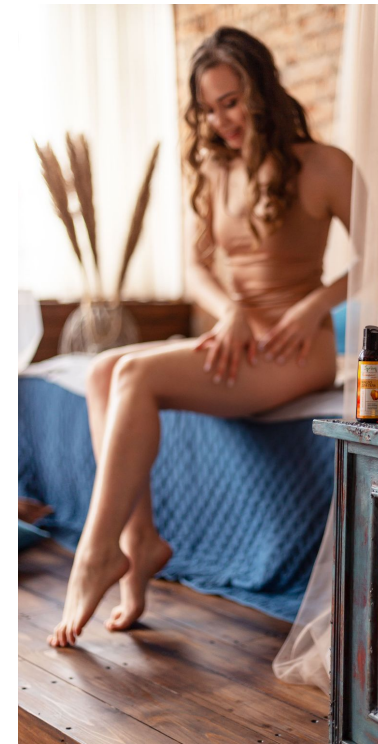

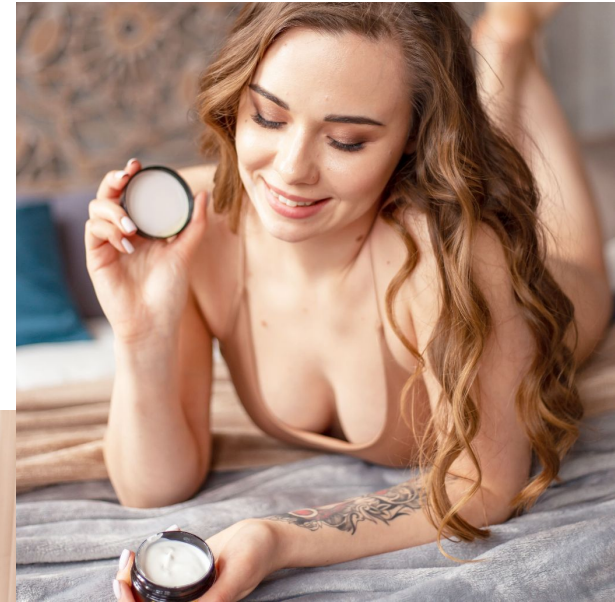

Spring products are a chance to stand out from others, because we are not talking about adding a few extracts in cosmetics, but about all-natural gels, creams, masks, shampoos and other products.

PRODUCTS

A family recipe for cosmetics using succinic acid, amber powder and amber oil gives an amazing effect: it energizes, refreshes and fills with the necessary microelements. The power of amber will give you renewal, a sense of unity with nature and pleasure from the result.

BENEFITS

Five elements distinguish our products from other manufacturers - safety, high quality, natural composition, environmental friendliness and affordability. We believe that natural skin care should be available to everyone.

MALLENOM SYSTEMS LLC

Intelligent control systems based on machine vision and artificial intelligence (i.e. machine learning, deep learning natural network)

MAIN DIRECTIONS

Mallenom Systems in Russia and the CIS is the only official integrator partner of Cognex - the world leader in industrial vision systems.

PRODUCTS

The company has extensive experience in the successful implementation of high-tech IT projects in the field of transport, mechanical engineering, oil and gas, metallurgical, food, pharmaceutical, diamond mining, nuclear industries and other industries.

BENEFITS

The systems developed by the company are based on both proprietary solutions based on neural networks and deterministic algorithms for image analysis, as well as and algorithms from the world leader in machine vision, Cognex.

Ares of expertise

- Video control and inventory of the automotive transport
- Identification and inventory of railcars and rail tank cars
- Industrial control based on machine vision
- Detection and tracking of people in the video image

Industrial control based on machine vision
Visual control at the production line

TYPES OF SOLUTIONS (INVOLVES PRE-DESIGNED WORK, SOFTWARE DEVELOPMENT, WARRANTY AND POST-WARRANTY SERVICES)

- Detection and counting of manufactured items
- Examination of the accuracy of assembled item
- Examination and identification of items based on the colour
- Identification of defects and presence of foreign matter
- Taking critical measurements of the item and overall tolerance check
- Reading of alphanumeric markings
- Reading of 1D and 2D codes from labels and items
- Examination of the item edge

Video control and inventory of automotive transport

- VEHICLE ACCESS CONTROL**
Automarsh is a system for access control and inventory of automotive transport based on automated recognition technology of the vehicle number plates. There are more than 2000 system implementations in Russia, CIS and European countries.
- VEHICLE WEIGHING AUTOMATION**
Automarshal.Weighbridge is a system for automation of vehicle weighing stations, designed to improve the efficiency, reliability and transparency of the vehicle weighing process. There are more than 50 system implementations at production facilities of various industries
- COUNTING OF VEHICLE TRAFFIC**
AVEDEX is a software for counting and classification of vehicles based on the their type. The software collects visual data either from traffic cameras or from pre-recorded video file

PRODUCTS

FTTH optical patch cords, cable ducts, software and hardware complexes «Smart Intercom» and «Smart House», system integration services, telecom design and construction services, TV channels and VOD- content for OTT platforms

BENEFITS

- performance of construction and installation works according to individual customer projects
- Production compliances with international standards, Lean Production concept.
- Experience in construction PON networks since 2016, own construction and sales technology «A-B-C-D-E».

Divisus

Security systems

DIVISUS

Supplier of Integrated Security
Solutions by STILSOFT

Stavropol

divisus.com

MAIN DIRECTIONS

We provide a wide range of solutions for Video Surveillance, Access control, Perimeter protection, UAV's, video-management systems, video analytical integrations and so on. Special attention we pay to autonomous systems, solar and/or wind energy powered, which don't require electricity and cable lines and can be used for protection of remote facilities of any kind

MAIN PRODUCTS SUPPLIED

- Integrated security system for critical infrastructures «SYNERGET»;
- Autonomous video and thermal imaging surveillance system «AVANPOST» for State Border control;
- Autonomous fast-deployment video and thermal imaging surveillance system «MUROM»;
- Off-road vehicle based video and thermal imaging surveillance system «SCORPIO»
- Mobile perimeter protection system «MONGOOSE»;
- Radio Location and Ranging Stations
- Wide range of perimeter protection sensors, including autonomous ones, for use in remote areas with no infrastructure;
- UAV systems

BENEFITS of WORKING WITH US

Hardware and Software of our own development (manufacturing in Stavropol) allows us to solve security tasks for any type of the facilities: airports, railway stations, industrial facilities, seaports, police stations, military facilities, warehouses (including weapon warehouses), prisons, banks, medical institutions and much more

INVENTIVE PRODUCTION CENTER

Republic of Tatarstan

ipc-bugulma.com

Oil and gas industry, housing and utilities, construction of residential and non-residential facilities, metro, airports-construction of infrastructure. B2B.

MAIN DIRECTIONS

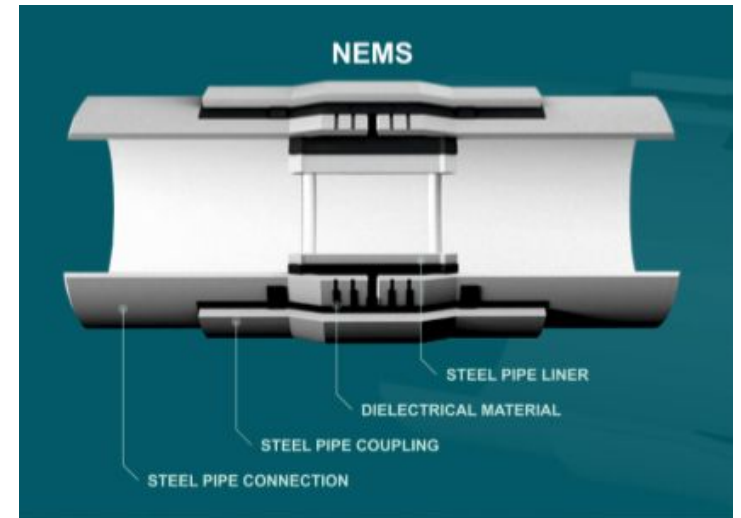

Creation and implementation of industrial technologies for the production of steel pipes lined with polyethylene; bimetallic lining bushings to protect welded pipe joints from corrosion; all-in-one electrical insulating coupling connection; shaped pipeline parts with internal and external anticorrosive coatings; coupling connection technology, which allows you to connect pipes made of various materials, but primarily pipes protected from internal corrosion, without welding.

PRODUCTS

Electrical isolation joint NEMS is installed in supply nets of a gas service, on the cross-country pipelines, oil pipelines and water pipelines for the protection of corrosion, resulting under the influence of stray currents, and for the making electrical disconnection, that is protected by pipeline electrochemical protection.

BENEFITS

- The absence of fire works preserves the internal coating at the ends of the pipes
- High installation speed up to 7 minutes
- Does not require a highly qualified welder
- Reduces the cost of pipeline installation by welding by 5-10%
- Installation from -60 to +120 C in difficult climatic conditions
- No harmful substances are released into the environment

RITM OKB ZAO

Taganrog

scenar.com.ru

SCENAR - an abbreviation of the full name of a medical devices class. It is short for a self-controlled energyneuroadaptive regulator. Or, briefly, energyneurostimulator.

▶ MAIN DIRECTIONS

The physiological purpose of pain is to warn us about an injury or a pathological process. It draws body's attention to a necessity of taking some actions. Modern medicine can offer drugs and medications that can suppress pain perception. However, this results in the loss of the physiological meaning of pain and contradicts the biological mechanism.

▶ PRODUCTS

SCENAR

▶ BENEFITS

The main advantage of SCENAR is that its impulse is bio-variable. Responding to the skin reaction, it automatically "adjusts" the parameters for the most efficient treatment

- SCENAR impulse is physiological;
- SCENAR does not damage tissues, because it does not heat them, or make them do the unnatural "work";
- SCENAR combines the benefits of many methods of physiotherapy, such as darsonvalization, miostimulation, diadynamic currents and even ultrasound;
- SCENAR has minimum contraindications;
- SCENAR has a significant anti-pain effect

DRILLING EQUIPMENT

BDC – balanced drill collar

Intended for axial loading of the drilling bit and increasing axial string stiffness. BDC with spiral grooves are used for drilling of deep wells in order to mitigate the possibility of tool sticking caused by reduction of the area of contact between the drilling collar string contact with the well walls.

Technical Specification	
Regulatory documents	TS 3 RS 200-2003, API Spec 7.1
Length, mm	4 500... 9 600

Types of BDC

- A – smooth, without recess
- B – slip and elevator recess
- D – elevator recess
- C – slip and elevator recess, spiral grooves
- CM – slip recess and spiral grooves
- DC – slip recess and spiral grooves
- Z – hard faces
- BT – inner polymer coating

DRILL COLLARS MANUFACTURING UPGRADE

Thread cutting machine tool commissioned.

OIL PRODUCTION EQUIPMENT

SUCKER RODS WITH SCRAPERS AND CENTRALIZERS

For oil production using sucker-rod plunger and screw pumps.

Advantages of equipping sucker rods with centralizers and scrapers:

- Protection of tubing, sucker rods and sucker-rod couplings from excessive wear.
- Cleaning of sucker rods and tubing from asphalt-resin-paraffin deposits.
- Centering of sucker rods in a well.

Technical Specification of Centralizers	
Regulatory documents	TS 3665-020-48416997-2003
Design options	– Fixed centering scrapers – Floating scrapers – Centralizers for screw pumps – Inter-coupling centralizers for screw pumps
Material	High-strength polyamide-reinforced glass
Stability to corrosion	Any reservoir conditions, including hydrogen sulfide environments, with temperature up to +110 °C
Friction coefficients:	– Static 0.10 – Dynamic 0.11
Setting shear strength, t	2... 2.2
Scraper compression strength	8.8... 12.7

CONNECTION AND ADAPTER COUPLINGS

Intended for connection of sucker rods between one another.

Technical Specification	
Regulatory documents	TS 3665-020-48416997-2003
Outer diameter, mm	– Full-size 60.3, 55.4, 50.8, 46.4, 41.3, 36.1 – Small diameter 35.8, 41.3, 36.1, 31.8
Outer surface wear-proof coating	– Heat-treated, no coating – 1 – Hardened with high-frequency currents – 5
Steel grades	Structural and alloyed steels
Adapter couplings	16x15, 19x22, 22x25, 29x29

OIL PRODUCTION EQUIPMENT

OVER 60 YEARS OF SUCKER ROD MANUFACTURING

SUCKER RODS

Intended for transmission of movement from surface drive to borehole plunger or screw pumps.

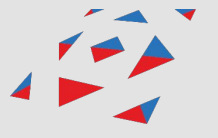

ADVANTAGES:

- The product is API-licensed and meets global standards
- The manufacturing process is fully automated (equipment of leading global producer is used: SURFACE COMBUSTION furnaces, ETCHING lines, ST2) and OKUMA processing centers), ensuring consistent quality of the finished products.
- Use of own long products manufactured from high-quality steel grades with superior performance characteristics enables the full cycle of sucker rod production.
- Advanced strength and anti-corrosion properties.
- Sucker rods can be optionally equipped with centering scrapers.
- Urgent orders are accepted, delivery timing is stable.
- The products are recognized at the oil producing sites of the CIS countries and beyond, including such loyal customers of the company as PUSC, TATNEFT, PUSC, LUKOIL, PUSC, M&P, ROCHEFT.

Technical Specification	
Regulatory documents	TS 3665-020-48416997-2003, 118 API
Specific diameter of rod, mm (inches)	38 (1.5), 19 (0.75), 22 (0.875), 25 (1)
Strength class	K, C, D – Due to strength properties 1.4 times higher than D category. – Due to selection in the most demanding conditions, there high fatigue strength in corrosive environment. – Fatigue strength – heat treatment with further processing with a shot blasting unit.
Length, mm	at 600 up to 9 340
Steel grades	4307MA, 15021MA and other high quality alloyed steels, 100 % blanks undergo ultrasonic incoming examination.

Delivery options:

- Heavy weight sucker rod applicable in forming a "heavy bottom" and improving rod string stability in curved wells and high viscosity wells.
- Sucker rods manufactured of high-alloy, corrosion resistant rod products.
- Sucker rods with centralizers.

CHEMICAL INDUSTRY

RUSSIAN
EXPORT CENTER

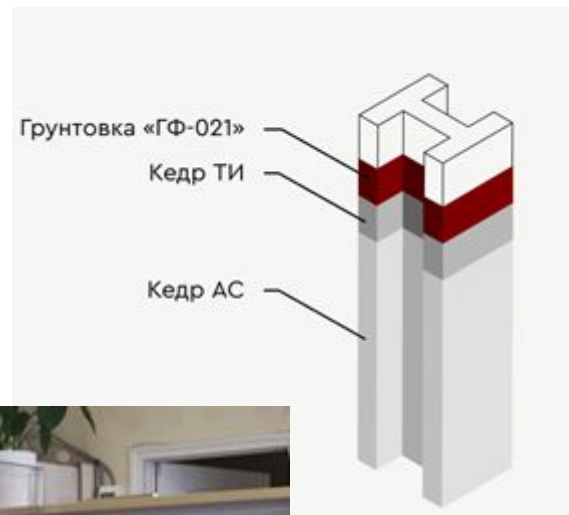

CHEMCENTRE

**Scientific and Production Association CHEMCENTRE
– is one of the biggest manufacturer of fire-proof
fabric and materials in Russia.**

Novosibirskiy region,
Ozerniy
chemcentre.ru

MAIN DIRECTIONS

Producing over 20 different types of fire proof materials, unique chemical synthesis operations of intermediate products, powerful production line, export to Europe and CIS.

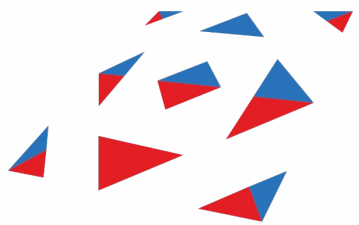

PRODUCTS

Fire retardant coverages, fire proof fabric, flame-retardant thermal expansion coating for metal on an oranic basis, flame-retardant, thermally expanding coating for metal based on hydrogen dispersion. weather-resistant thin-layer flame retardant coating for metal on an organic basis

BENEFITS

SPA Chemcenter have their own multifunctional Research and Expiremental laboratory, two research groups, which allows to find new solutions and improve the quality of materials used in current manufacture.

**RUSSIAN
EXPORT CENTER**
