На тему: система образования Великобритании

A decorative border with intricate floral and scrollwork patterns in white, framing the central text on a black background.

FEATURES OF UK EDUCATION

The education system in the UK is considered ideal, and some countries are guided by it. A striking example is the Canadian and Australian education. All educational institutions in England are divided into private and public-this is a distinctive feature of the British system. Schools are different from Russian ones: they do not work according to a single program. The student has the opportunity to choose the one in which he can better prepare for admission to a particular faculty. The education system in England has the following structure: Elementary School – primary education, from 5 to 11 years; Secondary School – secondary education, from 11 to 16 years; Further Education-post-secondary, from 16 to 18 years; Higher Education-higher education, from 18 years old.

CLASSIFICATION OF SCHOOLS BY AGE OF STUDENTS

❖ In Britain, there are full-cycle schools in which a child learns from the age of 3 to 18 years. But there are also separate institutions for junior and senior students. Parents together with the child choose where he will receive an education. For the younger ones, there are Primary Schools-children from four to 11 years old study here, as well as Junior Schools, where education takes place from seven to 13 years old. There are institutions for senior students with in-depth study of individual disciplines.

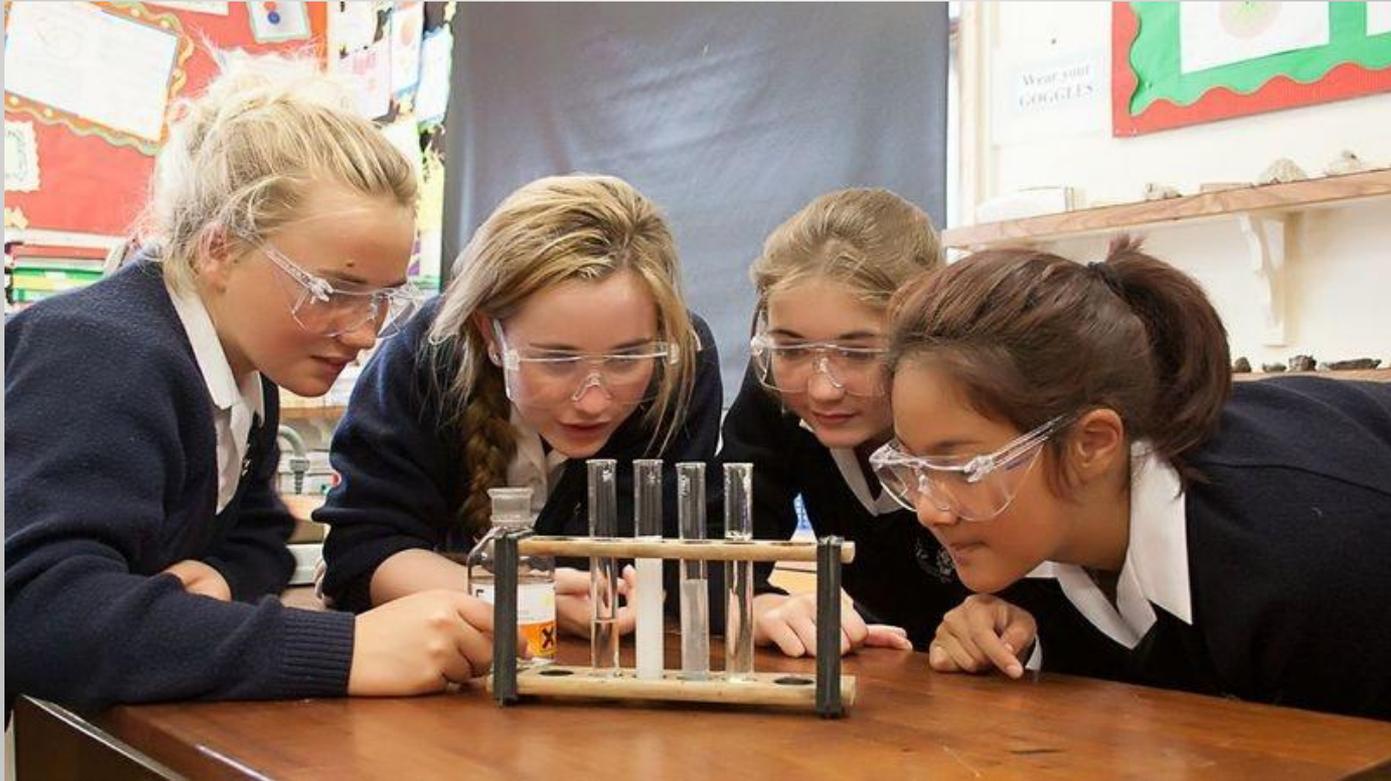

CLASSIFICATION OF SCHOOLS BY GENDER OF STUDENTS

❖ Education in the UK can take place in mixed schools, for girls and for boys. There are supporters and opponents of the mixed system of education in the society. Some argue that children should communicate with the opposite sex – this motivates them and teaches them to defend their rights. Others insist that boys and girls distract each other and are worse at learning the material. This is also why English schools wear uniforms: so that children are engaged in their studies, and not discuss who is wearing what.

A decorative white floral border with intricate scrollwork and leaf patterns surrounds the central text area. The border is symmetrical and features a central crest-like element at the top.

PUBLIC AND PRIVATE SCHOOLS

❖ British schools are public and private. The quality of education is not very different, because this is strictly monitored by the state. Although it is believed that students of private schools receive better training, since these educational institutions have a better material and technical base, more experienced teaching staff, fewer people in the class. Private British schools did not appear yesterday. Many of them have been functioning for several centuries, and their graduates traditionally receive a high score when entering the university.

TUITION FEES IN THE UK

❖ A private school in England will cost the parents of a student a decent amount. Children whose parents are unable to pay for them, receive a free secondary school education. Higher education in Britain is paid for both for the subjects of the kingdom and for foreign citizens – for them the price is higher. One year of study will cost from 10 to 25 thousand pounds a year. A student with a British passport can enter into debt: he will start paying it only after completing his studies and employment. A mandatory condition – to compensate the state for the cost of training, he can only if his annual salary is not less than 21 thousand pounds.
