

Inventions and inventors

Студентка группы МЦО-116
Фазлиева Юлия.

"To raise new questions, new possibilities, to regard old questions from a new angle, requires creative imagination and marks real advance". "Imagination is more important than knowledge". Albert Einstein

To invent is to see anew

An invention is a new composition, device, or process. Some inventions are based on pre-existing models or ideas and others are radical breakthroughs. Inventions can extend the boundaries of human knowledge or experience.

Joseph Nicéphore Niépce (1765 – 1833)

Joseph Nicéphore Niépce was a French inventor, most noted as one of the inventors of photography and a pioneer in the field. He is well-known for taking some of the earliest photographs, dating to the 1820s. As revolutionary as his invention was, Niépce is little known even today.

Alexander Graham Bell(1847 – 1922)

Alexander Graham Bell was an eminent scientist, inventor, engineer and innovator who is credited with inventing the first practical telephone. His research on hearing and speech led him to experiment with hearing devices which eventually culminated in Bell being awarded the first U.S. patent for the telephone in 1876.

Karl Friedrich Benz(1844 – 1929)

Karl Friedrich Benz was a German engine designer and automobile engineer, generally regarded as the inventor of the petrol-powered automobile and pioneering founder of the automobile manufacturer, Mercedes-Benz.

László József Bíró (1899 – 1985)

László József Bíró was the inventor of the modern ballpoint pen. He presented the first production of the ball pen at the Budapest International Fair in 1931. Working with his brother George, a chemist, he developed a new tip consisting of a ball that was free to turn in a socket, and as it turned it would pick up ink from a cartridge and then roll to deposit it on the paper. Bíró patented the invention in Paris in 1938.

John Logie Baird (1888 – 1946)

John Logie Baird was a British engineer and inventor of the world's first working television system, also the world's first fully electronic colour television broadcast. Although Baird's electromechanical system was eventually displaced by purely electronic systems his early successes demonstrating working television broadcasts and his colour and cinema television work earn him a prominent place in television's invention.

Akio Morita (1921 — 1999)

Akio Morita was a Japanese entrepreneur, cofounder of Sony Corp. In 1949, the company developed magnetic recording tape and in 1950, sold the first tape recorder in Japan. In 1957, it produced a pocket-sized radio.
