Reading and listening skills

For thousands of years, there were no epidemic diseases. However, when people started living in towns, infections could spread more easily. When traders and armies travelled from city to city, they brought bacteria and viruses with them and spread infections to new populations. Children were in the greatest danger: in the nineteenth century, fifty per cent of children died before the age of five.

Most infections are spread in the same way: bacteria or viruses are passed on by coughing, sneezing or by touching food with infected hands. People began to understand this as early as the 1300s. During the plague in Milan, the streets were regularly cleaned and the clothes of plague victims were burned.

In the nineteenth century, Ignaz Semmelweiss observed that infection was spread by doctors' dirty hands and recommended washing hands before touching patients. Another early way of avoiding disease was quarantine – sick people were isolated from healthy ones.

Vaccines were first used in the eighteenth century. In 1796, Edward Jenner vaccinated people against smallpox. Nowadays, in many countries, people are vaccinated against many common diseases, such as measles or TB.

Factfile

Between 1346 and 1350, more than one third of the population of Europe was killed by the bubonic plague (Black Death). When Europeans arrived in America in 1492, they brought their infectious diseases with them. The natives of the Americas were not immune to these diseases. Eight million people died on the island of Hispaniola, where Columbus first landed; the native population of Mexico decreased by ninety-five per cent.

PART 2

Questions 6–10

- The people below all want to go to the cinema.
- On the opposite page there are descriptions of eight films.
- Decide which film (**letters A–H**) would be the most suitable for each person or people (numbers **6–10**).
- For each of these numbers mark the correct letter **on your answer sheet**.

6

Jo is studying art at university. She usually goes to the cinema on Friday evenings. She enjoys films that are based on real life and from which she can learn something.

7

Sheila has decided to take her mother to the cinema for her birthday. They both like love stories that have happy endings.

8

Brian is a hard-working medical student. He doesn't have very much free time, but he likes going to the cinema to relax, and enjoys a good laugh.

9

Adam wants to take his 8-year-old son Mark to the cinema at the weekend. They want to see a film with plenty of excitement.

10

Harry and Joyce go to the cinema about twice a month. They particularly like detective stories and do not pay much attention to which actors are in the film.

A *The Delivery*

Jim Treace stars in this well-known comedy about two workmen who have to deliver a long piece of wood to a house. But unfortunately the performances are poor, and the film is too long for such a simple joke.

B *And Tomorrow We Find You*

A fast-moving adult story about a San Francisco policeman in danger. Based on a real-life happening, it keeps you guessing right until the last minute. Although there are no big stars, there are some fine performances.

C *The Ends of the Earth*

A story based on a real-life journey to the South Pole. This film contains some quite wonderful wildlife photography – make sure you see it while you have the chance, or you'll be sorry.

D *Island of Fire*

You get spectacular scenery and lots of thrills in this action-packed story, in which a young sea-captain rescues terrified villagers from a volcanic island in the South Seas.

E *Out of School*

Here we live through a day in the life of an American teenager who has problems not only with his parents and their boring friends but also with his first girlfriend who just doesn't seem to understand him.

F *A Time of Silence*

Don't forget your handkerchief for this story of a young college boy and girl who manage to survive all the pressures of modern life. And what an unforgettable wedding scene!

G *A Private Party*

A wonderfully funny comedy, which takes place in the 1940s. A reporter and his very worried wife try to save a sheep from the local butcher. The actors really make the most of this clever script.

H *Who Shot Malone?*

It's a surprise to see so many famous names wasting their time in this dull detective story. In the end you find yourself asking, 'Who cares?'
