The best of both worlds?

- Convertible bonds are fixed-income instruments that pay a coupon and can be redeemed at a predetermined price at maturity
- Prior to maturity, the investor may exchange a convertible bond for a predetermined number of shares
- When the stock markets are performing well, the convertible bond will behave like an equity share, and the probability of conversion will increase
- When the stock markets are performing badly, the convertible bond will behave like a straight bond, and the probability of conversion will fall

Excellent, 24slides never fails to over deliver. I needed some critical slides to share with a VC and partners, and 24slides helped make sense of all in terms of content per slide and design; both helped make the story flow.
