

PERCEPTION OF BUILDING MATERIALS

student: Antipova Anna

Moscow
2017

The huge options of available products from building materials confuse the architects, who faced the problem of choosing the appropriate ones for their designs and projects.

Metal

Brick

There well-known architects prefer using certain architectural material in their projects I a reiterated manner

Composite Fibers

Concrete

BUILDING MATERIALS

Reasons of using the technologies for changing the perception of material and texture in architecture

Aesthetic

Utility

Durability

Natural Materials.

Example: Planet Africa
Restaurant, Triumph Square,
Heliopolis

Village of Pouss, Cameroon, Africa

Organic Materials. Wood

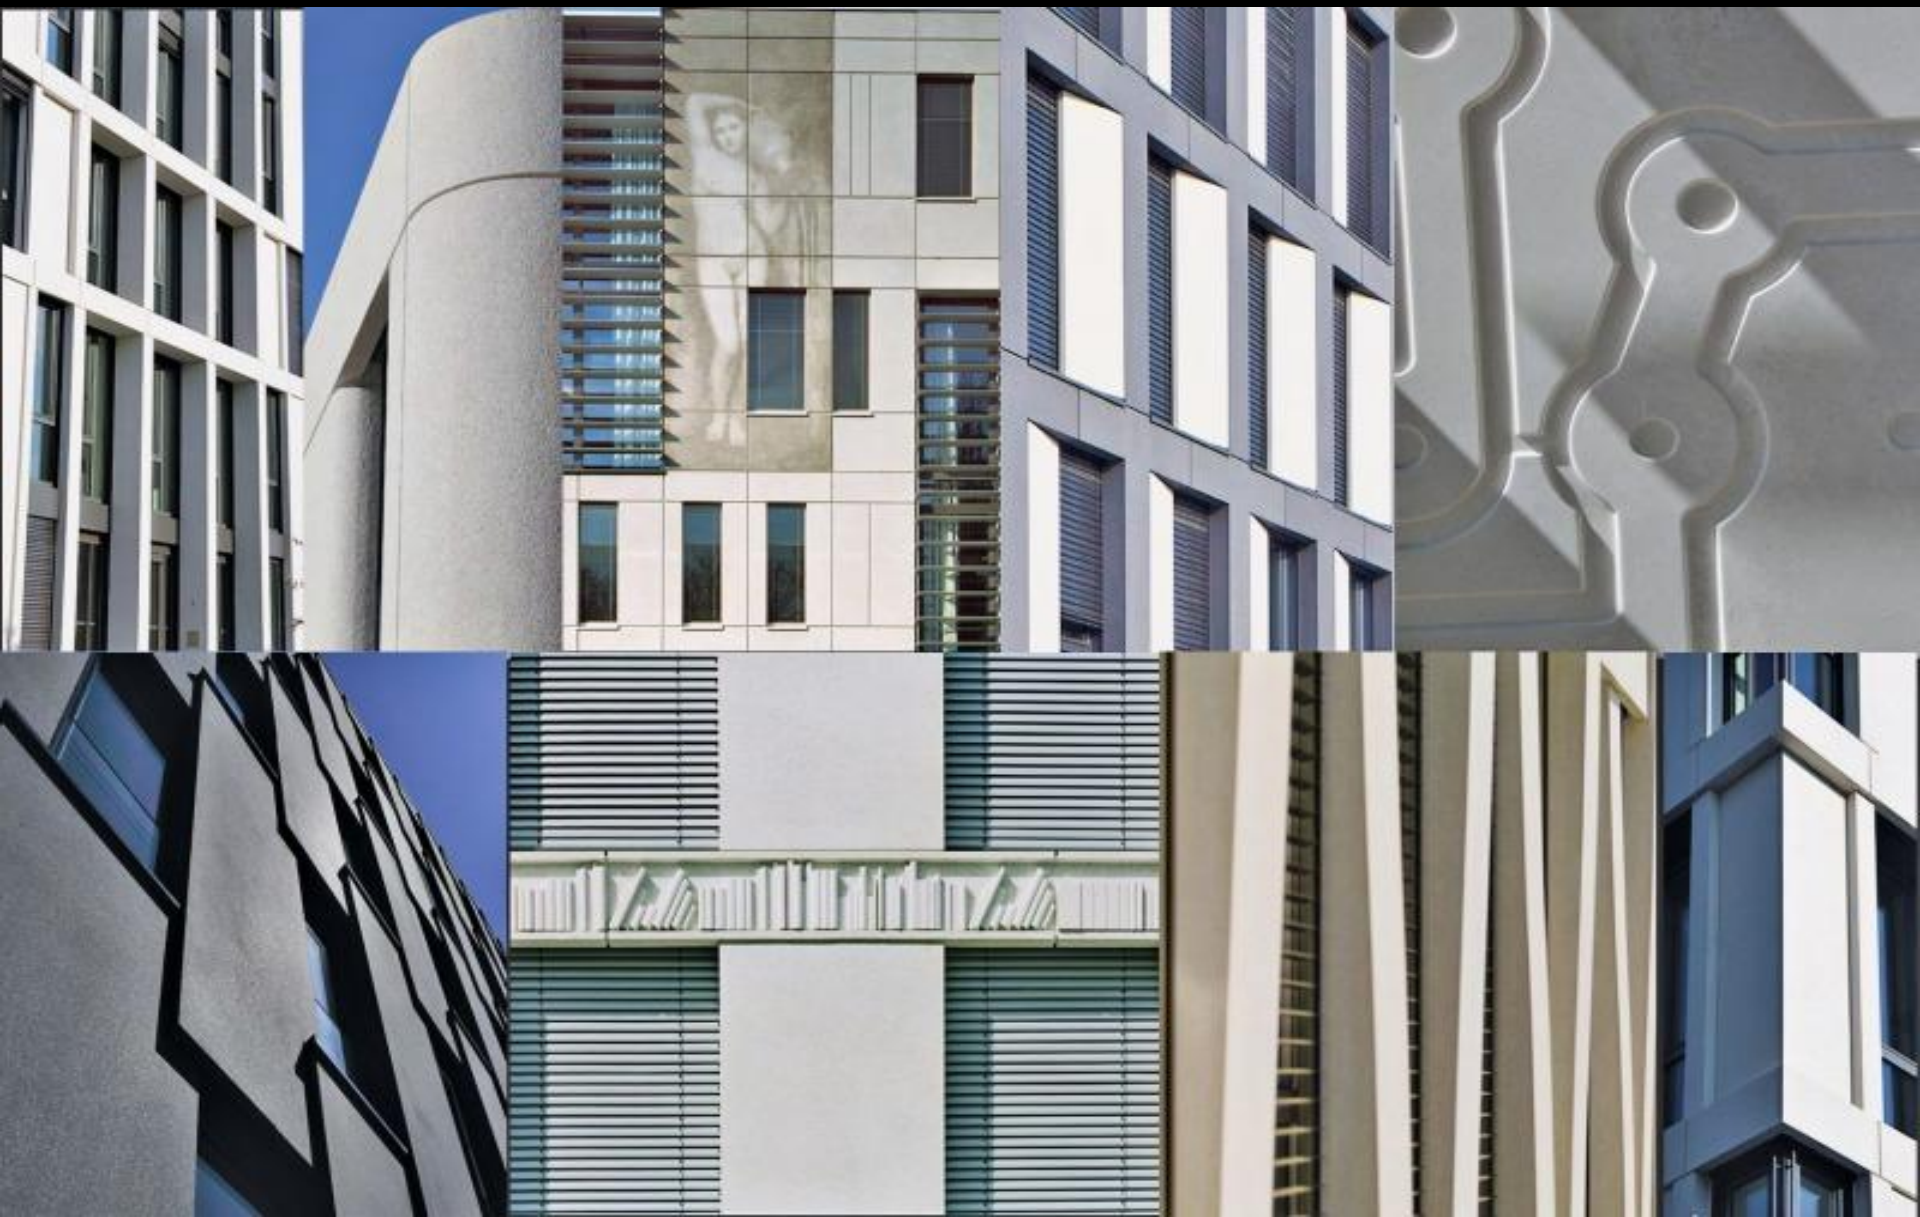

The Raiffeisen Wohncenter (Residential center) in the energy-saving, house made of larch wood, purely natural and best protected by nanostone particle (silane) coating Protects, the high - performance water-based.

Splendid House, Architect the Trojan Johnson

Mixed Materials.Concrete

Fabricated Materials. Metals, glass.

Swan Bells,
Perth,
Australia

Port Authority Bus Terminal ,New
York

INVISIBLE Project.

Blur Building,
Switzerland

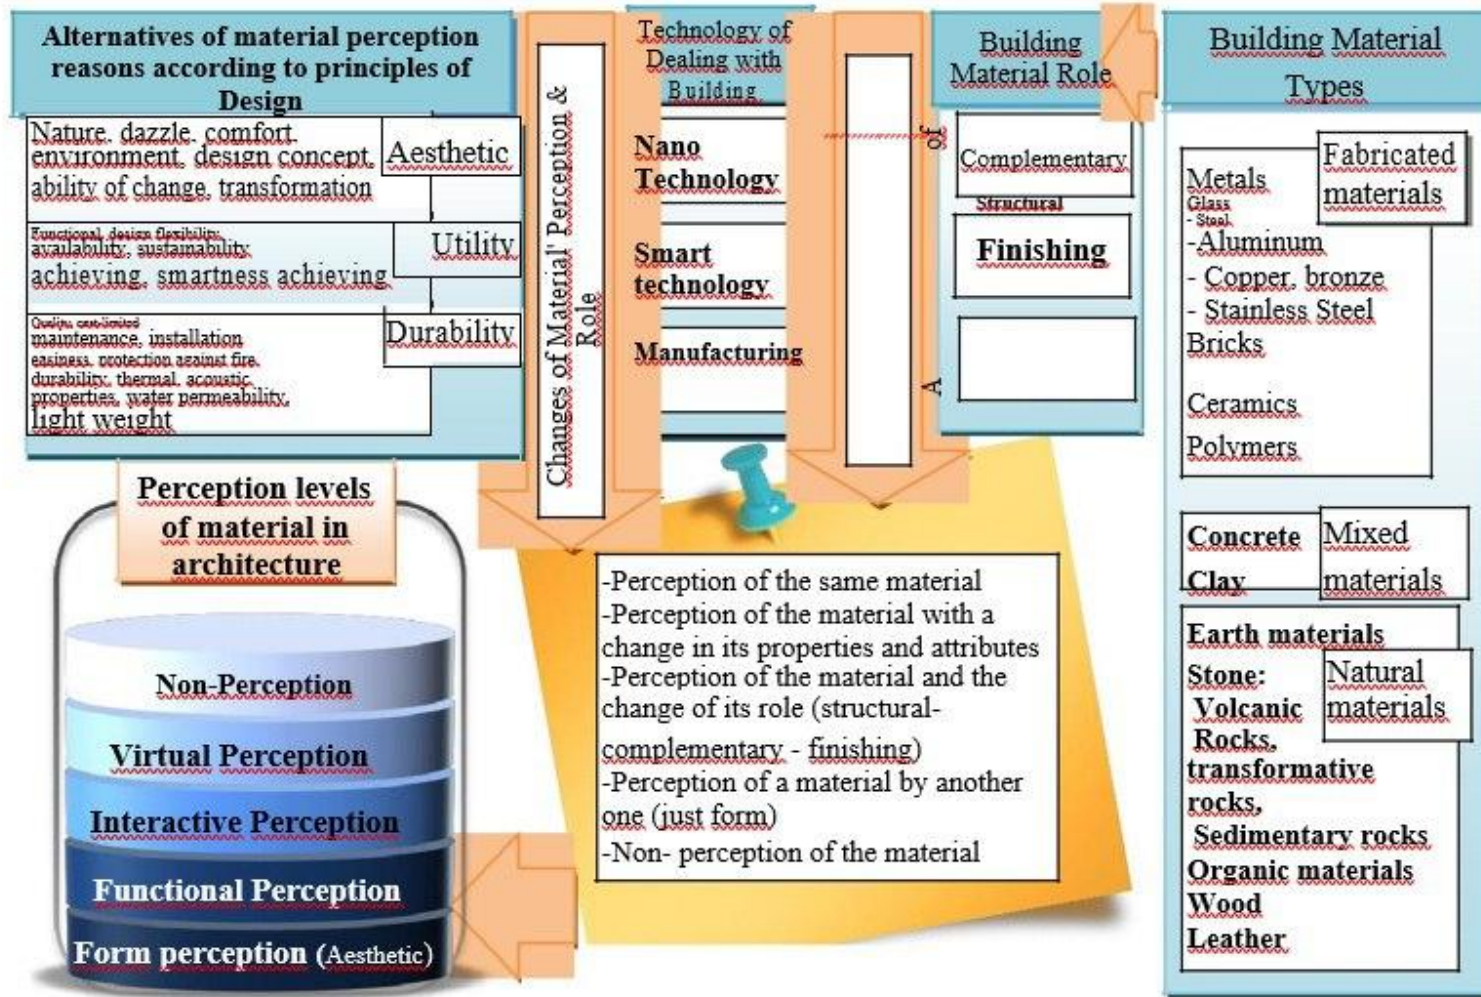

Infinity Tower, South Korea

MIRROR HOUSE,
COPENHAGEN
