Text

Cinema has got an important role in the life of any society. The cinema has become the part of the modern way of life. In the earliest years of the cinema the contemporary events were recognized and appreciated.

*More than anything else this **unique quality** secured popularity for the film as a new form of instruction and entertainment. That's why the cinema is considered to be one of the best ways of spending one's leisure time. There are a lot of different kinds of films: **theatrical films, horror films, popular science films, mystery films, documentaries, animated cartoons.**

* Besides the films may be colour or black and white, full-length or short, sound or silent, dubbed in mother tongue, three-dimension or wide screen. We can see films either in the cinema or on TV. As I am often short of time, I have practically no time for going to the cinema. For this reason I watch films on TV more frequently. Such films move me deeply, they arouse the feelings of sympathy or hatred for the heroes.

* Modern **cinema halls** are comfortable. There are many rows with **convenient seats** in the hall. It's possible for everyone to see the screen. The quality of the sound has changed a lot. At the present time we can meet the highest quality digital surround. Most cinemas have a **refreshment rooms** where cinema goers can get a snack or a drink. Cinema is a very popular thing in our life.

*Thanks for watching

*The End
