Offer Description

# Описание Процесса

## Что вы получите при посещении?

Описание процесса посещения и решения проблем здоровья зубов. От начальных этапов диагностики заболеваний, до профилактики и описания индивидуального плана решения проблем связанных с зубами.

### What to expect in your first visit:

- When you first come in, we will greet you and ask you to complete a medical history form. Our dentist will introduce themselves and show you to one of our relaxing dental rooms. Your dentist will then listen to any concerns you may have and perform a comprehensive dental health check. We assess the health and function of your teeth, gums and jaw to make sure your oral health is the best it can be.
- Your dentist will carry out a full professional scale and clean. We will also discuss proper brushing and flossing techniques, and provide advice on dietary choices and lifestyle changes you can make to improve your oral health. Lastly, your dentist will apply fluoride treatment that can help prevent tooth decay.
- If we discover that there is further work to be done, we will provide you with a detailed treatment plan that takes you through the recommended procedures, all associated costs, any risks or potential complications, an indicative timeframe as well as the expected results.
- On conclusion of your appointment, we will give you an oral hygiene pack that includes a toothbrush, dental floss and toothpaste.

*Your initial appointment will be thorough, and normally takes anywhere between 45 minutes to 1 hour.*

## Protecting your oral hygiene

Our scale and clean service will freshen your mouth, by removing plaque and tartar build-up that your normal brushing and flossing routine will not get. A comprehensive examination of your mouth will catch any problems early and get you on the road to dental health. If you are looking for a quality dentist, we would love to see you.
