Changes in society by computing technology

Suzanne Maquelin

S2696320

Probleem definition

Computer technology has changed our society

- Did it keep changes from occurring?
- Better or worse off without computer technology?

My opinion

Central government would have survived

Worse off without computer technology:

- Food
- Communication
- Progress in other fields

Opinion of others

Better off without computer technology:
- Health issues [1]
- Privacy [2]

Worse off without computer technology:
- Internet increases sociability, civic engagement, and the intensity of family and friendship relationships, in all cultures. [3]
- Arab revolutions [3]

Did not keep changes from occurring

Social Issues

- To what extent would we be better or worse off without computer technology?

- Has computer technology kept changes from occurring?
