

AIReader and Send Anywhere: Partnership

Nov 2016

Problem

People face many obstacles when sending large or multiple files to other platforms/devices

Costly, Device Restrictions, Size Constrictions, Resolution Degradation, File Type Limits
And *Much* More

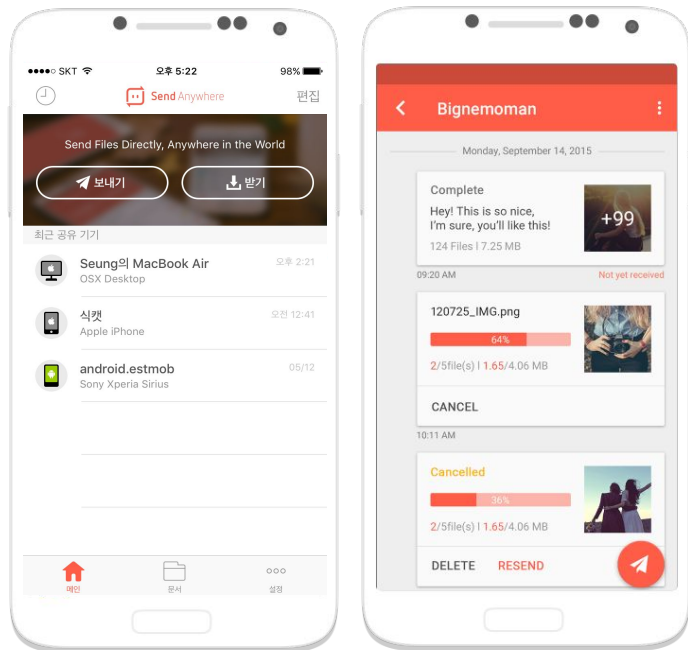

Send Anywhere to the Rescue

Send Anywhere

With Send Anywhere, experience the best in file sharing
Solve these problems at **4x the speed of the competition**

Use Case 1: Daily Use

Sending

After selecting the files to send, you have ten minutes to share the six-digit encryption key with the receiving device.

Receiving

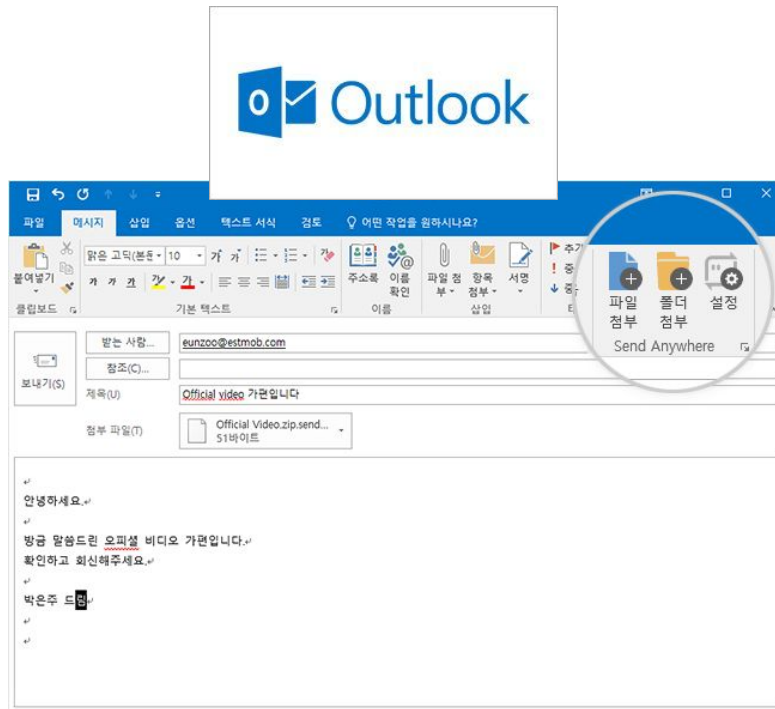

Once you enter the six-digit key, the file transfer begins automatically.

48 Hr. Sharing

Allows you to share files for 48 hours—during which time anyone with the easy-to-share URL can download the files an unlimited number of times. URL can be transferred via social media, messenger apps, etc.

Use Case 2: Collaborations

Outlook has a 20MB attachment limit, however; with the Send Anywhere Plugin this increases to 10GBs!
