

Lyceum 14 of the honored teacher of the Russian Federation
A.M. Kuzmin

Excursion on lyceum

The pupil of 5 "G" of a
class Alexandrov Maxim
prepared.

Welcome to our school, dear friends. We are glad to see you and shake your hands. You can take off your coats and leave them here in our cloakroom. And now, please, this way here.

Our school life is very interesting. We collect scrap metal. We work in our workshops. We make useful things. We work in our school garden. We do physical exercises. We help juniors with their homework. We rehearse a puppet show. We discuss the timetable. We put a concert for guests. We play in the playground. We hold meetings and parties.

Our school isn't ordinary. It is a lyceum. We study both traditional and specialized subjects: Mathematics, History of Britain, English literature, English writing and Economics.

The school building has got four floors. Let's go to see the ground floor. On the ground floor there are a library, a cloakroom a canteen and classrooms

Now I suggest going on the second floor. On the second floor there are three deputies' rooms, two gyms and classrooms.

Why not see the third floor. On the third floor there is an assembly hall, laboratories and classrooms

On the fourth floor there is a headmaster's office and a secretaries' room.

A.M. Kuzmin

G. R. Lubitch

Thanks for coming to our school. Have a cup of coffee in our canteen.

Thanks for attention!
