HOLCOMB & CO'S.
Transfer Tablets.

A new and remarkable invention for producing facsimile copies of Reports, Circulars, Order Lists, Announcements, Maps, Programs, etc. No press, mangle, ink rollers, or prepared paper required. This process is pure and simple—anyone can use it. Simply write or draw on any paper with any Transfer Ink the matter to be reproduced. Press this sheet, when dry, upon the Prepared Tablets (consisting of refined French Gelatine and of two ingredients) and the matter is instantly transferred to the latter, which may then be removed from without further preparation.

To produce the print, lay the paper upon the Gelatine, pass the hand over it, and remove as shown in the cut below. After securing as many copies as desired, wash off the Gelatine with a sponge and it is ready for use again.

A Perfect Copying Process.
Simplicity, Rapidity, and
Cheapness Combined.

From 50 to 100 Facsimile
Copies can be taken in Fif-
teen Minutes from One
Original Writing.

EVERY MAN HIS OWN PRINTER.

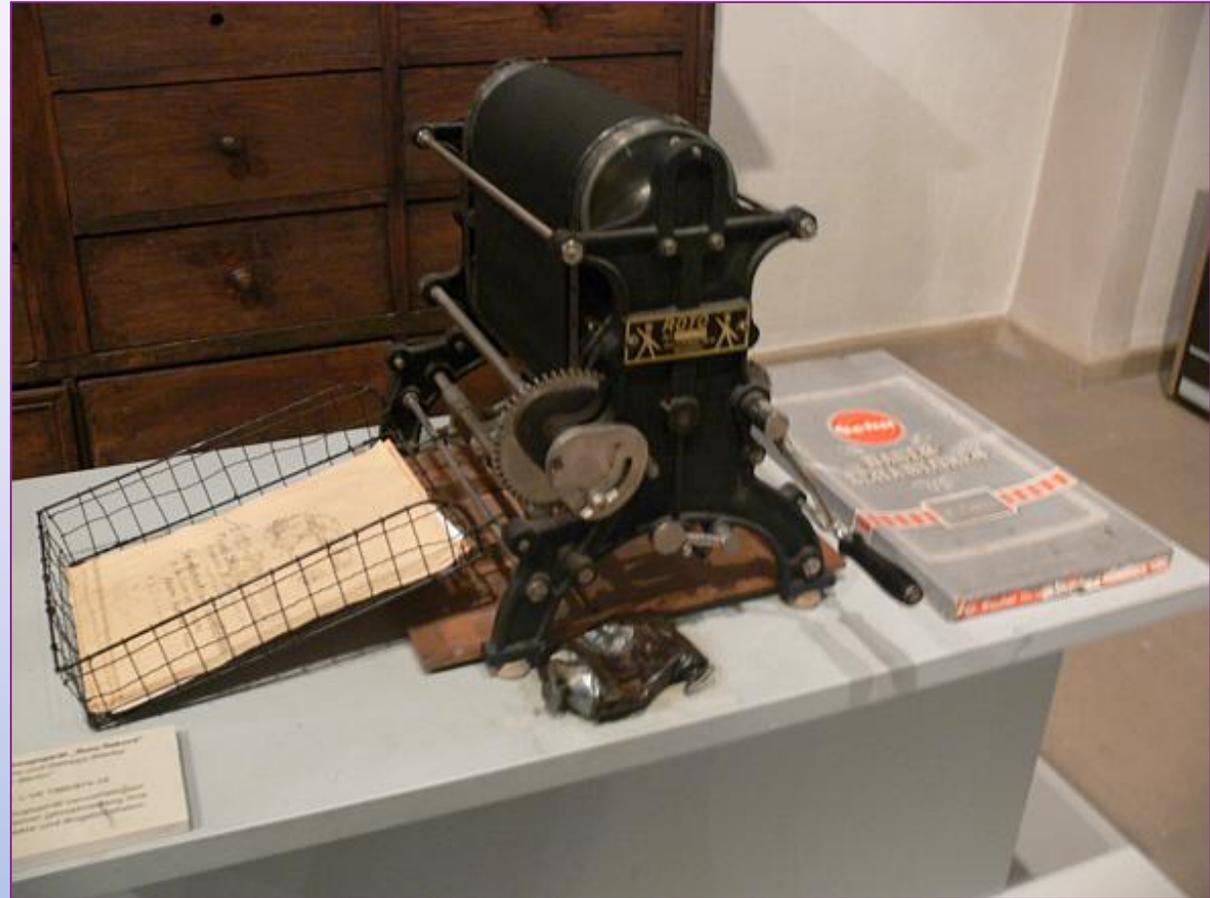

To business and professional men, this new copying process will be of incalculable value. Merchants, Lawyers, Teachers, and all having more or less printing to be done, will save thousands of money by purchasing this process, and doing their own work at a very trifling expense. The Tablets will last for years. Everyone who sees the process, remarks to it. It is the greatest time, labor, and money saving invention introduced. By the use of these Tablets the most skillful artist, as well as the novice will obtain a faithful copy of his pen-work—be it writing, drawing, lettering, or what it may. The Tablets are selling rapidly and are demanded in all sections.

They are put up in neat boxes with full directions for operating, and a package of Transfer Ink, and will be sent prepaid at the following prices:

Note Size, 6 1/2 x 10	\$1.50
Letter Size, 10 x 15 1/2	\$2.50

In ordering, mention your nearest express office. Send stamp for sample prints. Address all orders to the manufacturers.
