

When things do go bad,
do you panic?

Do you know what to
do or you prefer to wait
for help?

Who do you think
should take the lead
when things go south?

A person wearing a red life jacket is shown in a turbulent, greyish-blue sea. The person's head is tilted back, and their arms are outstretched, suggesting they are struggling or in a state of panic. The water is choppy with white foam from the person's movements. The overall scene conveys a sense of danger and chaos.

**IN TURMOIL, WE DON'T RISE
TO THE LEVEL OF OUR
EXPECTATIONS,**

**WE FALL TO THE LEVEL OF
OUR TRAINING.**

What do you think about safety training? Have you had any?

Should the safety training take place in classroom, or be a practical drill?

What other areas can we get a safety training in?

What is wilderness?

How can it be dangerous for a human?

What do you think
about survival school?

Have wilderness
survival skills ever
saved your life?

What are the biggest
dangers of the
wilderness?

What items are the most
important in Wilderness
surviving?

VOCABULARY

Compass, rubber band,
thread and a needle, safety
pin, sealant or water
catchment, wire, plaster, fish
hooks, sealed matches,
razor, wadding, spring hook

How can you use a pen?

What can you do with a
condom?

Why is it a good idea to have some charcoal?

What practical survival
skills do you know?

How can these things
help you?
