London Eye

The London Eye Ferris Wheel was built in 2000, and the Ferris Wheel booths are made of glass in such a way that daredevils who dare to ride on it have the opportunity to view the city from all sides. Before boarding, all guests are entertained with a short film in 4D

Buckingham Palace

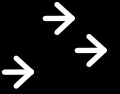

Buckingham Palace was built in 1837 and has been used as the residence of the royal family since the ascension of Queen Victoria to the throne. To find out if the queen is at home, just look at the flagpole that adorns the roof of the building: if the royal banner is flying, it means that the queen is in the palace

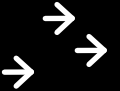

Tower Bridge

It offers a wonderful view of London and the River Thames. The bridge has a total length of 244 meters, in the middle there are two towers, each 65 meters high.
