а деятельность определяет сознание»**

Основные положения теории

Теория деятельности — система методологических и теоретических принципов изучения психических феноменов. Основным предметом исследования признается деятельность, выражающая все психические процессы.

1. «единство сознания и деятельности»
2. Деятельность и сознание — органическое единство (но не тождество, т.к это разные понятия)
3. Деятельность регулируется сознанием
4. Сознание не просто «проявляется и формируется» в деятельности как отдельная реальность — оно «встроено» в деятельность и неразрывно с ней
