A vibrant, multi-colored nebula with purple, blue, and green filaments and stars. The background is a dark, deep blue space filled with numerous small, bright stars of various colors, including white, yellow, and red. The nebula's structure is complex, with long, thin filaments and larger, more diffuse clouds of gas and dust. The colors transition from deep purple on the left to bright blue and green on the right, creating a rich, multi-hued appearance. The overall effect is that of a dynamic and beautiful cosmic structure.
