Nessie truth or myth?

The first hypothesis: Monster Nessie exists because it is spoken of in the annals, it will make the video.

PROOF: Nessie history began much earlier, during the conquest of the Celtic lands by the Romans. Then the conquerors of stone sculptures of various species of local fauna, could not identify a single animal looks like a giant seal with a long neck. Later the mention of the Loch Ness monster encountered in the records and geographical atlas, but really in earnest about Nessie talked only in 1930.

Despite the wealth of information for a long time, the only plausible evidence of the existence of Nessie was a video by Tim Dinsdale, made from the air. It was seen as a kind of large creature moves in the water. The experts who conducted the analysis of the film, concluded that the video is genuine.

Conclusion: Many people have seen Nessie, pictures are taken, videos are made.

The second hypothesis: Nessie does not exist, because no one can prove at least one of the theories

Proof: The legend of the Loch Ness monster for so many years does not cease to haunt the imagination of fans of the unknown creature. Although the evidence for the existence of Nessie stories are solely unreliable witnesses and fuzzy images, the number of enthusiasts who wish to catch the monster's tail, not decreased.

It is true, as his are looking for, so still not been found. The scientists studied the water of Loch Ness, where, according to legend, lives a legendary monster, using 600 separate sonar and satellite navigation system. The scientists tested the entire lake, but nothing like the monster they have found.

Conclusion: Many hypotheses have been refuted as an optical illusion
