

Why is English so popular!

- Today, English is considered to be the most widely spoken language. Indeed, English is spoken today in almost all countries of the world, it became compulsory to study in our country. Do you know English?

Hardly anyone knows!

- And hardly anyone knows and can even imagine that when the English language was the language for mobile, even in the UK. But, nevertheless, it is so. In order to understand why English has become so popular, moreover, demand should dip into history.

As English was formed?

- As English was formed? Scientists believe that English language education started in 5 century AD. It was during this period that the island, which are modern Britain, moved tribes of angles, Saxons and Jutes. Over time, the Islands formed four separate kingdoms-Northumbria, Mercia, Kent, Wessex. That is why the basis for English formed Wessex dialect.

Formation of the language!

- The formation of the English language until the year 1066. At this time the territory of Great Britain came the Normans who introduced into use in French. The French language spoken at Court, conducted in French in school, speak in French high society. While English was the language of mobile. This situation persisted until the 14th century, when the French language was supplanted by English. But the French managed to leave a significant mark, and today in modern English can be found quite a few French words

The dialect of the English language!

- At that time there were many dialects. But I wonder what literary English began to develop from the London dialect, which was conditional language Czerny and petty criminals. Of course, we are talking about the old English language, on which were written the first English works. Their author was John Chaucer.

New England language in the 16th century!

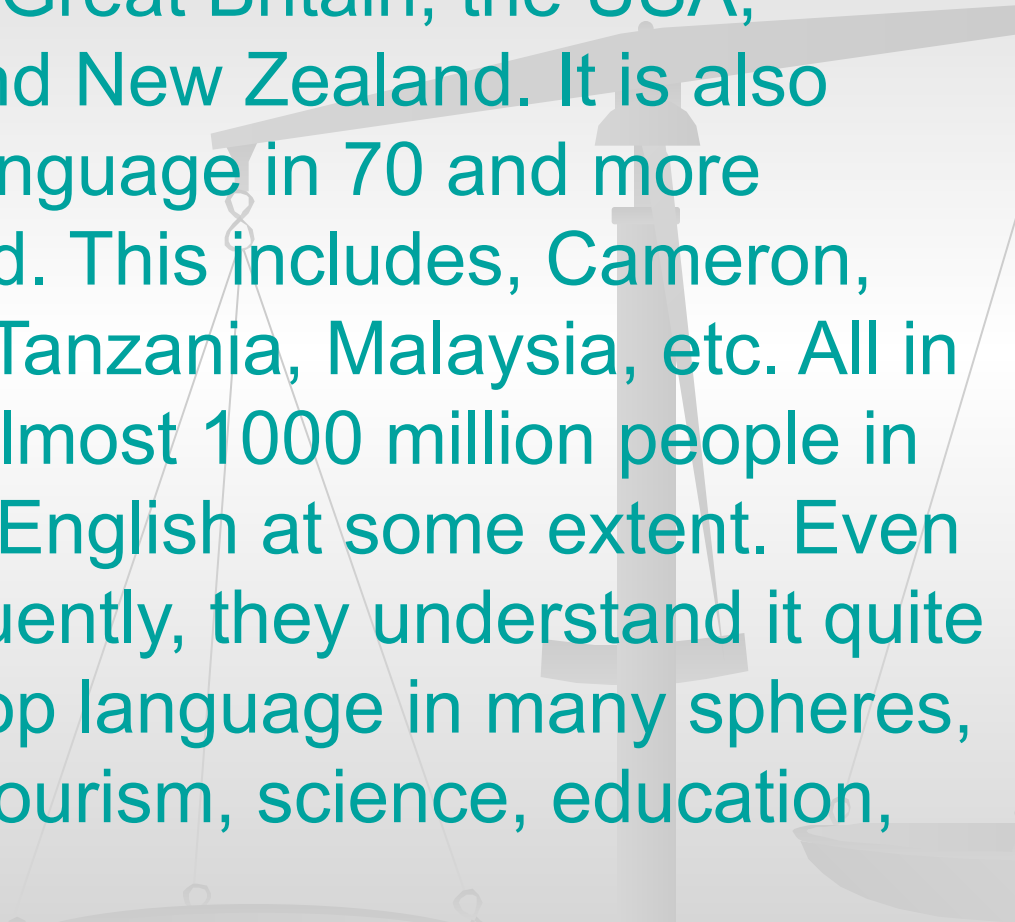

- In the 16th century New England began to develop language. The *novoanglijskom* language Shakespeare wrote, but the modern Englishman is unlikely to be able to read the original of Shakespeare's sonnets, to such an extent New England language is not similar to modern English. With regard to modern English, we study the classical, literary English. That's only if you arrive in London, you can hardly understand it. The fact that indigenous Londoners speak "cockney"-the London dialect, which differs considerably from the classical English. But back to the spread of English in the world. It all started with the colonization of America, because America was the largest colony of England. Colonization policies and has left its mark in India, where today the English language is considered to be the second State language. The British fought a fairly strict policy concerning the colonies and tried to subdue as many countries as possible. The result is today's most popular English language.

On the average stage!

- **The initial phase is complicated due to the need of mastering the use of articles, confusing Rules of reading and writing, unaccustomed Phonetics. Is not in English and clear rules on what syllable to put emphasis. However, learn to speak English "somehow" is much easier than in German or in French. English grammar "for beginners" allows you to quickly learn how to build phrases (pay attention to the questions) and navigate the simple texts. In the middle stage, many are lost in the face of English verb tenses.**

It's not a secret that English is the world's most popular language. There are more than 300 million native speakers of English. It's the native language in such countries as Great Britain, the USA, Canada, Australia and New Zealand. It is also used as an official language in 70 and more countries of the world. This includes, Cameroon, India, Pakistan, Fiji, Tanzania, Malaysia, etc. All in all, today there are almost 1000 million people in the world who know English at some extent. Even if they can't speak fluently, they understand it quite well. English is the top language in many spheres, including business, tourism, science, education, medicine, aviation.

A faint, light gray background image of a balance scale is visible behind the text. The scale is positioned vertically, with its central pillar and horizontal beam extending across the right side of the frame. Two pans are suspended from the beam by thin wires, one on the left and one on the right. The scale is slightly tilted, with the right pan appearing lower than the left.

Statistics

- 500 million people consider English their second language. 85% scientific works are first published in English. English is spoken as the second language or widely used in 90 countries. 1,5 billion people in the world speak and understand English. 1 billion websites in the Internet are in English.

The English language and we today

- I will become a self-confident and successful business person. I will always get the news first and get access to information on any subject. I will communicate with people all over the world. I will develop my personality and adopt in social life. I will find a fantastic job and earn a lot of money. I will travel abroad and enjoy speaking English.
